TRUCKEE-CARSON IRRIGATION DISTRICT
Fallon, Nev.

November 6, 1937

Hon. Edward Hyatt
State Engineer
Sacramento, California

Dear Sir:

Re applications 5169, 6534 and 6131.

I have your letter of November 2 and note that you consider my letter of October 26 as an outright withdrawal of the Truckee-Carson Irrigation District's protest against application No. 6534.

Please be advised that my letter of October 26 may be considered as applying also to application No. 5169, but only to the extent mentioned in said letter.

In order to make the record clear, we have no objection to the construction of the dam and reservoir now under contract by the United States at Boca. The use of this dam and reservoir is regulated by the terms of the Truckee River Agreement, but we only intend to withdraw our protests to the extent necessary to enable the Washoe County Water Conservation District to complete this construction and thereafter to operate the dam and reservoir in accordance with the Truckee River Agreement. We do not desire to withdraw these protests absolutely, as that might at some time in the future furnish an excuse for attempting to store additional water and such additional water would not be included in the Truckee-River Agreement and would be contrary to our interests.

No action is desired at this time in reference to application No. 6131.

Yours very truly,

Project Manager
