

**DIVISION OF WATER RIGHTS
FIELD REPORT**

Field Work Performed by: Sam Cole (WRCE) and Dave Labrie (SEA)

Date of Field Work: July 23, 2015

Target Address & Assessor Parcel Number (APN): U.S. Forest Route 1N04 (Cottonwood Road), Tuolumne County APN 052-060-48-00

Ownership: Sugar Pine Spring Water, LP (G. Scott Fahey)

Water Right(s): A029977 and A031491

Purpose of Field Work: Staff collected the SD cards that were used in the surveillance equipment that was deployed on July 12, 2015. Staff also put new batteries in the surveillance equipment. The video footage was briefly reviewed in the field to verify proper settings were used and proper positioning. After review of the footage, some trucks exiting before dawn indicated that there may be some night activity going on, and settings were changed to "Night" and the daylight only sensor was turned off in an effort to collect night images. The camera that was mounted in the tree has been removed as the data was not useful from this location. The other two camera locations remain in use. Installation of new SD cards and batteries will allow staff to continue surveillance of the location described above.

While on site, staff observed two tanker trucks apparently leaving the facility at approximately 12:00PM roughly 5 miles from the transfer station having just left. This truck was observed while staff were en route to the transfer station to maintain the surveillance equipment. While parked across from the site, a third tanker truck arrived at the transfer station at approximately 12:15PM. Staff visibly observed this truck directly entering the transfer station through the locked gate. At approximately 12:55PM, the tanker truck was directly observed leaving the transfer station through the locked gate. At approximately 1:06PM, another tanker truck was observed entering the station. Staff finished deploying surveillance equipment before this truck had left the transfer station.

See photographs 1-4 of water tanker trucks taken by Division staff, Samuel Cole, via hand held camera on the following pages.
