

Monterey Peninsula Comparative Water Consumption in Selected Categories
Years Ended June 30, 1988 and 1999

	Year Ended June 30, 1988	% of total production	Year Ended June 30, 1999	% of total production	Water savings in acre feet	Water savings as % of YE 6-30-88 use	Category % reduction in use 1988 to 1999
	Water consumption in acre feet						
Residential	10,216	57.8%	8,080	56.3%	2,136	20.9%	0.26%
Hospitality (including golf)	3,189	18.0%	1,948	13.6%	1,241	38.9%	24.44%
Other Commercial	1,918	10.9%	1,564	10.9%	354	18.5%	0.00%
Total Commercial	5,107	28.9%	3,512	24.5%	1,595	31.2%	15.22%
Public Authorities	1,649	9.3%	1,130	7.9%	519	31.5%	15.05%
Notes:	The year ended June 30, 1988 was the last year of "normal" production and consumption before the drought of 1989 to 1991. Production and consumption in 1992 through 1995 remained at lower levels, probably as a result of conservation practiced during the drought.						
	For years 1996 and following production and consumption have been constrained by SWRCB Order 95-10.						

Prepared by Bob McKenzie for the Monterey County Hospitality Association and the Monterey Peninsula Chamber of Commerce from Cal-Aim and MPWMD data.
