RESOLUTION OF CONCERN REGARDING THE EFFECT OF WATER TRANSFERS ON THE SALTON SEA

WHEREAS, the Coachella Valley Association of Governments (CVAG) has been an Ex Officio member of the Salton Sea Authority since its inception; and
WHEREAS, the Salton Sea is a valuable economic and recreational resource of the Coachella Valley receiving over 200,000 visitors per year at the State Parks alone; and
WHEREAS, the Salton Sea is among the most important bird resources in North America, with the greatest biodiversity of bird species in California and the second most in the Nation; and
WHEREAS, the Salton Sea will become more saline unless a plan for salinity control is implemented and its resources as we know them, will be lost; and
WHEREAS, CVAG understands the need and supports the implementation of the "California 4.4 Plan," which is designed to reduce California's use of Colorado River water in normal years to 4.4 MAF, without causing major economic and social impacts to the Coachella Valley, Palo Verde Valley, Coastal Southern California and California; and
WHEREAS, CVAG understands that the Quantification Settlement Agreement (QSA), which is the key element of the "California 4.4 Plan" provides the Coachella Valley with a firm water supply to resolve the overdraft of the groundwater basin and to allow for growth; and
WHEREAS, without the QSA and its water transfers to the Coachella Valley, development and water costs in the Coachella Valley will be impacted; and
WHEREAS, CVAG understands that the QSA is a time sensitive matter with an existing signature date of December 31, 2002 and that without agreement the Secretary of the Interior will limit California to 4.4 MAF which will reduce the supply to coastal Southern California or create water reallocations; and
WHEREAS, water transfers are a business arrangement between agencies to sell and buy water and are an essential component of the proposed "California 4.4 Plan" and the QSA; and
WHEREAS, in the recently released Imperial Irrigation District (IID) Water Conservation and Transfer Project Environmental Impact Report/Environmental Impact Statement on the water transfer of up to 200,000 acre-feet per year of water to the SDCWA and the transfer of 100,000 acre-feet to the Coachella Valley indicates that the transfer could significantly reduce flows to the Sea; and
WHEREAS, a major reduction of inflows to the Sea will likely lead to a reduction in sea elevation of up to 22 feet, potentially exposing over 100 square miles of seabed and diminish the vitality of the Sea; and
WHEREAS, a major reduction of inflows greatly accelerates salinity increases in the Sea; and
WHEREAS, with or without transfers, significant changes to habitat threaten bird biodiversity and abundance at the Salton Sea; and
WHEREAS, the aforementioned physical changes in the Sea could lead to significant air quality, biological, and economic impacts; and
WHEREAS, the Coachella Valley may soon be redesignated as a non-attainment area for Particulate Matter smaller than 10 microns (PM-10); and
WHEREAS, particulate matter contributions from exposed lake-bed might jeopardize the Coachella Valley's compliance efforts and lead to significant economic disruptions and health impacts; and
WHEREAS, major reductions of inflow will greatly increase the cost of restoring the Salton Sea and thereby risk making restoration financially and practically infeasible; and
WHEREAS, Congress and the California legislature have authorized studies of the Salton Sea and a plan approved by Congress and the California legislature does not exist for the restoration of the Salton Sea; and
WHEREAS, the IID Water Conservation and Transfer Project Environmental Impact Report/Environmental Impact Statement contains several options to develop the water for the transfers including the option of following land which would have less impact on the Salton Sea; and
WHEREAS, efforts are underway to relax environmental compliance laws to facilitate the water transfers; and
WHEREAS, CVAG acknowledges that the California "fully-protected species" laws may need to be updated to allow "take" provisions similar to the California Endangered Species Act; and
WHEREAS, for all of the above reasons it is prudent to proceed cautiously with those parts of the "California 4.4 Plan" which have serious economic and environmental impacts while continuing to proceed expeditiously with those parts of the Plan which are essential to meeting the California Colorado River Allotment; and
NOW, THEREFORE, BE IT RESOLVED by the Executive Committee of CVAG to oppose projects which significantly lower the level of the Salton Sea; and
BE IT FURTHER RESOLVED to support efforts by Congresswoman Mary Bono to ensure that the impacts of water transfers on the Salton Sea and the Coachella Valley are complying with environmental laws; and
BE IT FURTHER RESOLVED to urge the IID Board of Directors to pursue water transfer solutions which meet the terms of the QSA and do not create significant negative impacts on the Salton Sea; and
BE IT FURTHER RESOLVED to request each CVAG member agency to pass similar resolutions; and
BE IT FURTHER RESOLVED to support stringent reviews of any State and/or Federal legislation that relax environmental laws at the detriment of economic or environmental values of the Salton Sea or Coachella Valley; and
BE IT FINALLY RESOLVED that certified copies of this Resolution be sent to Senator Dianne Feinstein, Senator Barbara Boxer, Congresswoman Mary Bono and the rest of the Congressional Salton Sea Task Force, other appropriate members of Congress, the Secretary of the Interior, State Senator Jim Battin, Assemblyman Dave Kelley, State Senator Sheila Kuehl, other appropriate members of the State legislature, the California Resources Secretary, the Secretary of the Environmental Protection Agency, other appropriate State and Federal agencies, and the Salton Sea Authority.
