Greetings Ms. Townsend and the *State Water Resources Control Board*.

I oppose the TUCP orders in as much as they weaken existing flow and water quality standards already known to fail to protect endangered fish and wildlife in the Delta. This would exacerbate the collapse of the Delta and our regional fisheries and economy, as well as encourage invasive species to thrive in bad Delta water conditions (like the water hyacinth and later in the summer, toxic blue-green algae blooms).

It must be reversed and protections for the Delta strengthened.

Less water should be pumped and account must be taken of terrible impacts of water pumping on Delta communities.
