Subject: FW: Nestle water pumping in San Bernardino Mountains

Hi Victor,

We received public comment on the Nestle ROI through our general information email inbox today. Please see the emailed letter below.

Thank you,

Subject: Nestle water pumping in San Bernardino Mountains

Greetings,

As a mountain resident I want to urge the State Water Resources Control Board to stop or severely restrict Nestle's water pumping from Strawberry Valley in the San Bernardino Mountains. Drought is a recurring problem for those of us who live in the Southern California mountains, particularly in recent years. We live under almost constant water use restrictions. To allow Nestle to continue to take enormous amounts of water for great commercial gain at very little cost to them seems not only immoral but hazardous to the well-being of mountain communities -- as well as to all living things which depend upon reliable water sources.

Thank you for your time and consideration.

Inge Austerman
