

Dear Chair Felicia Mancos, board members  
of the State Water Resources Control Board,  
and Governor Jerry Brown,

The recent drought is putting a strain  
of our states water resources. Despite  
many competing ~~interests~~<sup>interests</sup> for our water, I  
am writing this letter on behalf of our  
states fish and wildlife population, especially  
salmon. More than 100 species of wildlife  
rely on salmon as a staple food source.  
Losing salmon means losing one of our most  
precious resources. Please keep this

Chair Felícia Marcus  
and Board Members

State Water Resources Control Board

P.O. Box 100

Sacramento, CA 95812

~~95812~~

in mind when considering the Bay Delta  
Water Quality Control Plan. Your actions  
and decisions can make a dramatic difference  
on the well being of entire ~~the~~ river ecosystems  
and watersheds for years to come. Please  
protect this resource with at least 50% flow  
in the Toulumne watershed.

Thanks,

Shannon Fairchild
