Comments:

Thank you for the opportunity to comment on the Emergency Regulations for Statewide Urban Water Conservation. It is critical that drought-resistant and sustainable water supplies ratepayers have invested in deliver their water reliability benefits during drought conditions to support California's economy and quality of life. I urge the State Board to adopt the modifications to the existing emergency regulation to allow water agencies to achieve state water-use targets through a combination of conservation and sustainable drinking water supplies, such as desalination, potable reuse, and long-term transfers of conserved water. The State Board has a unique opportunity to incentivize the development of sustainable water supplies -- not only for this drought -- but to better prepare California for future droughts.

I think watering trees should have a special exemption. If tree don't get water now, their roots would weaken and topple over later
