Subject: Lake Tulloch/New Melones/Stanislaus River water flows

Good Afternoon,

After attending a town hall meeting this last Saturday morning regarding the tentative agreement that has been proposed to your board and hearing that the OID, SSJID and the federal government have agreed, I urge you to please accept as well.

These water flows are going to be detrimental to the local community as well the farmers and surrounding communities. Please agree to this agreement until a long term plan can come forth. This drought is scary and very real. Please, I beg of you, to accept the proposed agreement.

Thank you,

Candice Lopes
Lake Tulloch property owner
