SOURCE: California-American Water Company Monthly Production Reports.

NOTES:

1. "CV" refers to Carmel Valley; "CRB" refers to Carmel River Basin and includes both surface and subsurface water sources; "WY" refers to Water Year, which runs from October 1 through September 30 of the following calendar year; and "PCT" refers to the percentage of Cal-Am's total system production that is produced from a specific source.
2. The negative production values for Forest Lake Reservoir occur when water that was produced from other sources and stored in Forest Lake Reservoir during a previous month is released for use in the Cal-Am system. The production is represented as a negative value to avoid double counting. Forest Lake Reservoir was taken out of service by Cal-Am in June 1993.
