Das-

Sorry for the delay in getting back to you. Yes, the tunnel is owned by the City. Apparently we have rights to whatever flow is left over after two superior water rights holders divert their water in the amount of about 60 gpm. We have not used this as a City water supply since 1969, when the piping was destroyed by winter storms.

Can you tell Brian and I the answer to this one?

Hi Das, does the City own the Cold Springs Tunnel in the west fork of the west fork of Cold Springs Creek? The tunnel face says: "Cold Springs Tunnel - City of Santa Barbara 1905." If so, do you know how much water it generates for the City?
