state water control board

You must not curtail the water in mill, antelope and deer creek, this will cause a major hardship to the area ranchers and their lively hood, that in the past have been very diligent with their management of the fish situation. with an extreme loss of income and having to sell off their herds and loss of their ranches. this would be very detrimental to the environment of the area concerned. in closing I urge the board to not pass this emergency act, sincerely, rob burt los molinos ca.
