

Greg Young, P.E.

Distinguishing Qualifications

- ◆ Co-founder of Tully & Young, Inc.
- ◆ Leader in UWMPs and SB 610 preparation and strategy
- ◆ Valued collaborator and advisor

General Experience and Qualifications

Mr. Young is a registered civil engineer with nearly 25 years of extensive experience in strategic water resource management and planning. Mr. Young has spent much of his career helping clients develop workable solutions that meet their fundamental water planning objectives. Mr. Young's experience and skill gained from his extensive work throughout California allows him to bring innovative solutions and approaches to address client projects. Mr. Young provides expertise to local water purveyors, municipalities, non-profits and private interests on a range of matters from water supply assessments and UWMPs, to aiding clients with the purchase or sale of water assets.

Specific Project Experience

2010 UWMP, Strategy Advisor, 2015 UWMP Placer County Water Agency, Auburn, California

Lead efforts to prepare a multifunctional Urban Water Management Plan (2010 UWMP) that integrates the objectives of mandated UWMP statutes with efforts to protect existing water rights while anticipating the dynamic future of multiple retail water agencies. As technical lead, focus was directed on providing a supportable basis for future demand conditions, while incorporating growth forecasts and conservation requirements. Assisted with updating per-capita monitoring and reporting. Working with DWR to develop weather normalization assessment tools for 2015 UWMP.

Principal, 2010 UWMP Update Carmichael Water District, Carmichael, California.

Lead preparation of 2010 UWMP that integrates the objectives of mandated UWMP statutes with efforts to protect existing water rights. Developed conservation policies and demand reduction forecasting.

Principal Strategist and Author for various projects Tulare County Resource Management Agency, Visalia, California.

Provided strategic policy development for General Plan Update including supply and demand integration and CEQA documentation. Prepare water related technical appendix for Animal Confinement Facilities EIR. Provide peer review and testimony regarding impacts from gravel mining operations.

Advisor and guidance development for 2015 UWMP Guidebook CA Dept of Water Resources, Sacramento, California.

Assist with developing guidance for estimating future urban savings attributable to codes, standards, ordinances, and sustainability plans – a new provision to the Water Code Section 10631(e)(4). Tasks will include: (1) develop explanatory text for inclusion in the 2015 UWMP Guidebook, and (2) develop example scenarios for inclusion in the UWMP Guidebook that demonstrates suggested estimating methods and documentation.

ACTIVE REGISTRATION

Registered Engineer: CA
#C51255

EDUCATION

B.S., Agricultural Engineering,
California Polytechnic State
University, San Luis Obispo
1990

RELEVANT EXPERIENCE

- ◆ Comprehensive water resources planning
- ◆ SB 610 WSA preparation
- ◆ UWMP preparation
- ◆ UWMP guidance and tool development
- ◆ Coordinating and facilitating complex water management and planning efforts
- ◆ Comprehensive understanding of agricultural and urban water use and trends
- ◆ Policy assessment and development
- ◆ In-depth technical understanding of California water facilities and management
- ◆ Water transfer specialist
