Subj: water supply for the Carmel area

I am writing to urge you to make a fair and rational decision for the people who live and work in the Carmel area.
We have been and are presently the most efficient water consumption populous in the State of California.
Further rationing would create a severe economic impact on our area.
Please make a decision as if this were your home and business community.
Thank you.

G.A. Tarsitano
Carmel, Ca.
