Subject: Solution for Water Crisis facing Lake Tulloch communities

I'm writing to ask you to please approve the agreement submitted by the Oakdale and So. San Joaquin Irrigation districts and the Bureau of Reclamation regarding Water Releases of New Melones Reservoir which flows into our lake. As a resident of Copperopolis, we get our water from Lake Tulloch Reservoir. As a community we are conserving water and realize the drought has reached a crisis situation. This plan will supply water needs for people and irrigation for crops as well as meet your programs. We will be truly thankful for your support to do your part in this crisis to meet the needs of the Communities.
