Hi Craig,

Thanks for checking in. We received comments as late as February 25th from stakeholders as well as recently receiving a Draft Regional Water Quality Control Board inspection report that we wanted to consider for our report. We are also currently working with DFW and NOAA to identify fishery concerns before we finalizing the report. This report is a high priority for the Division of Water Rights and there are a lot of moving pieces at the moment that we hope will come together soon and allow us to finish the report by the end of the month. This may be overly optimistic, but the end of month is our goal for the report.

How did your meeting with Mr. Cole go? Anything discussed that may be helpful to know?
