Subject: Please stop Nestle's illegal water extraction from Strawberry Creek!

February 7, 2018

Victor Vasquez
Senior Water Resource Control Engineer
Enforcement Unit 3, Division of Water Rights
State Water Resources Control Board
vvasquez@waterboards.ca.gov

Dear Mr. Vasquez,

I am writing to thank you and the Water Resources Control Board for the thorough Report of Investigation (INV 8217) of December 20, 2017, regarding water rights claimed by Nestle Waters of North America in the Strawberry Creek drainage on the San Bernardino National Forest. Given the conclusions of the report, that Nestle's water extractions have long exceeded the amount of their legal water rights, I urge the Water Board to take immediate enforcement action to halt illegal withdrawals. I further urge the Board to compel Nestle to remedy decades of adverse impact on fish and wildlife in the Strawberry Creek watershed. Such remediation must compensate for the damages caused by excess extraction from 1947–2015, and continuing unmitigated to this day.

It is essential that the Water Board take an active role in protecting this vital natural resource, and not defer to Federal agencies (USFS, USFWS) now subject to political pressures contrary to their role as trustees of public resources. Please remain engaged in the issue, which demands action to study and mitigate damages, and take strong action to protect the water resources that we Californians and our forest inhabitants rely upon.

We are at a critical moment for the future of our Planet and now is the time to do the right thing. I urge you to protect our water for future generations who will rely on it more and more in our changing climate and increasing drought in Southern California. Please stand up to the powerful Nestle corporation and stop them from illegally taking our water to put into environmentally irresponsible small plastic bottles for their short term profits. Our great grandchildren's lives depend on the decisions we make today.

Sincerely,

Annie Aldrich
