Subject: russian river emergency conservation measures

Dear State Water Board,

I was told by a russian river hotline staff to e mail comments regardless of the deadline you imposed. The deadline for written comments was ridiculous given that the few people in my neighborhood that received a letter regarding the emergency received it saturday june 13 and the deadline for comment was only a miniscule day and a half later, namely 12 noon june 15! Hardly reasonable!

A neighbor told me her attempted e mail is not going through, so before writing at length, I will test the email address to see if my transmission is successful.

My concerns in short are:

Lack of adequate notice;

Exempting commercial agriculture from this regulation;

Violation of due process;

creating a hostile argumentative environment such that residents further resent agribusiness, and agribusiness further resents residents and everybody resents the fish;

Hearing in Sacramento that should be held instead in our community.

Further comment and suggestions to follow.

Ann Maurice
