	s now 0 - if Water District has acquired filing,
	o Iull amount within several years.
I e	

Apparently the newly formed water district had been trying to acquire water rights to serve the area and the railroad company had ceased to use water under this right. The Division of Highways is constructing a new freeway through the area which runs roughly parallel to the old road, just north of the town of Cabazon. According to Mr Zimmer and Mrs Koger when the time came for the railroad to negotiate with the state for R/W for the highway - pipe intersection, the RR decided it did not want to be in the water business, and drew up a contract giving the Bistrict the water right.

Mr Zimmer took assignment forms, so that the Company can definitely clarify it's position before the Board. Mr Zimmer also agreed to furnish the Board with a copy of the agreement reached between the railroad and the District.

The District has retained Boyle Engineering of Santa Ana and San Diego as consultant, so much more detailed information should be available soon.

The law firm of Wilson, Hartzfeldt, Hartzfeldt, Jones and Morton of San Mateo has been retained to handle legal matters for the District.

Mrs Koger and Mr Higginbotham, a member of the Board of Directors of the District, stated that the District was formed because the Cabazon Water Company, which has been serving the area, does not have sufficient regulatory storage to meet peak demands.

There has almost surelybeen an extended period of no use under this filing. In view of the activities now commencing, it is recommended that action be witheld. If the anticipated assignment is received from the railroad, The Water District should be contacted regarding their specific plans.
