**Subject:** Water Release to the Central Valley

Rich Satkowski  
State Water Resources Control Board

I understand that the executive director of the State Water Resources Control Board has denied increasing water to our Valley as we enter a fourth devastating year of drought, even though the California Department of Fish and Wildlife, the National Marine Fisheries Service and the U.S. Fish and Wildlife Service all support the increase. This is devastating news to Dinuba farmers and the businesses and families that depend on agriculture to make a living and feed our nation.

On behalf of the businesses and families that reside in Dinuba and the surrounding valley communities, I ask that you reconsider and increase the water allotment to the Central Valley, so we can continue to do business and keep people employed and fed.

Sincerely,

*Sandy Sills*
