

Dear State Board Members,

As an angler and resident of California I am writing to ask that you DO NOT adopt an unimpaired springtime flow rate for the San Joaquin River of 60 percent.

We have wasted enough money on this project w/ little to no progress! With our states economy struggling as it is we do not need to add millions more to this pointless project.

Again I respectfully request that you DO NOT adopt a 60 percent unimpaired springtime flow rate for the San Joaquin River this fortify both the health of the local fishery and the region's economy.

Thank you for your consideration.
