Russian River Watershed

Workshops

Please join State Water Resources Control Board and California Department of Fish and Wildlife staff at workshops on water and fisheries management topics.

Dates: Thursday December 17, 2015 & Tuesday January 26, 2016

Time: 3:00 pm – 7:00 pm

Location: North Coast Regional Water Quality Control Board
Hearings Room
5550 Skylane Boulevard, Suite A
Santa Rosa, CA 95404

Goal: To share water rights and fisheries management information with stakeholders interested in opportunities to improve water supply reliability and fisheries restoration.

Learn More About:

- State and federal funding opportunities available to individuals and public entities for offstream storage and habitat enhancement
- Different types of water rights, including help filling out applications for water rights and streambed alterations
- Local fisheries
- Flow enhancement actions under the California Water Action Plan

Schedule: The first portion of each workshop will include an introductory presentation on water rights, fisheries, funding, and the California Water Action Plan. The later portion of each workshop will provide the opportunity for attendees to discuss specific questions or topics of interest directly with state and local representatives.

To receive additional information about these workshops, please subscribe to the State Water Board's "California Water Action Plan/Statewide Instream Flows" email list under "Water Rights" on the following webpage:
