To the Members of the Board,

I understand that you will be voting on Feb. 16, concerning the water in the Kern River. I would ask you to vote favorably to allow us, if water is available, to have water flowing through Bakersfield once again.

I have lived here 25 years and I can count on one hand the number of times I have seen water in the river.

I hate to see the trees along the riverbed dieing from lack of water. Trees are a very precious asset to our otherwise desert land scape.

We could certainly use some beauty around us and I understand clearly the plus this would be to replenish the aquifers.

Please vote to allow us to have this much needed resource.

Sincerely,

*Audrey Lane*
