Comments:

Thank you for the opportunity to comment on the Emergency Regulations for Statewide Urban Water Conservation. It is critical that drought-resistant and sustainable water supplies ratepayers have invested in deliver their water reliability benefits during drought conditions to support California's economy and quality of life. I urge the State Board to adopt the modifications to the existing emergency regulation to allow water agencies to achieve state water-use targets through a combination of conservation and sustainable drinking water supplies, such as desalination, potable reuse, and long-term transfers of conserved water. The State Board has a unique opportunity to incentivize the development of sustainable water supplies -- not only for this drought -- but to better prepare California for future droughts. We would like consideration for our efforts and expenses in making our San Diego supplies adequate for our use without imposing on the main CA supply.
