ORDER WR 73-9

Source: Santa Ynez River

County: Santa Barbara

ORDER CONTINUING RESERVED JURISDICTION

Condition No. 13 of the Board's order in Decision 886 adopted on February 28, 1958 reserved continuing jurisdiction over permits issued pursuant to Applications 11331 and 11332 for 15 years or for such further time prior to issuance of license as the Board may determine upon notice and hearing to be reasonably necessary to determine the amounts, timing, and rates of release of water past Cachuma Dam which must be made in satisfaction of downstream rights. The reserved jurisdiction requires that the Board, prior to expiration of the 15-year trial period, hear, review, and make such further and different orders as may be required concerning proper releases of water for downstream use and recharge of groundwater, and concerning the investigations, measurements, and studies to be conducted by permittee.

Hearing in accordance with the reserved jurisdiction was held on January 26, 1973. The permittee and representatives of downstream water users and users of project water requested additional time to complete formulation of a proposed new

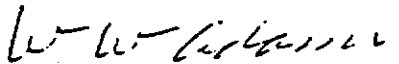

operating plan for releases past Cachuma Reservoir.

The Board finds that extension of the reserved jurisdiction with continuation of the present conditions concerning releases of water past Cachuma Reservoir and investigations, measurements, and studies to be conducted by the permittee is necessary for a limited time, pending negotiation of an agreement between the interested parties and/or further order of the Board.

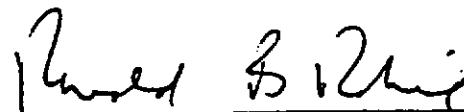

NOW, THEREFORE, IT IS ORDERED that the jurisdiction reserved in Condition No. 13 of Decision 886 is continued until further order of the Board, such further order to be made not later than October 1, 1973.

Adopted as the order of the State Water Resources Control Board at a meeting duly called and held at Sacramento, California.

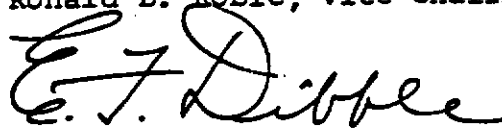

Dated: February 15, 1973
