Subject: Actions due to insufficient flow for specific fisheries in tributaries to the Russian River

"I'm hereby submitting to the Office of Administrative Law (OAL) and to the State Water Resources Control Board (SWRCB) the following comments for consideration in connection with emergency actions.

"I am shocked, shocked, to learn that there is gambling going on at Rick's!"

I am shocked that you did not realize that drilling many and massive wells to facilitate more vineyards and entertainment centers would have a deleterious effect upon the coho salmon. What rock were you hiding under when the pesticide and herbicide runoff caused the deaths of insect and juvenile fish populations alike? Where were you when the frost protection measures of draining creeks caused the death of thousands of juvenile fish, flopping on the dry creek beds in agony.

I am outraged that you think that you have the right to curtail my water use, while going whole hog forward on more destruction of wildlife habitat for the benefit of vineyard owners and their ilk.

Stop the madness. Put an immediate halt to all new vineyard development, use of water for irrigating vineyards, and any new entertainment centers.

We are not amused.
