1 PROCEEDINGS

- VICE CHAIRPERSON WOLFF: Thank you for waiting.
- 3 I'm a few minutes late.
- 4 I'm going to read a few words here. This is the
- 5 time and place for the hearing regarding whether to issue
- 6 a cease and desist order in response to draft Cease and
- 7 Desist Order No. 262.31-14 and whether to impose
- 8 administrative liability as proposed in Administrative
- 9 Civil Liability Complaint No. 262.5-44 issued by the Chief
- 10 of the Division of Water Rights against the Vineyard Club,
- 11 Inc.
- 12 This hearing is being held in accordance with the
- 13 notice of a hearing dated February 7, 2007.
- 14 I'm Gary Wolff, Vice Chair of the State Water
- 15 Resources Control Board. I'll be assisted by Senior Staff
- 16 Counsel Barbara Katz and Water Resources Control Engineer
- 17 Jean McCue.
- 18 The purpose of this hearing is to afford the
- 19 Vineyard Club, Inc., and the Division of Water Rights
- 20 prosecution team an opportunity to present relevant oral
- 21 testimony and other evidence which address the following
- 22 key issues:
- 1. Should the State Water Board issue a cease
- 24 and desist order to the Vineyard Club in response to draft
- 25 CDO No. 262.31-14? If a cease and desist order should be

1 issued, what modifications, if any, should be made to the

- 2 measures in the draft order and what is the basis for such
- 3 modifications?
- 4 2. Should the State Water Board order liability
- 5 in response to Administrative Civil Liability Complaint
- 6 No. 262.5-44 against The Vineyard Club, Inc.? If the
- 7 State Water Board orders liability, should the amount be
- 8 increased or decreased; and if so, on what basis?
- 9 This hearing will be transcribed by James Peters
- 10 with Peters Shorthand Reporting Corporation. This is Mr.
- 11 Peters here. Persons who want a copy of the transcript
- 12 should order one directly from her or him. The transcript
- 13 will also be posted on our website no sooner than 60 days
- 14 after receipt of the transcript by the State Water Board.
- 15 Our order of proceeding in this hearing will be
- 16 first to provide an opportunity for persons who are not
- 17 presenting cases in chief to present non-evidentiary oral
- 18 policy statements. Next we'll receive testimony from the
- 19 Division of Water Rights prosecution team, followed by
- 20 cross-examination by vineyard club, Board staff and
- 21 myself. Following the prosecution team's testimony and
- 22 cross-examination, the Vineyard Club may present its
- 23 testimony and have its witnesses cross-examined. I will
- 24 allow relevant redirect and recross examination of all
- 25 witnesses. Finally, closing statements will be allowed.

The procedural rules including the time limits

- 2 set forth in the attachment of the notice of hearing will
- 3 be strictly enforced. The oral testimony given today
- 4 should be limited to summarizing the important points in
- 5 the written testimony.
- 6 Both parties have multiple witnesses, so I've
- 7 decided to do cross-examination as a panel. As set forth
- 8 in the rules of the hearing, cross-examination will be
- 9 limited to one hour per panel of witnesses.
- 10 For panel cross-examination each witness will
- 11 give his or her direct testimony before any witness is
- 12 cross-examined. The parties will make all of their
- 13 witnesses available as a panel for cross-examination.
- On cross-examining a panel, please identify the
- 15 specific witness to whom your question is directed. If
- 16 you are not sure to whom to direct a question, you may ask
- 17 the question generally of the panel. You may also direct
- 18 a question to more than one witness.
- 19 At this time I'd like to invite appearances by
- 20 the parties. Will those making appearances please state
- 21 your name, address, and whom you represent so that the
- 22 court reporter can enter this information into the record.
- Who is representing the Division of Water Rights
- 24 prosecutorial team?
- 25 STAFF COUNSEL BULLOCK: I am. My name is Matthew

1 Bullock. And my address is 1001 I Street here in the in

- 2 the Cal EPA building.
- 3 VICE CHAIRPERSON WOLFF: Thank you.
- 4 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 5 I'm Charles Lindsay at Division of Water Rights.
- 6 Address is here in this building, 1001 I Street.
- 7 SENIOR WATER RESOURCES CONTROL ENGINEER STRETARS:
- 8 Mark Stretars, Division of Water Rights, 1001 I
- 9 Street.
- 10 VICE CHAIRPERSON WOLFF: Can everyone hear, or do
- 11 we need people to approach the mike when they speak?
- 12 Okay. You got those though?
- 13 All right. In the future, please approach the
- 14 mike.
- 15 Who's representing the Vineyard Club?
- 16 Please come forward to the mike.
- 17 MR. KELLY: Good morning, Dr. Wolff. Daniel
- 18 Kelly with the firm of Somach, Simmons & Dunn, 813 6th
- 19 Street here in Sacramento, Third Floor.
- 20 MR. SCHUTZ: John Schutz, also for the Vineyard
- 21 Club, also with Somach, Simmons & Dunn, 813 6th Street,
- 22 Sacramento.
- VICE CHAIRPERSON WOLFF: I'm sorry. I didn't
- 24 catch your first name.
- MR. SCHUTZ: John.

- 1 VICE CHAIRPERSON WOLFF: John.
- 2 I'll now administer the oath. Will all those
- 3 persons wishing to testify during this proceeding please
- 4 stand and raise your right hand.
- 5 Do you promise to tell the truth in this
- 6 proceeding?
- 7 PROSPECTIVE WITNESSES: I do.
- 8 VICE CHAIRPERSON WOLFF: Thank you. You may be
- 9 seated.
- 10 Does anyone wish to make a non-evidentiary policy
- 11 statement?
- 12 Seeing none, we'll proceed to testimony of the
- 13 parties.
- 14 The prosecution team. You have an opening
- 15 statement?
- 16 STAFF COUNSEL BULLOCK: I'm going to keep this
- 17 really brief.
- 18 The Vineyard Club has a license from the State
- 19 Water Board. That license states that no water shall be
- 20 diverted under the license unless there is a measuring
- 21 device in place in Oak Flat Creek.
- 22 In 2005, the evidence will show that Mr. Lindsay
- 23 went out to the site, there was no measuring device in the
- 24 creek, and that the Vineyard Club was diverting and that
- 25 that diversion lasted for at least 60 days. Under Section

1 1052 of the Water Code, this is a trespass and is subject

- 2 to a \$500-a-day liability.
- 3 Thank you.
- 4 VICE CHAIRPERSON WOLFF: Cross-examination.
- 5 MR. KELLY: Oh, I thought you were going to do
- 6 opening statements from -- do you want to do --
- 7 VICE CHAIRPERSON WOLFF: My understanding was we
- 8 do opening statements and then presentation of witnesses
- 9 and then cross-examination. Do I understand that
- 10 incorrectly?
- 11 SENIOR STAFF COUNSEL KATZ: Yeah, typically we do
- 12 the whole case in chief.
- 13 MR. KELLY: Okay. I'll do my opening statement
- 14 then after cross-examination of prosecution team?
- 15 SENIOR STAFF COUNSEL KATZ: Yes.
- 16 MR. KELLY: Okay. Thank you.
- 17 VICE CHAIRPERSON WOLFF: You have witnesses to
- 18 present, yes?
- 19 STAFF COUNSEL BULLOCK: Yes.
- 20 DIRECT EXAMINATION
- 21 BY MR. MATTHEW BULLOCK, STAFF COUNSEL, representing the
- 22 Division of Water Rights:
- Good morning, Mr. Lindsay.
- 24 Could you please state your name and your place
- 25 of employment?

1 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:

- My name's Charles L. Lindsay. I'm also known as
- 3 Larry Lindsay. I work for the State Water Resources
- 4 Control Board in the Division of Water Rights. Currently
- 5 I'm the Chief of the Hearings Unit, but at the time of the
- 6 inspection I was working in the Enforcement Unit.
- 7 STAFF COUNSEL BULLOCK: Have you taken an oath in
- 8 this proceeding?
- 9 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 10 Yes, I have.
- 11 STAFF COUNSEL BULLOCK: And did you prepare the
- 12 statement of qualifications submitted as Prosecution Team
- 13 Exhibit WR-2?
- 14 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 15 Yes, I did.
- 16 STAFF COUNSEL BULLOCK: And is Exhibit 2 a true
- 17 and accurate statement of your qualifications?
- 18 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 19 Yes, it is.
- 20 STAFF COUNSEL BULLOCK: Did you also prepare the
- 21 written statement that is submitted as Prosecution Team
- 22 Exhibit WR-1?
- 23 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 24 Yes, I did.
- 25 STAFF COUNSEL BULLOCK: And are the statements in

1 Enforcement Team Exhibit 1 true and accurate to the best

- 2 of your knowledge?
- 3 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 4 Yes, they are.
- 5 STAFF COUNSEL BULLOCK: Could you briefly
- 6 describe the licensed project?
- 7 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 8 Yes. My first slide please.
- 9 This first slide you're going to see is an
- 10 extract from Water Right 8, page 7. It's the map attached
- 11 to the report. This is a blowup of the center of it.
- 12 Just to take a short trip here through the
- 13 project. The point of diversion that we're concerned with
- 14 is listed at the top of that map. It says, "Number 1
- 15 point of diversion to off-stream storage." And you can
- 16 see an arrow pointing to it. There's a pipeline that
- 17 begins right there, about a four-inch pipe that runs
- 18 down -- generally down the streambed, and then -- it's the
- 19 dashed line in the photograph -- I'm sorry -- in the
- 20 map -- and then it goes over to Vineyard Club Lake, which
- 21 is there in the center of the map and provides water into
- 22 the lake.
- Next slide please.
- 24 --00o--
- 25 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:

1 This is the point of diversion on the date I was

- 2 there. This is Water Right 8, page 9, the bottom
- 3 photograph.
- 4 I'd like to note also this point of diversion is
- 5 a remote location. It's quite a hike in there and
- 6 especially a hike out up the canyon.
- 7 As you see here, there's no measuring device in
- 8 place, and the diversion pipe is there and in place and
- 9 diverting.
- 10 Next slide please.
- 11 --000--
- 12 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- Water Right 8, page 9, the top photograph. Just
- 14 stepping back a bit from the point of diversion, kind of
- 15 an overall view.
- 16 Next photograph.
- 17 --00o--
- 18 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 19 This is Water Right 8, page 10, the top
- 20 photograph. Shows the section of the pipe as it comes
- 21 down this streambed headed towards the lake. It generally
- 22 meanders along with the streambed through the upper part
- 23 of it.
- Next photograph please.
- 25 --00o--

1 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:

- 2 And this is Water Right 8, page 13, top
- 3 photograph. And this is the diversion pipe as it goes
- 4 into the lake. And you can see there that water is coming
- 5 out of the end of the pipe.
- 6 STAFF COUNSEL BULLOCK: Could you please
- 7 summarize the relevant term of the Vineyard Club's license
- 8 that's the subject of the hearing today.
- 9 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 10 Yes. You see on this slide, this is an extract
- 11 of Water Right 7, page 2. I'm going to read it.
- 12 It says, "No water shall be diverted under this
- 13 license unless licensee has installed a device in Oak Flat
- 14 Creek satisfactory to the State Water Resources Control
- 15 Board, which is capable of measuring the flows required by
- 16 the conditions of this license. Said measuring device
- 17 shall be properly maintained."
- 18 STAFF COUNSEL BULLOCK: Why is the measuring
- 19 device term in the license?
- 20 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 21 Well, what got it started, the history of it,
- 22 when the Vineyard Club applied there was a protest lodged
- 23 by the Department of Fish and Game. And the resolution of
- 24 that protest was the inclusion of this term. It's
- 25 documented in State Water Resources Control Board Decision

- 1 1608, which is my -- which is Water Right Exhibit 20.
- Also, in Decision 1608 it states on page 5, in
- 3 the last paragraph, that Oak Flat Creek provides nursery
- 4 habitat for immature steelhead.
- 5 STAFF COUNSEL BULLOCK: And when was the license
- 6 issued?
- 7 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 8 March 26th, 1992.
- 9 STAFF COUNSEL BULLOCK: Was the Vineyard Club
- 10 informed of the inspection prior to the inspection
- 11 actually occurring?
- 12 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 13 Well, of course we made an appointment before I
- 14 showed up. It was probably about approximately a weak in
- 15 advance. I don't remember for sure. So I, you know,
- 16 didn't show up unannounced. But even prior to that, the
- 17 Division mailed a letter about six weeks earlier. That
- 18 letter's dated March 18th, 2005. And this is Water Right
- 19 Exhibit 21. The letter informed of the possibility of
- 20 inspections, suggested ways to prepare for the inspection,
- 21 and mentioned things we'd be looking for, including
- 22 measuring devices.
- 23 STAFF COUNSEL BULLOCK: So language was
- 24 specifically used about measuring devices?
- 25 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:

- 1 Yes, it was, in the letter.
- 2 STAFF COUNSEL BULLOCK: On the day of the
- 3 inspection on May 4th, 2005, was anyone with you?
- 4 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 5 Yes, Mr. Sagues.
- 6 STAFF COUNSEL BULLOCK: And did you give him any
- 7 paperwork when you arrived?
- 8 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 9 When we first met there at the picnic area, I
- 10 gave him a copy of the license.
- 11 STAFF COUNSEL BULLOCK: Was he familiar with the
- 12 license?
- 13 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 14 Didn't seem to be.
- 15 STAFF COUNSEL BULLOCK: What did you find at the
- 16 site?
- 17 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 18 Well, we went down to the point of diversion. As
- 19 I showed you, there was no measuring device or evidence
- 20 that one existed.
- 21 STAFF COUNSEL BULLOCK: Did you inform Mr. Sagues
- 22 of this fact?
- 23 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 24 Yes.
- 25 STAFF COUNSEL BULLOCK: Did you inform him that

- 1 this was a violation of his license?
- 2 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 3 Yes, I did.
- 4 STAFF COUNSEL BULLOCK: And did you ask Mr.
- 5 Sagues if there had ever been a measuring device while he
- 6 worked there?
- 7 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 8 Yes. And in this conversation, the exchanges we
- 9 had, I learned he'd been the manager for two years and
- 10 told me he had no knowledge of the measuring device.
- 11 STAFF COUNSEL BULLOCK: Did you attempt to
- 12 determine the bypass?
- 13 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 14 Yes, I did. I used a flume -- a Montana flume.
- 15 I was attempting to see if the bypass was being made at
- 16 that time since they -- they didn't have a device there.
- 17 And using the flume, I -- the Montana flume, you
- 18 try to get as much of the stream flow through the flume as
- 19 possible. I wasn't able to get all of it, as I discussed
- 20 in my report. I estimate that I had about .13 cfs going
- 21 through the flume is what I measured. And it looked to me
- 22 like about 50 percent of the stream flow was going through
- 23 the flume.
- 24 STAFF COUNSEL BULLOCK: Did you tell Mr. Sagues
- 25 that enforcement might occur?

1 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:

- 2 Yes, I did.
- 3 STAFF COUNSEL BULLOCK: And did you make him any
- 4 promises in any way?
- 5 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 6 No, no, not as -- when I informed him of the
- 7 violation, I was very careful with what I said. It was at
- 8 the end of the inspection. We sat down in my vehicle. I
- 9 remember it was raining outside. And we talked about
- 10 this. And I made sure he realized the term in the license
- 11 we were talking about. I told him that they were in
- 12 violation at that time. And I told him about what an
- 13 Administrative Civil Liability was, that essentially it's
- 14 a fine, that they were potentially subject to that. But
- 15 I -- it was not up to me whether it was going to be issued
- 16 or not. And I made no promises, you know, if they were to
- 17 do something, you know, maybe -- I just said it was a
- 18 possibility and they were in violation.
- 19 STAFF COUNSEL BULLOCK: Did you tell Mr. Saques
- 20 that he could continue diversion in violation of the
- 21 license?
- 22 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- No, absolutely not.
- 24 STAFF COUNSEL BULLOCK: Did you make any
- 25 suggestions about how the Vineyard Club should proceed?

1 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:

- Yes, I made it clear they should hire a civil
- 3 engineer and get on with getting a measuring device
- 4 installed.
- 5 STAFF COUNSEL BULLOCK: Does the Division usually
- 6 help to design measuring devices?
- 7 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- No, we do not.
- 9 STAFF COUNSEL BULLOCK: And in your experience,
- 10 do most people hire an engineer to design one?
- 11 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 12 Yes, they do.
- 13 STAFF COUNSEL BULLOCK: When was the last time
- 14 that you feel confident that there was a measuring device
- 15 actually installed?
- 16 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- Well, our review of the water right file shows a
- 18 photograph of one that went in about the time of
- 19 licensing. That would be about 13 years prior to the
- 20 inspection, in 1992.
- 21 STAFF COUNSEL BULLOCK: What period of time was
- 22 taken into consideration in setting the maximum liability?
- 23 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 24 The 60 days of the season that -- again, speaking
- 25 with Mr. Sagues, I understood that generally that

- 1 diversion was in for two months. And taking into account
- 2 the season that I was there and saw, at least on that one
- 3 day, it was 60 days, the two months.
- 4 STAFF COUNSEL BULLOCK: And was any additional
- 5 period taken into consideration as a factor when you were
- 6 setting the \$4100 amount?
- 7 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 8 Well, Mr. Sagues did say that he'd been manager
- 9 for two years. And I could make the -- I would make the
- 10 assumption there that it probably -- since he didn't have
- 11 any knowledge of it, that it probably had been two seasons
- 12 that the measuring device had not been installed.
- 13 MR. KELLY: Your Honor, I'm going to object to
- 14 that response as speculative. I think that Mr. Lindsay
- 15 just said that he just assumed that had occurred the prior
- 16 year. So I would object to that as Mr. Lindsay
- 17 speculating now on violations that there's no evidence of.
- 18 VICE CHAIRPERSON WOLFF: Repeat the question and
- 19 repeat the answer. Attempt to avoid any speculation.
- 20 STAFF COUNSEL BULLOCK: The question was: Was
- 21 there any additional period of time considered as a factor
- 22 when setting the complaint amount?
- 23 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 24 Yes, the year prior. Mr. Sagues had told me that
- 25 he'd been the manager for two years and he had no

- 1 knowledge of the measuring device.
- VICE CHAIRPERSON WOLFF: Is that satisfactory,
- 3 Mr. Kelly?
- 4 MR. KELLY: Yes, thank you. Thank you, Dr.
- 5 Wolff.
- 6 STAFF COUNSEL BULLOCK: Do you believe that \$4100
- 7 was a reasonable amount of liability based on those facts?
- 8 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 9 No. It would have been higher, but we set it low
- 10 in an attempt to settle without a hearing. And this is
- 11 discussed in the ACL, Water Right 6, page 3, paragraph 8.
- 12 STAFF COUNSEL BULLOCK: Is there any additional
- 13 period of noncompliance that was not considered in the
- 14 \$4100 amount but that was determined after the complaint
- 15 was issued in recommending an increase?
- 16 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 17 Well, yes. Looking through the file, there's --
- 18 when an engineer went out to -- or when staff went out to
- 19 do a pre-license inspection, there was no evidence of a
- 20 measuring device in place. The permit had this same term,
- 21 and the permit had been placed for about five years. And
- 22 there's no measuring device when we go show up to do the
- 23 license inspection, no knowledge of it. And so looking at
- 24 the history, yes, there are other factors in increasing
- 25 the liability above the 4100.

- 1 STAFF COUNSEL BULLOCK: Now, after the
- 2 inspection, did you continue communications with the
- 3 Vineyard Club?
- 4 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 5 Yes, I did. Between the time of the inspection
- 6 and the issuance of the ACL, there were some phone calls
- 7 and E-mails between us.
- 8 On August 16th, 2005, I had a phone conversation
- 9 with Mr. Sagues -- that's documented in a contact report,
- 10 my Water Right 9 -- which I reiterated the points I made
- 11 at the inspection, that they were in violation and that
- 12 they needed to get on with installing the measuring
- 13 device.
- 14 He also asked for a copy of the license, and I
- 15 faxed him one.
- 16 Also, I've seen in Vineyard Club Exhibit 8 that
- 17 apparently Mr. Sagues and I spoke and exchanged E-mail on
- 18 March 29th, 2006. According to that E-mail I called him.
- 19 I really don't remember the details of that conversation,
- 20 but one did occur. I've read the Vineyard Club 8. It
- 21 indicates to me that the Vineyard Club was proceeding to
- 22 obtain an engineer and certainly understood what they
- 23 needed to do.
- 24 After the ACL was issued I received an E-mail
- 25 from Mr. Sagues -- it's Water Right 10 -- and he was

1 looking for help in resolving the issue without paying.

- 2 STAFF COUNSEL BULLOCK: And did you stop
- 3 communications with the Vineyard Club at some point?
- 4 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 5 Yes. See, that would be an E-mail that I sent on
- 6 January 11th. Prior to that time, Mr. Sandell had become
- 7 the contact. And we'd gone back and forth on some design
- 8 issues. They were -- after the ACL was issued they
- 9 started attempting to design a measuring device and were
- 10 looking to us for some advice on it. And he presented
- 11 some equations, and I would give him, you know, my
- 12 thoughts on it. I made some corrections to his equation.
- 13 He'd give me something back. It wouldn't be completely
- 14 right based on what I'd told him. So we went back and
- 15 forth several times.
- 16 And then finally in this Water -- it was January
- 17 11th -- I think this is Water Right 18, I stated that he
- 18 was still failing to address some of the required design
- 19 elements, like how the vineyard -- how the measuring
- 20 device should be anchored, the shape of the orifice, an
- 21 operations plan, things like that. And I said he was
- 22 beginning to cross the line from -- or I was beginning to
- 23 cross the line from helping them to actually beginning to
- 24 design the project for them.
- 25 STAFF COUNSEL BULLOCK: What, beyond what the

- 1 Vineyard Club had presented to you and has presented to
- 2 this point, do you feel is necessary to get an acceptable
- 3 measuring device installed in Oak Flat Creek?
- 4 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 5 Well, it should be durable. It needs to be
- 6 approved by Fish and Game, with a streambed alteration
- 7 agreement. And we need a schedule of compliance.
- 8 STAFF COUNSEL BULLOCK: You said durable. Does
- 9 that mean that --
- 10 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- Well, the previous one there's evidence of in the
- 12 file that was installed about the time of licensing
- 13 appears to me to be wood, and it's gone. So something
- 14 happened to it. That design was not adequate.
- 15 STAFF COUNSEL BULLOCK: And they have not
- 16 addressed the material at this point?
- 17 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 18 No.
- 19 STAFF COUNSEL BULLOCK: Why do you feel that a
- 20 schedule of compliance is necessary?
- 21 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 22 Well, two years has gone by and Vineyard Club
- 23 still, despite the fact on the day of the inspection --
- 24 despite the fact that it was in their permit, despite the
- 25 fact that it was in their license, they still have not put

1 in a measuring device and seem unable to maintain one. So

- 2 we need to put them on a schedule with a cease and desist
- 3 order.
- 4 STAFF COUNSEL BULLOCK: So in your opinion should
- 5 the Board issue a CDO, a cease and desist order?
- 6 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 7 Yes, we should.
- 8 STAFF COUNSEL BULLOCK: Okay. Thank you.
- 9 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 10 The Board should.
- 11 STAFF COUNSEL BULLOCK: I'd like to talk for a
- 12 few minutes with Mr. Stretars.
- 13 SENIOR WATER RESOURCES CONTROL ENGINEER STRETARS:
- 14 Is this mike live? Okay.
- 15 STAFF COUNSEL BULLOCK: Could you please state
- 16 your name and place of employment.
- 17 SENIOR WATER RESOURCES CONTROL ENGINEER STRETARS:
- 18 My name is Mark Stretars. I'm a senior water
- 19 resources control engineer --
- 20 VICE CHAIRPERSON WOLFF: Your mike is not on.
- 21 SENIOR WATER RESOURCES CONTROL ENGINEER STRETARS:
- 22 Oh, I'm sorry. I thought -- I must have touched something
- 23 to shut it off. I'm sorry.
- 24 My name is Mark Stretars. I'm a senior water
- 25 resources control engineer with the Division of Water

- 1 Rights of the State Water Resources Control Board.
- 2 STAFF COUNSEL BULLOCK: Have you taken an oath in
- 3 this proceeding?
- 4 SENIOR WATER RESOURCES CONTROL ENGINEER STRETARS:
- 5 Yes, I have.
- 6 STAFF COUNSEL BULLOCK: Did you prepare the
- 7 statement of qualifications that is submitted as
- 8 Prosecution Team Exhibit WR-4?
- 9 SENIOR WATER RESOURCES CONTROL ENGINEER STRETARS:
- 10 I did.
- 11 STAFF COUNSEL BULLOCK: Is Exhibit 4 a true and
- 12 accurate statement of your qualifications?
- 13 SENIOR WATER RESOURCES CONTROL ENGINEER STRETARS:
- 14 It is.
- 15 STAFF COUNSEL BULLOCK: Did you also prepare the
- 16 written statement that is submitted as Prosecution Team
- 17 Exhibit WR-3?
- 18 SENIOR WATER RESOURCES CONTROL ENGINEER STRETARS:
- 19 I did.
- 20 STAFF COUNSEL BULLOCK: Are the statements in
- 21 Enforcement Team Exhibit 3 true and accurate to the best
- 22 of your knowledge?
- 23 SENIOR WATER RESOURCES CONTROL ENGINEER STRETARS:
- 24 They are.
- 25 STAFF COUNSEL BULLOCK: Mr. Stretars, what is the

- 1 legal basis for the ACL?
- 2 SENIOR WATER RESOURCES CONTROL ENGINEER STRETARS:
- 3 The legal basis is Water Code Section 1052.
- 4 STAFF COUNSEL BULLOCK: Of the Water Code?
- 5 SENIOR WATER RESOURCES CONTROL ENGINEER STRETARS:
- 6 Of the Water Code, yes.
- 7 STAFF COUNSEL BULLOCK: And what is the factual
- 8 basis?
- 9 SENIOR WATER RESOURCES CONTROL ENGINEER STRETARS:
- 10 The factual basis is that the ACL was issued for
- 11 the diversion of water from Oak Flat Creek in violation of
- 12 the Vineyard Club's license, which specific states no
- 13 water shall be diverted without a measuring device.
- 14 At the time Mr. Lindsay was out there they did
- 15 not have a measuring device installed and they were
- 16 diverting water.
- 17 STAFF COUNSEL BULLOCK: How was the maximum
- 18 liability calculated?
- 19 SENIOR WATER RESOURCES CONTROL ENGINEER STRETARS:
- 20 The maximum liability was calculated based on two
- 21 factors: Section 1052 of the Water Code provides that the
- 22 Board may impose a liability of up to \$500 per day. And,
- 23 secondly, it was based on at least 60 days of violation
- 24 based on the statements of Mr. Sagues as noted by Mr.
- 25 Lindsay.

- STAFF COUNSEL BULLOCK: And so those 60 days,
- 2 that was based on how many seasons of diversion?
- 3 SENIOR WATER RESOURCES CONTROL ENGINEER STRETARS:
- 4 It was the season of the inspection, 2005, 60
- 5 days.
- 6 STAFF COUNSEL BULLOCK: What was the maximum
- 7 liability that was calculated?
- 8 SENIOR WATER RESOURCES CONTROL ENGINEER STRETARS:
- 9 Based on those parameters, the maximum liability
- 10 was calculated at \$30,000.
- 11 STAFF COUNSEL BULLOCK: And what was the
- 12 recommendation of the Division at the time the complaint
- 13 was issued?
- 14 SENIOR WATER RESOURCES CONTROL ENGINEER STRETARS:
- The recommendation was \$4100.
- 16 STAFF COUNSEL BULLOCK: In recommending \$4100,
- 17 what factors did you take into consideration?
- 18 SENIOR WATER RESOURCES CONTROL ENGINEER STRETARS:
- 19 We used the factors identified in Code Section --
- 20 Water Code Section 1055.3, which relate to the harm caused
- 21 by the violation, the nature and persistence of the
- 22 violation, the length of time of the violation, and
- 23 whether any corrective actions have been taken by the
- 24 violator.
- 25 STAFF COUNSEL BULLOCK: What was some of the harm

- 1 that you see as being caused by the violation?
- 2 SENIOR WATER RESOURCES CONTROL ENGINEER STRETARS:
- 3 We were looking at less water to downstream
- 4 users. As Mr. Lindsay indicated, there's also endangered
- 5 steelhead in the system. I believe that was Water Right
- 6 20, which is the decision that identified that parameter.
- 7 STAFF COUNSEL BULLOCK: And you mentioned
- 8 corrective actions. Were there any corrective actions
- 9 that were considered?
- 10 SENIOR WATER RESOURCES CONTROL ENGINEER STRETARS:
- 11 Yes, there was. In the season of 2006, the
- 12 Vineyard Club called and informed us that they were not
- 13 going to divert that year at that source.
- 14 STAFF COUNSEL BULLOCK: Okay. Now, 1055.3, as
- 15 you mentioned, allows for consideration of other factors.
- 16 Were other factors considered?
- 17 SENIOR WATER RESOURCES CONTROL ENGINEER STRETARS:
- There was some consideration of other factors,
- 19 including an economic advantage, which basically goes to
- 20 the foregoing, the cost of building, installing and
- 21 maintaining a measuring device or purchasing or pumping
- 22 the water that was offsetting through the operation of
- 23 that diversion. We also looked at staff cost.
- 24 STAFF COUNSEL BULLOCK: Okay. And were other
- 25 factors used as to discount the amount of the liability?

1 SENIOR WATER RESOURCES CONTROL ENGINEER STRETARS:

- Yes, we did discount the liability, basically to
- 3 achieve a settlement with the licensee, to try to
- 4 streamline the enforcement process, and to avoid the cost
- 5 of a hearing.
- 6 STAFF COUNSEL BULLOCK: And have you changed your
- 7 recommendation since the time of the issuance of the
- 8 complaints?
- 9 SENIOR WATER RESOURCES CONTROL ENGINEER STRETARS:
- 10 I have.
- 11 STAFF COUNSEL BULLOCK: And why has your
- 12 recommendation changed since issuing the complaint?
- 13 SENIOR WATER RESOURCES CONTROL ENGINEER STRETARS:
- 14 A little more deep review of the file -- of the
- 15 history of the file basically shows there's a history of
- 16 noncompliance, that at that point in time we had
- 17 discounted basically to achieve the settlement, and that
- 18 we believe at this point in time our case is stronger now
- 19 than when the liability was set at \$4100.
- 20 STAFF COUNSEL BULLOCK: Thank you, Mr. Stretars.
- 21 That's all I have for these witnesses.
- 22 VICE CHAIRPERSON WOLFF: Thank you.
- 23 Cross-examination, Mr. Kelly?
- 24 MR. KELLY: Thank you, Dr. Wolff.
- 25 //////

1 CROSS-EXAMINAT	JATION		1
------------------	--------	--	---

- 2 BY MR. DANIEL KELLY, ESQ., representing The Vineyard Club,
- 3 Inc.:
- 4 Good morning, Mr. Lindsay, Mr. Stretars.
- 5 Mr. Lindsay, I have a few questions for you.
- 6 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 7 Okay.
- 8 MR. KELLY: In your testimony, on page 1, you say
- 9 that your testimony is based upon your personal knowledge
- 10 of the evidence and actions. I believe you said the
- 11 Division's enforcement action.
- 13 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 14 You're talking about page 1 of Water Right 1?
- 15 MR. KELLY: That's correct.
- 16 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 17 Where are we talking about here?
- 18 MR. KELLY: Second paragraph, second sentence.
- 19 It says, "My testimony addresses the hearing issues and
- 20 identifies my personal knowledge of the evidence and
- 21 actions."
- 22 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 23 That's my testimony.
- 24 MR. KELLY: That's a correct statement?
- 25 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:

- 1 Yes.
- MR. KELLY: I'd like you to direct your attention
- 3 to WR-1, page 3 of your testimony. The first full
- 4 sentence.
- 5 Can you read that sentence for me beginning with
- 6 "However".
- 7 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 8 "However, The Vineyard Club had been violating
- 9 the permit term and diverting illegally likely -- likely
- 10 since the permit was issued, a period of about four
- 11 years."
- 12 MR. KELLY: Is that based upon your personal
- 13 knowledge?
- 14 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 15 It's based upon my review of the file.
- MR. KELLY: Is that an assumption that you're
- 17 making, that they had been likely diverting illegally?
- 18 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 19 It's a conclusion.
- 20 MR. KELLY: Do you have personal knowledge of it
- 21 or are you assuming that they're diverting illegally for
- 22 years?
- 23 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 24 I'm concluding that from reviewing the file.
- 25 MR. KELLY: Is it based upon your personal

- 1 knowledge of the evidence?
- 2 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 3 It's based upon my knowledge of the file.
- 4 MR. KELLY: Your Honor, I'd ask the witness to
- 5 answer the question I posed as to whether or not this is
- 6 based upon his personal knowledge and not upon any
- 7 speculation that they had been alleged to be diverting
- 8 illegally likely since the permit was issued.
- 9 VICE CHAIRPERSON WOLFF: The statement in
- 10 question is an opinion of the witness and I believe his
- 11 answer was adequate.
- 12 MR. KELLY: Okay.
- 13 All right. A little bit further down in that
- 14 paragraph, I believe it's the second to the -- I'm
- 15 sorry -- the third to the last sentence.
- 16 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 17 Are we talking about "sometime after the issuance
- 18 of the license"?
- MR. KELLY: And then you go on to say, "the
- 20 reason is unknown," and then the following sentence
- 21 beginning with "it".
- 22 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 23 Referring to the measuring device. It may have
- 24 been damaged or simply deteriorated and was never
- 25 replaced.

1 MR. KELLY: Do you have any personal knowledge of

- 2 what happened to the measuring device?
- 3 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 4 No, I --
- 5 STAFF COUNSEL BULLOCK: I would object to this.
- 6 This is irrelevant. The point is that it wasn't there.
- 7 He's not making any sort of a statement about why it
- 8 wasn't there. The point of his testimony was it's not
- 9 there. It's not relevant.
- 10 VICE CHAIRPERSON WOLFF: Mr. Kelly, what is the
- 11 relevance of this line of questioning?
- MR. KELLY: Dr. Wolff, it's the Vineyard Club's
- 13 position that a lot of the testimony in the file here
- 14 is -- in the record is based on speculation. And there
- 15 are a lot of allegations made in here with regard to my
- 16 clients that suggest that they're bad actors. And I think
- 17 that I should have the opportunity to ask whether or not
- 18 the allegations and the statements that Mr. Lindsay makes
- 19 in this testimony are actually based upon his knowledge,
- 20 as he testified to, or whether or not he's speculating
- 21 about all this testimony. I think it's absolutely
- 22 relevant because it goes to whether or not his testimony
- 23 is reliable, accurate, and accurately depicts what the
- 24 evidence is in this case.
- 25 STAFF COUNSEL BULLOCK: Dr. Wolff, the testimony

1 very clearly states that the reason is not known. We're

- 2 not making any suggestion that we do know the reason.
- 3 We're simply stating that it's not there.
- 4 VICE CHAIRPERSON WOLFF: Just a moment.
- 5 The sentence in question is? Refer me back to
- 6 it. Mr. Kelly, you were inquiring about which sentence?
- 7 MR. KELLY: It is the third to the last in that
- 8 top paragraph on page 3. It reads, "It may have been
- 9 damaged or simply deteriorated."
- 10 VICE CHAIRPERSON WOLFF: It's not on the screen
- 11 before me.
- 12 Here we go. We're scrolling to it. That's why I
- 13 couldn't find it.
- 14 Third to the last sentence, "It may have been
- 15 damaged or deteriorated"?
- 16 MR. KELLY: That's correct.
- 17 VICE CHAIRPERSON WOLFF: "We do not" -- or "we do
- 18 know" --
- 19 SENIOR STAFF COUNSEL KATZ: It says, "The reason
- 20 is unknown" before that.
- 21 VICE CHAIRPERSON WOLFF: Well, the statement is
- 22 clearly a statement of possibility. It is a speculative
- 23 statement. I'm not sure what your objection to it is
- 24 though. Your objection is that -- is it only -- the
- 25 statements here should only be based on the personal

- 1 knowledge of the witness?
- 2 MR. KELLY: Well, Dr. Wolff, that's what he
- 3 testified to on the first page. And then when I read his
- 4 testimony, he is testifying under oath that all this
- 5 evidence in his testimony is based upon his personal
- 6 knowledge.
- 7 VICE CHAIRPERSON WOLFF: And how do you define
- 8 personal knowledge?
- 9 MR. KELLY: Well, it at least has to be that you
- 10 are aware that that is the case. If he testifies that
- 11 it's based upon his personal knowledge and then says he
- 12 doesn't know the reason but it may be some other reason,
- 13 that's not based upon personal knowledge. I mean by
- 14 definition it's not based upon personal knowledge.
- 15 VICE CHAIRPERSON WOLFF: Well, you're speaking to
- 16 personal experience. You know, personal experience he
- 17 can't -- you know, can't speak to something not being
- 18 there unless he has some personal experience with it. But
- 19 his personal knowledge is a much more fuzzy concept, and
- 20 I'm not clear quite where you're going with this.
- 21 I think you're attempting to make the point that
- 22 there are speculative comments in Mr. Lindsay's testimony,
- 23 and I'm willing to accept that point.
- MR. KELLY: Thank you, Dr. Wolff. That's fine.
- 25 VICE CHAIRPERSON WOLFF: That's fine.

1 MR. KELLY: Okay. Then go down to the second

- 2 full paragraph on that same page, the last sentence.
- 3 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 4 Oh, okay.
- 5 MR. KELLY: You say the last definitive proof is
- 6 13 years prior to the inspection that there was a
- 7 measuring device?
- 8 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 9 Yes, I see where you're talking about.
- 10 MR. KELLY: Is that simply the last time that the
- 11 Division was able to verify that there was a device there?
- 12 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 13 What I base that statement on was a review of the
- 14 file where there was the photograph of the device that was
- 15 sent to the Division right about the time of licensing.
- 16 That's what that's based on.
- 17 MR. KELLY: Okay. But you don't know whether or
- 18 not in 2001 there was a measuring device there?
- 19 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 20 In 2001?
- 21 MR. KELLY: Correct.
- 22 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 23 No.
- 24 MR. KELLY: You don't know whether in 2002 or
- 25 2003 whether there was a measuring device there? You

- 1 can't definitively say that there was not, correct?
- 2 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 3 I know that we have evidence of one in 1992 and
- 4 then I went out in 2005. Somewhere between those two
- 5 times it disappeared.
- 6 MR. KELLY: Could have been January of '05,
- 7 couldn't it have been?
- 8 STAFF COUNSEL BULLOCK: Objection. Mr. Kelly is
- 9 now asking for speculation from the witness.
- 10 VICE CHAIRPERSON WOLFF: Very well made.
- 11 Mr. Kelly, can we return to the sentence you're
- 12 asking about. I want to be clear.
- 13 Scroll the screen to where we were.
- 14 Was it the last sentence?
- 15 MR. KELLY: It is -- it's down -- it is the last
- 16 sentence in the last full paragraph on the screen there.
- 17 It begins "Therefore" -- now it's up -- it's the last --
- 18 VICE CHAIRPERSON WOLFF: "Therefore the last
- 19 definitive proof in Division records," dah, dah, dah, "is
- 20 that it's 13 years from my inspection"?
- 21 MR. KELLY: Right.
- 22 VICE CHAIRPERSON WOLFF: Well, now that sentence
- 23 is very clear. And I appreciate your point that there are
- 24 some speculative comments in the testimony from Mr.
- 25 Lindsay, and I've taken that under submission. I

1 understand that. But this sentence is a statement about,

- 2 you know, what is in the division records which Mr.
- 3 Lindsay does have personal experience with. So, you know,
- 4 I caution you as you proceed that you've made that point
- 5 and there's no need to continue to attempt to make that
- 6 point.
- 7 MR. KELLY: I appreciate that, Dr. Wolff, and
- 8 thank you. And the reason I ask that is because that is
- 9 apparently a consideration that went into the formulation
- 10 of the amount of the fine that they propose, was
- 11 consideration of all these factors. So I just want to be
- 12 clear that it's on the record that there's no evidence
- 13 that there was not a device in the years preceding the
- 14 inspection, that's all.
- 15 So I appreciate the admonition.
- 16 VICE CHAIRPERSON WOLFF: Accepted.
- 17 Continue.
- 18 MR. KELLY: I'd like to go down -- okay. Well,
- 19 let me -- if you'd go down a little on that same page, you
- 20 say, "The Vineyard Club apparently ignored the letter
- 21 dated March 18th." You don't know whether they ignored it
- 22 or just didn't get it, correct?
- 23 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 24 I asked Mr. Sagues if he was aware of the letter,
- 25 and he said no.

1 MR. KELLY: Okay. Mr. Lindsay, does the Vineyard

- 2 Club have a valid water right?
- 3 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 4 They have a water right license with the state,
- 5 yes.
- 6 MR. KELLY: Okay. Okay. Does every violation of
- 7 a condition in a water right license result in a trespass
- 8 against the state under Section -- Water Code Section
- 9 1052?
- 10 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- Well, we're going to some legal issues here.
- 12 STAFF COUNSEL BULLOCK: Objection. Yeah, I'm
- 13 going to object that he's asking for a legal conclusion.
- 14 VICE CHAIRPERSON WOLFF: Sustained.
- MR. KELLY: Mr. Lindsay, who drafted the
- 16 Administrative Civil Liability complaint?
- 17 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 18 I did.
- MR. KELLY: And who made the determination to
- 20 actually draft the complaint?
- 21 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- Oh, my supervisor.
- MR. KELLY: And when you drafted the complaint,
- 24 did you consider whether or not the violating a permit
- 25 term or condition -- or a term or condition of a license

- 1 was a trespass?
- 2 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 3 Yes, I believed in this case it was.
- 4 MR. KELLY: Why did you believe in this case it
- 5 was?
- 6 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 7 Because the term says no water shall be diverted,
- 8 making it an illegal diversion -- an unauthorized
- 9 diversion
- 10 MR. KELLY: Okay. What makes in your opinion,
- 11 and in your position with the State Water Board, what
- 12 turns a condition in a license to something that would
- 13 rise to the level of a trespass against the state?
- 14 STAFF COUNSEL BULLOCK: I'm going to object here.
- 15 This is asking for a legal conclusion. If Mr. Kelly would
- 16 like to present legal --
- 17 VICE CHAIRPERSON WOLFF: Sustained.
- 18 Mr. Kelly, you may ask questions about this case
- 19 but not general questions about the law.
- 20 MR. KELLY: Mr. Lindsay, can you look at the
- 21 water right license at issue in this proceeding please.
- 22 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 23 Yes.
- 24 Let's see, I think we're looking at Water Right
- 25 7.

- 1 MR. KELLY: That's correct.
- Where do the conditions begin in this water right
- 3 license?
- 4 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 5 Well, the terms and conditions really run
- 6 throughout the license.
- 7 MR. KELLY: Okay. Let's --
- 8 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 9 I mean they start right there, you know,
- 10 identifying the purpose of use, how much is diverted,
- 11 maximum rate of diversion, diversion points. And it goes
- 12 on to the second page where there's some additional terms
- 13 and conditions.
- 14 MR. KELLY: Okay. If I could just stop you there
- 15 for a second.
- 16 That first condition, the maximum rate of
- 17 diversion for off-stream storage should not exceed .25
- 18 cfs.
- 19 Correct.
- MR. KELLY: If they're diverting more than that,
- 21 is that a trespass?
- 22 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 23 Yes.
- 24 MR. KELLY: Where's the language that would
- 25 solidify your opinion that that would be a trespass as

- 1 compared to other conditions?
- 2 STAFF COUNSEL BULLOCK: Objection. Again, Mr.
- 3 Kelly is asking for a legal analysis from a party that's
- 4 not an attorney.
- 5 VICE CHAIRPERSON WOLFF: Well, this is a bit more
- 6 difficult. The prosecution team has brought an action
- 7 which claims that a trespass occurred. I'm not sure who
- 8 in the prosecution team made that determination. You as
- 9 an attorney, Mr. Bullock?
- 10 STAFF COUNSEL BULLOCK: No, it was not me. But,
- 11 again, if we're going to discuss the legal -- you know,
- 12 what the statutes mean, I don't think that this is the
- 13 appropriate forum. We should be discussing it between the
- 14 attorneys.
- 15 VICE CHAIRPERSON WOLFF: Well, it's certainly
- 16 true that we should be considering evidence today. It's
- 17 an evidentiary record. It's not the proper forum to be
- 18 arguing legal matters. You know -- and I'm not certain
- 19 what this witness's opinion on this legal point -- you
- 20 know, what the relevance of that is.
- 21 So, Mr. Kelly, what is the relevance of Mr.
- 22 Lindsay's opinion? Suppose he were completely erroneous
- 23 with respect to the law and you were to show that through
- 24 cross-examination; what difference would that make?
- MR. KELLY: If he's completely erroneous on the

1 law, then the ACL's baseless, then it has no basis in the

- 2 law.
- 3 VICE CHAIRPERSON WOLFF: That's not at all true.
- 4 I mean the law is the law regardless of the individual
- 5 people's opinions about them.
- 6 And we're going to have to make some
- 7 determinations about what we believe the law says, and I
- 8 as a hearing officer will have to make some recommendation
- 9 to the Board.
- 10 Mr. Lindsay's opinion is just a bit of evidence
- 11 in that. And I'm not clear what the relevance is of his
- 12 opinion about what constitutes a trespass.
- 13 MR. KELLY: Well, the relevance is -- permit
- 14 terms and conditions contain differing language, and
- 15 they're all worded different. And these witnesses
- 16 testified about the legal basis -- already on direct
- 17 testimony they've testified about the legal basis for this
- 18 administrative civil liability complaint being a trespass
- 19 against the State. And my client would like to know,
- 20 frankly, what differs -- we've already provided the
- 21 hearing team briefing, that we don't believe that the
- 22 State Water Board has jurisdiction based upon the
- 23 statutes, the regulations, State Water Board interpretive
- 24 guidance, court cases to issue an Administrative Civil
- 25 Liability complaint for violating a condition in a term or

1 a license. And the prosecution team has essentially said

- 2 that's a red herring. And I think it's a real issue and
- 3 its a very serious issue. And, you know --
- 4 VICE CHAIRPERSON WOLFF: I've taken that issue
- 5 under submission. But in this case, what is the relevance
- 6 of the witness's testimony? For example, you asked him if
- 7 a particular condition, the maximum rate of diversion to
- 8 off-stream source shall not exceed .25 cubic foot per
- 9 second, you asked him does violating that constitute a
- 10 trespass in his opinion. That's a specific question where
- 11 his opinion may be relevant. If you have other specific
- 12 questions like that, that's fine.
- 13 But I will sustain the objection that Mr.
- 14 Lindsay's legal knowledge or opinions on the general
- 15 legality of these issues is not relevant.
- 16 MR. KELLY: Okay. Thank you, Dr. Wolff.
- 17 VICE CHAIRPERSON WOLFF: Just a moment please.
- 18 Step off the record.
- 19 (Thereupon a discussion occurred off the record.)
- 20 VICE CHAIRPERSON WOLFF: Back on the record
- 21 please.
- 22 Continue.
- MR. KELLY: Thank you, Dr. Wolff.
- 24 Mr. Lindsay, maybe we could just focus on the
- 25 condition that is at issue in this proceeding.

1 Can you identify that condition in the license

- 2 for me please?
- 3 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- Sure. It's on the second page of Water Right 7.
- 5 And it's the -- when you look at that page, it's
- 6 the last paragraph. It's kind of in the middle of it.
- 7 It says, "No water shall be diverted under this
- 8 license unless licensee has installed a device in Oak Flat
- 9 Creek, satisfactory to the State Water Resources Control
- 10 Board, which is capable of measuring the flows required by
- 11 the conditions of this license. Said measuring device
- 12 shall be properly maintained."
- 13 MR. KELLY: Okay. And can you tell me, because
- 14 you're the one that drafted the complaint, what the
- 15 language is in that specific condition that makes a
- 16 violation of that condition a trespass?
- 17 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 18 Because it starts out -- I think I understood
- 19 your question -- no water shall be diverted under this
- 20 license. It starts off with that, and it's clear to me.
- 21 MR. KELLY: Okay. Thank you, Mr. Lindsay.
- 22 And when a water right license is prepared, could
- 23 you just very briefly perhaps tell me the process by which
- 24 someone files for a water right and then how it ends up
- 25 becoming a license, very briefly.

1 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:

- 2 Sure, sure.
- 3 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 4 File an application. It's noticed -- goes out to
- 5 public notice. There may be -- there's a period of time
- 6 where protests may be gathered. Those have to be
- 7 resolved. Have to make some legal determinations, which
- 8 please don't -- you know, water's available, no harm to
- 9 the environment, those sorts of things obviously. And
- 10 then a permit is issued.
- 11 And then the permit will contain of course some
- 12 standard terms, which all of them have, and then any terms
- 13 that may have become maybe necessary, to resolve protests,
- 14 for example. And those will end up in the permit.
- 15 Then you go through a period of time where the
- 16 permittee demonstrates how much water they actually are
- 17 going to apply to beneficial use. And then we do an
- 18 inspection of the project. And from that, after seeing
- 19 how much water is used, then the license is prepared.
- MR. KELLY: Thank you.
- 21 And then if a water right application is
- 22 protested, can the Division of Water Rights approve that
- 23 application or does it need to go before the Board and go
- 24 to a hearing?
- 25 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:

Well, if the protests are resolved outside --

- 2 they can be resolved outside of a hearing.
- 3 MR. KELLY: If they're not resolved, there's a
- 4 good -- would it go to -- and I guess -- in the context of
- 5 this water right, this water right actually went before
- 6 the Board and there was a decision that was issued with
- 7 regard to this water right, correct?
- 8 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 9 Correct.
- 10 MR. KELLY: And so the conditions that end up in
- 11 the permit and eventually make it to the license are
- 12 imposed by the Board through that hearing process when
- 13 they issue their water right order or decision on the
- 14 application, correct?
- 15 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 16 If there was a hearing to resolve the protest.
- 17 MR. KELLY: Right. But in this case, with this
- 18 water right, there was a hearing and a decision of the
- 19 Board issued with regard to this water right?
- 20 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 21 Yes.
- 22 MR. KELLY: Okay. And in your experience, can
- 23 staff -- well, who prepares the actual paper permit and
- 24 paper license? I mean physically just --
- 25 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:

- 1 Physically does the writing? Staff.
- MR. KELLY: Staff does it.
- 3 Okay. When staff prepares the permit or license,
- 4 can they materially change any of the conditions or terms
- 5 that the Board imposes in their water right decision with
- 6 regard to any of the elements of the right?
- 7 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 8 Any of the elements of the right? I --
- 9 STAFF COUNSEL BULLOCK: I'm starting to feel like
- 10 I need to object to the relevance of this. I mean the
- 11 license says what it says. And that's what -- regardless
- 12 of how it ended up that way, I --
- 13 VICE CHAIRPERSON WOLFF: Mr. Kelly, again where
- 14 are you going with this?
- 15 MR. KELLY: Okay. Your Honor, can you just bear
- 16 with me for one minute.
- 17 Mr. Lindsay, are you able to answer that question
- 18 or --
- 19 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- I want to give you a fair answer here.
- MR. KELLY: Sure.
- 22 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- The license and the permit should reflect what's
- 24 in the decision.
- MR. KELLY: I'll take -- thank you. That's fine.

```
1 Thank you, Dr. Wolff.
```

- Can you go to the water right decision that was
- 3 issued. I believe it's WR 20.
- 4 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 5 Okay.
- 6 MR. KELLY: Where in the decision or in the order
- 7 part of the decision are the conditions imposed?
- 8 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 9 Well, let's see. For the term at issue here, it
- 10 looks to me like Water Right 20, page 10, at the top,
- 11 paragraph 6. And it says -- it's continuing from the
- 12 previous page, which says "Order." So this is the order
- 13 by the Board. And that paragraph 6 is part of that.
- 14 MR. KELLY: Okay. Can you read on -- well, on
- 15 page 9 at Condition No. 5, does that condition contain the
- 16 language "no water shall be diverted"?
- 17 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- Number 5?
- MR. KELLY: Yeah.
- 20 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 21 No.
- 22 MR. KELLY: Had that condition appeared in the
- 23 water right license as expressly set forth by the Board in
- 24 its decision, had that appeared in there, would this
- 25 be -- would this proceeding have -- would this have gone

- 1 and an ACL issued?
- 2 STAFF COUNSEL BULLOCK: I need to object again.
- 3 This order was for the permit, and that language was not
- 4 in the permit. It was added when the license was issued.
- 5 And so this is not relevant to the language in the
- 6 license. This is about the language in the permit.
- 7 MR. KELLY: Dr. Wolff, if I could respond. I
- 8 disagree completely. Conditions -- the Water Board issues
- 9 a decision, and these conditions follow the permit into
- 10 the license.
- 11 VICE CHAIRPERSON WOLFF: Mr. Kelly, you're
- 12 attempting to use the cross-examination to make a series
- 13 of legal arguments. You're entitled to make those legal
- 14 arguments. But I prefer you use the cross-examination to
- 15 obtain the factual information you need to make the
- 16 arguments. Then make the arguments later.
- 17 I will allow you to continue your line of
- 18 questioning. But restrict your questions to those pieces
- 19 of information you need to then make your argument later.
- 20 SENIOR STAFF COUNSEL KATZ: May I add something
- 21 please?
- 22 VICE CHAIRPERSON WOLFF: Yes, you may.
- 23 SENIOR STAFF COUNSEL KATZ: Just wanted to note
- 24 that the time for expiring -- the time for challenging
- 25 what was in a permit or a license has expired.

1 MR. KELLY: I understand that, Ms. Katz, and I

- 2 can appreciate that. I'm just trying to establish whether
- 3 or not, and on a factual basis, the process by which this
- 4 water right went to license. And I just want to be sure
- 5 that the record's clear, because the operative language
- 6 that my clients are now being threatened with a \$30,000
- 7 fine over does not appear in the water right order, in the
- 8 original decision. And I can appreciate that --
- 9 VICE CHAIRPERSON WOLFF: I understand your
- 10 concern, Mr. Kelly.
- 11 Mr. Lindsay, were you involved in the issuance of
- 12 the license originally, 20 years ago?
- 13 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 14 No.
- 15 VICE CHAIRPERSON WOLFF: Were you involved in the
- 16 water rights issue, the decision?
- 17 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 18 The decision? No. No, Dr. Wolff.
- 19 VICE CHAIRPERSON WOLFF: All right. So you
- 20 should restrict your questions to -- Mr. Kelly, your
- 21 question to those matters which this witness is qualified
- 22 to comment upon and can provide evidence upon. I
- 23 understand you want to make argument, and you're welcome
- 24 to make that argument at the appropriate time. But this
- 25 witness has no direct knowledge of those matters.

MR. KELLY: I appreciate that, Dr. Wolff. And my

- 2 concern is that the prosecution team has been allowed to
- 3 go back into the eighties and the nineties with regard to
- 4 the original inspections of the permit and the license and
- 5 they provided testimony about missing devices in the
- 6 eighties and the early nineties. And this is all in that
- 7 same timeframe. So I was just going back in the same
- 8 timeframe to establish a complete record.
- 9 I appreciate the admonition. I do think it's
- 10 relevant. But I will move on if that's what the hearing
- 11 team would like me to do.
- 12 VICE CHAIRPERSON WOLFF: It may very well be
- 13 relevant, but that relevance may occur best in another
- 14 place in the process. If this witness has nothing to
- 15 offer with respect to evidence on that question, then you
- 16 should move on. If you believe this witness has evidence
- 17 that is specific to this question, you're entitled to
- 18 continue to ask.
- 19 MR. KELLY: Mr. Lindsay, in your testimony at the
- 20 bottom of page 3 --
- 21 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- Okay.
- MR. KELLY: -- you say that there's no evidence
- 24 that the Vineyard Club will comply without future
- 25 enforcement.

1 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:

- 2 Let's make sure we're looking in the right place
- 3 here.
- I see where it says, "Finally, history shows no
- 5 evidence that the Vineyard Club will diligently comply
- 6 with its water right terms and conditions in the future
- 7 without compulsion through formal enforcement action."
- 8 MR. KELLY: Right. Did the Vineyard Club request
- 9 a copy of the inspection report?
- 10 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 11 No.
- 12 MR. KELLY: They never requested a copy of the
- 13 inspection report?
- 14 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- Not my inspection report.
- 16 MR. KELLY: What did the Vineyard Club --
- 17 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 18 Oh, I'm sorry, I'm sorry. Mr. Sandell did. Mr.
- 19 Sandell did after the ACL was issued. He requested a copy
- 20 of the inspection report. And I gave him one.
- 21 MR. KELLY: So when you were there conducting
- 22 your inspection, it's your testimony that Mr. Sandell did
- 23 not request that you send him a copy of the report you
- 24 prepared pursuant to your inspection?
- 25 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:

Mr. Sagues at the time of the inspection --

- 2 MR. KELLY: Mr. --
- 3 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 4 No, actually I was telling him what we would
- 5 send. I said we would send him the results of the
- 6 inspection, the results of the inspection. I never
- 7 offered to send the report.
- 8 MR. KELLY: Did you ever send him the results of
- 9 the inspection?
- 10 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 11 No, we did not. Well, yes, we did. We sent him
- 12 the Administrative Civil Liability.
- 13 MR. KELLY: Is Administrative Civil Liability the
- 14 result of an inspection?
- 15 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- Yes, sir, it is. And that's what I told him. I
- 17 said the next correspondence he may get from us may be the
- 18 Administrative Civil Liability. And I may talk about
- 19 that, is at the end of the inspection --
- 20 MR. KELLY: Your Honor --
- 21 VICE CHAIRPERSON WOLFF: I'm sorry. Mr. Lindsay,
- 22 you're here at this moment to respond to questions.
- 23 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 24 Yes, sir.
- 25 VICE CHAIRPERSON WOLFF: Thank you.

1 SENIOR WATER RESOURCES CONTROL ENGINEER LINDS	1	SENIOR	WATER	RESOURCES	CONTROL	ENGINEER	LINDSAY
---	---	--------	-------	-----------	---------	----------	---------

- Well, but that's what I'm doing.
- 3 VICE CHAIRPERSON WOLFF: You feel that you didn't
- 4 adequately answer the previous question?
- 5 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 6 Let me hear the question again please.
- 7 VICE CHAIRPERSON WOLFF: That would be helpful.
- 8 Can you simply repeat the last question?
- 9 MR. KELLY: Can it be read back?
- 10 (Thereupon the court reporter read
- 11 back the record.)
- 12 VICE CHAIRPERSON WOLFF: Is the Administrative
- 13 Civil Liability -- is an Administrative Civil Liability
- 14 the result of an inspection?
- 15 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 16 Yes.
- 17 MR. KELLY: That's the result? When you do an
- 18 inspection, the result of the inspection is Administrative
- 19 Civil Liability?
- 20 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 21 That's one of them.
- MR. KELLY: What are other results of
- 23 inspections?
- 24 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 25 A warning letter.

MR. KELLY: A report is not a result -- a report

- 2 of compliance and inspection is not a result of an
- 3 inspection?
- 4 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 5 Dr. Wolff, it might be helpful if I --
- 6 VICE CHAIRPERSON WOLFF: Is that a question or a
- 7 statement?
- 8 MR. KELLY: I'm asking --
- 9 VICE CHAIRPERSON WOLFF: Are you asking him a
- 10 question? Then state it in the form of a question.
- 11 MR. KELLY: Thank you, Dr. Wolff.
- 12 Is a report of compliance and inspection the
- 13 result of an inspection?
- 14 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 15 Me preparing the report is a result of the
- 16 inspection.
- 17 MR. KELLY: So when your contact report at
- 18 VC-7 --
- 19 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- Okay. VC.
- 21 Oh, I'm sorry. I don't have the Vineyard Club
- 22 exhibits in front of me.
- 23 MR. KELLY: It may actually be a --
- 24 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- I think it's in probably mine too.

- 1 MR. KELLY: I think it's WR-9 possibly.
- 2 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 3 I think you're right.
- 4 This is the contact report that I wrote on August
- 5 16th?
- 6 MR. KELLY: That's correct.
- 7 Your first sentence there, what were you
- 8 referring to?
- 9 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 10 Here's what I wanted to talk about. Here's what
- 11 I was referring to. At the end of the inspection, I sat
- 12 Mr. Sagues in our truck and I told him that the Division
- 13 would send him the results of the inspection. I told him
- 14 the results may be -- the next correspondence he gets from
- 15 the Division may be an Administrative Civil Liability. It
- 16 also may be an inspection letter with a warning.
- 17 Generally speaking, we do not send out the report. It's a
- 18 public document. It's in the files. They can have it if
- 19 they want it. But in my experience, we don't generally
- 20 send that out. It's available. Mr. Sandell asked for it.
- 21 I gave it to him.
- 22 MR. KELLY: After the ACL was issued you gave it
- 23 to him; is that correct?
- 24 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 25 Yes.

1 MR. KELLY: Okay. And if I can direct you, if

- 2 you have it, to VC-8.
- 3 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 4 Okay.
- 5 Oh, Vineyard Club 8. I'm sorry.
- 6 MR. KELLY: That's correct.
- 7 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 8 I think I may have that.
- 9 MR. KELLY: And actually maybe if we can start
- 10 with -- no, VC-8 is fine.
- 11 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 12 Okay. I have a copy of that in front of me,
- 13 besides on the screen.
- 14 MR. KELLY: And that was in -- when was that
- 15 E-mail sent to you?
- 16 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 17 Looks to me like -- let me make sure. Looks like
- 18 March 29th, 2006, to me.
- MR. KELLY: Roughly late March of '06?
- 20 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 21 Yes.
- 22 MR. KELLY: And in that E-mail, which was -- and
- 23 we'll get to this in a second -- that was a follow-up
- 24 E-mail from them telling you that they're not diverting
- 25 water. And doesn't the Vineyard Club tell you there that

1 when they have plans to divert they're going to have the

- 2 engineered plan, in that E-mail in March of '06?
- 3 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 4 I'm not sure that was a follow-up from them
- 5 telling me they weren't going to divert water. I don't
- 6 see that there.
- 7 MR. KELLY: Okay.
- 8 STAFF COUNSEL BULLOCK: I'd like to object here
- 9 and ask what the relevance is here. We're talking about
- 10 an ACL, which is for past violations. This 2006 is well
- 11 past when the violation occurred.
- 12 VICE CHAIRPERSON WOLFF: Yes, Mr. Kelly, what is
- 13 the relevance?
- 14 MR. KELLY: Dr. Wolff, this is a hearing on a
- 15 cease and desist order and on an Administrative Civil
- 16 Liability complaint. And these witnesses have testified
- 17 that there is a threat of a violation of a term in a
- 18 license, and they have testified that history shows no
- 19 evidence that they're going to comply with the terms of
- 20 their license. And this evidence absolutely shows that
- 21 the Vineyard Club from the date of the inspection has
- 22 attempted to get information from the people at the
- 23 Division of Water Rights, have kept them informed, that
- 24 they're not ever going to have a plan. And I can't --
- 25 that's not relevant?

VICE CHAIRPERSON WOLFF: You've made your point.

- 2 But what was your question again then to Mr. Lindsay?
- 3 MR. KELLY: My point --
- 4 VICE CHAIRPERSON WOLFF: That's a point that can
- 5 be made without badgering the witness. I'm beginning to
- 6 be a little concerned about where you're going with this.
- 7 So, again, if you can restrict your questions to factual
- 8 matters known to the witness, that's fine.
- 9 MR. KELLY: Okay.
- 10 VICE CHAIRPERSON WOLFF: Certainly your point is
- 11 relevant. But making the argument during
- 12 cross-examination is inappropriate. This is the
- 13 difficulty here I'm finding.
- MR. KELLY: You testified that there's no
- 15 evidence that the Vineyard Club's going to diligently
- 16 comply with the terms of their license without an
- 17 enforcement action, right?
- 18 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 19 That's not exactly what I said. Why don't I read
- 20 it.
- 21 "Finally, history shows no evidence that the
- 22 Vineyard Club will diligently comply with its water right
- 23 terms and conditions in the future without compulsion
- 24 through formal enforcement action." This is based on my
- 25 observations, looking at the file, where we showed up --

1 Division showed up for a permit -- I'm sorry -- a license

- 2 inspection and the file shows there was no measuring
- 3 device in place.
- 4 At sometime then, years later, I go out. There's
- 5 no measuring device in place. I saw that. Two years
- 6 pass, there's no measuring device in place.
- 7 Finally, history shows no evidence that the
- 8 Vineyard Club will diligently comply. That's what I'm
- 9 basing that on.
- 10 MR. KELLY: And my question, beginning with the
- 11 contact report, was whether or not --
- 12 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- On Vineyard Club 8?
- MR. KELLY: On Vineyard Club 8 -- on 7, was
- 15 whether -- we already talked about this and it was up on
- 16 the screen. And I asked what the results of the
- 17 inspection meant, and that -- Dr. Wolff, goes directly as
- 18 to whether or not there's no evidence of the Vineyard Club
- 19 attempting to comply with the conditions and terms in its
- 20 license for the purposes of whether there's a threat of a
- 21 violation for the cease and desist order.
- 22 VICE CHAIRPERSON WOLFF: Mr. Kelly, you can make
- 23 that argument when you present your case in chief. You
- 24 don't need to ask this witness anything as far as I can
- 25 tell in order to make that point. So you're in

1 cross-examination. If you have something to ask of the

- 2 witness, that's fine. If you want to make a legal
- 3 argument or present evidence in support of a contrary
- 4 assertion to that of the prosecution, you should do that
- 5 during the presentation of your case in chief.
- 6 MR. KELLY: Mr. Lindsay, did anyone from the
- 7 Vineyard Club request at the inspection the results of
- 8 your inspection?
- 9 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 10 I told them we'd send the results.
- 11 MR. KELLY: I --
- 12 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- You know, you're asking me to remember exactly.
- 14 Let me talk here. You're asking me to remember
- 15 exactly what I said several years ago. What I know,
- 16 because as we -- as I was setting him down for this
- 17 conversation in the truck, I'd been thinking about it for
- 18 several minutes before we got there, I wanted to make it
- 19 very clear that they were illegally diverting right then,
- 20 that there was no measuring device in place, and that they
- 21 were potentially -- depending on management decisions,
- 22 potentially going to receive an Administrative Civil
- 23 Liability, and that that may be the next correspondence
- 24 that they got from us.
- Now, I think, to my memory -- best of my memory,

1 Mr. Sagues was really on the receiving end of me talking

- 2 to him, more so than asking me for anything. I did tell
- 3 him he'd get the results of the inspection.
- 4 MR. KELLY: Did you get an E-mail from the
- 5 Vineyard Club in March of 2006 informing you that when
- 6 they plan to divert they would have an engineered plan?
- 7 STAFF COUNSEL BULLOCK: Asked and answered.
- 8 VICE CHAIRPERSON WOLFF: I believe it was asked
- 9 and answered, was it not?
- 10 MR. KELLY: I don't think it was answered. There
- 11 was objections lodged. And then I was admonished to talk
- 12 about facts that he knows. So I just want to establish
- 13 that he received the E-mail.
- 14 VICE CHAIRPERSON WOLFF: Please repeat the
- 15 question then, and let's answer it again.
- 16 MR. KELLY: Did you receive an E-mail in March of
- 17 2006 where the Vineyard Club informed you that before they
- 18 diverted you would get the engineered plan -- or an
- 19 engineered plan?
- 20 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- We're talking about Vineyard Club 8?
- MR. KELLY: Vineyard Club 8.
- 23 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 24 This is not one of my -- I don't remember this
- 25 conversation. Everything I know about this conversation

- 1 is right here on the piece of paper. That's all I
- 2 remember. And it says what it says.
- 3 VICE CHAIRPERSON WOLFF: The question is whether
- 4 you received that E-mail. Isn't that correct?
- 5 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 6 Yes, I did.
- 7 VICE CHAIRPERSON WOLFF: Thank you.
- 8 MR. KELLY: Vineyard Club 9.
- 9 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 10 I'm sorry. You're going to have to help me out
- 11 with that one.
- 12 Yes.
- 13 MR. KELLY: Did you receive that E-mail where the
- 14 Vineyard Club told you they didn't hook up the diversion
- 15 pipeline, then they just wanted to let you know that they
- 16 weren't diverting in '06?
- 17 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 18 Yes, I did.
- 19 MR. KELLY: Okay. If I can, just so I
- 20 understand. We talked about the results of an inspection,
- 21 sometimes it's a warning letter, sometimes it's an
- 22 Administrative Civil Liability complaint.
- 23 Are there any results of an inspection if there's
- 24 no violation?
- 25 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:

1 Yes -- okay, I see -- let me clarify that for you

- 2 then. You're going to -- the party, you know, whether
- 3 it's a club or an individual, they're going to get some
- 4 correspondence from the Division that's appropriate for
- 5 the situation. If there's a violation, it may be informed
- 6 as we've talked about, informed of the violation through
- 7 the Administrative Civil Liability.
- 8 Otherwise, it's going to be a letter that
- 9 discusses problems we found -- gosh, it could be many
- 10 different things. Maybe something needs clarification, we
- 11 need something back from them. On some rare occasions it
- 12 will be a letter that says, "Thank you. We found nothing
- 13 wrong."
- 14 MR. KELLY: Okay. So they got -- so if they were
- 15 waiting for the results of the inspection, the fact that
- 16 it's been delayed two years is because they didn't get the
- 17 results, whatever they were, until just this past
- 18 December, right?
- 19 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 20 That what was delayed?
- 21 MR. KELLY: You --
- VICE CHAIRPERSON WOLFF: Mr. Kelly, is this a
- 23 question?
- 24 MR. KELLY: Yes, at the end of that I asked if
- 25 that was correct.

1 VICE CHAIRPERSON WOLFF: Well, put the question

- 2 up front. It might help.
- 3 MR. KELLY: Okay. Mr. Lindsay, you're testifying
- 4 that there's a threat of a violation because they haven't
- 5 complied in the two years since the inspection; is that
- 6 correct?
- 7 STAFF COUNSEL BULLOCK: That mischaracterizes his
- 8 testimony.
- 9 VICE CHAIRPERSON WOLFF: Concur.
- 10 MR. KELLY: Okay. Mr. Lindsay, can you tell me
- 11 what your testimony is with regard to how the threat of
- 12 violation exists?
- 13 STAFF COUNSEL BULLOCK: Been asked and answered.
- 14 He stated because of the past history.
- 15 VICE CHAIRPERSON WOLFF: I'm sorry. State your
- 16 point again, Mr. Bullock.
- 17 STAFF COUNSEL BULLOCK: It's been asked and
- 18 answered. He answered that the continued threat is
- 19 because of their past history.
- 20 VICE CHAIRPERSON WOLFF: I concur.
- 21 MR. KELLY: Mr. Lindsay, did you testify that one
- 22 of the reasons that you believe a threat exists is because
- 23 of the delay between the inspection and when they've
- 24 attempted to come into compliance?
- 25 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:

- 1 I did testify to that?
- 2 MR. KELLY: And is it at all possible that the
- 3 reason for that delay is they didn't get the results of
- 4 the inspection until December of 2006?
- 5 STAFF COUNSEL BULLOCK: Objection.
- 6 MR. KELLY: I asked if it was possible.
- 7 STAFF COUNSEL BULLOCK: He's asking for
- 8 speculation.
- 9 VICE CHAIRPERSON WOLFF: You're asking for
- 10 speculation. You are. If you wish to rephrase your
- 11 question where it does not require speculation, you're
- 12 welcome to. But you're asking for speculation.
- MR. KELLY: All right, Mr. Lindsay. I'd like to
- 14 ask you a little bit about your testimony about the cease
- 15 and desist order.
- In your testimony you suggest that this device
- 17 needs to be made of steel or some other durable material;
- 18 is that correct?
- 19 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 20 Durable material, steel, yeah, sure.
- 21 MR. KELLY: It doesn't necessarily have to be
- 22 made of steel then?
- 23 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- No, just durable.
- 25 MR. KELLY: Do people throughout California use

1 wood flashboards for diversion structures made of wood?

- 2 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 3 Wood flashboards?
- 4 MR. KELLY: Flashboards or wood diversion
- 5 structures.
- 6 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- Wood flashboards and diversion structures are
- 8 used throughout California.
- 9 MR. KELLY: Okay. Is there any particular reason
- 10 why it would be inappropriate for the Vineyard Club to use
- 11 wood flashboards if it's accepted other places in
- 12 California?
- 13 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 14 For a measuring device?
- MR. KELLY: Yes.
- 16 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 17 It's an apple and an orange. A flashboard is not
- 18 a measuring device.
- MR. KELLY: What is a flashboard?
- 20 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 21 It's usually put into slots in a dam. For
- 22 example -- it may be used to raise a dam, fill a slot in a
- 23 dam. It may be used to create a dam structure, a
- 24 diversion structure.
- 25 MR. KELLY: I'm sorry.

1 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:

- 2 As a diversion structure.
- 3 MR. KELLY: As a diversion structure?
- 4 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 5 Uh-hmm.
- 6 MR. KELLY: Okay. Can you look at WR-14.
- 7 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 8 Sure. Okay.
- 9 MR. KELLY: In that top picture --
- 10 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 11 Yes.
- 12 MR. KELLY: -- is that a wooden device diversion
- 13 structure that's set into slots in concrete, kind of what
- 14 you just described? Or how would that -- I'll strike that
- 15 question.
- 16 How does that differ from a flashboard?
- 17 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 18 Okay. I'm going to make the assumption, which I
- 19 think both of us are, that we're looking at -- that this
- 20 diversion structure is some boards set parallel to each
- 21 other in some slots. I can't really tell from that
- 22 picture. You know, there's a better -- of course this a
- 23 scan, but I think that's probably what's going on here.
- MR. KELLY: Maybe if we looked at WR-16.
- 25 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:

Okay. I mean I'm trying to help you out there.

- 2 I think that's what it is.
- 3 MR. KELLY: I appreciate it. Thank you.
- 4 What is that a picture of?
- 5 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- You know, it's kind of hard for me to tell.
- 7 Looks like plywood to me.
- 8 MR. KELLY: I guess maybe more basic than that.
- 9 What are we looking at? What is that?
- 10 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 11 The measuring device that was put in place in
- 12 about the time of licensing.
- 13 MR. KELLY: And apparently -- do you know whether
- 14 or not this was approved by the Board in 1991 as an
- 15 appropriate measuring device?
- 16 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 17 I can't tell really.
- 18 MR. KELLY: You testified earlier that there was
- 19 an inspection when it was going to go to license and that
- 20 there was no measuring device in place in around early
- 21 1990s; is that correct?
- 22 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 23 At the -- when the inspector showed up to do the
- 24 initial license inspection there was no measuring device
- 25 in place.

1 MR. KELLY: And then did you testify that they

- 2 ended up putting in a measuring device?
- 3 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- Yes, that's what I get from the file. Yes, I
- 5 testified to that.
- 6 MR. KELLY: Okay. And why did you include this
- 7 picture in the exhibits that the prosecution team, if you
- 8 included it -- I don't know that you included it. But why
- 9 is this -- if you know, why is this picture included in
- 10 the exhibits?
- 11 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 12 To demonstrate that there appears to have been a
- 13 measuring device in place at approximately -- you know,
- 14 it's a memo. The photo's not dated, but the memo's dated
- 15 at the upper right-hand corner, January 14, '92, you know,
- 16 about the time of -- just before the license was issued.
- 17 So I'm trying to show that there was some device at that
- 18 time.
- MR. KELLY: Okay. And was apparently -- well, I
- 20 don't want you to speculate.
- 21 Do you have any reason to believe that that was
- 22 not acceptable to the State Water Resources Control Board
- 23 as an appropriate measuring device?
- 24 STAFF COUNSEL BULLOCK: It's vague. I'd like to
- 25 ask Mr. Kelly to clarify whether he means whether the

1 witness believes that at that time the Water Board felt

- 2 that it was appropriate or now. If he could just clarify
- 3 the timing of his question.
- 4 MR. KELLY: Okay. Mr. Lindsay, do you have any
- 5 reason to believe in 1992, when this report was apparently
- 6 prepared, that the State Water Board did not feel that
- 7 that was an acceptable measuring device?
- 8 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 9 I'm sorry. There's a couple negatives in your
- 10 question. I really want to try to answer --
- MR. KELLY: I'm not trying -- it's not a trick
- 12 question. I just want to know -- I mean do you have any
- 13 reason to believe in 1992 that would not have been
- 14 acceptable to comply with the license terms?
- 15 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 16 Not based on what I see in the file.
- 17 MR. KELLY: Thank you.
- 18 And if when you had gone out to inspect the
- 19 diversion in '05 -- in May of '05, if that device was
- 20 still in place, would that have been an acceptable
- 21 measuring device when you went out and completed your
- 22 inspection? That's all.
- 23 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 24 If that very device was there and it appeared to
- 25 me at the time -- you know, I'd look at it, if it was

1 anchored and in place and, you know, substantially looking

- 2 like the one here in the photograph, yes.
- 3 MR. KELLY: Okay. Fair enough.
- 4 Is there any reason why when the Vineyard Club
- 5 was in contact with you and possibly other people in the
- 6 Division, if you know about any of those contacts, that
- 7 you just didn't supply the Vineyard Club with the device
- 8 that was previously installed, which may or may not have
- 9 complied with the license term, is there any reason why
- 10 you didn't give them that copy and say, "Here's the device
- 11 you guys had installed"?
- 12 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- You know, I've been thinking hard about this and
- 14 trying to search my memory. And I want to be careful not
- 15 to testify to anything I'm not sure of, because I remember
- 16 thinking about this photograph. I think I made an attempt
- 17 to fax it to them. But of course the picture didn't come
- 18 out very well. So that's the most I remember of that.
- 19 And I'm sorry, I just rambled a little bit. I
- 20 probably didn't answer your question, and I want to try.
- 21 So give me one -- hit me again if you want to with the
- 22 question.
- MR. KELLY: Well, I mean I'm just, you know --
- 24 let me back up.
- 25 Is the goal of these compliance inspections to

- 1 bring people into compliance rather than bring
- 2 administrative enforcement actions against people?
- 3 STAFF COUNSEL BULLOCK: That's outside of the
- 4 range of the knowledge and the expertise of this witness.
- 5 VICE CHAIRPERSON WOLFF: Indeed it is.
- 6 MR. KELLY: Why do you do compliance inspections?
- 7 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 8 To make sure that environmental law is complied
- 9 with throughout California; specifically water rights of
- 10 course.
- 11 MR. KELLY: Have you ever been involved in
- 12 an enforce -- have you ever been -- as the result of an
- 13 inspection, have you ever attempted to help somebody come
- 14 into compliance with any condition or term in their
- 15 license?
- 16 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 17 Oh, yes.
- 18 MR. KELLY: And my question is: As a result of
- 19 your inspection, is there any reason why you just didn't
- 20 provide them with a copy of that so they could reproduce
- 21 that device and install it in the creek?
- 22 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- I'm hesitating because I'm not sure I didn't
- 24 attempt to fax that to them. I just don't remember. I
- 25 agree, it would have been good to give it to them.

1 MR. KELLY: Okay. Thank you. That's fair

- 2 enough.
- 3 I want to talk a little bit about the harm that
- 4 you testified to with regard to this diversion.
- 5 What is the -- I understand what the prosecution
- 6 team alleges is the legal basis for the violation.
- 7 VICE CHAIRPERSON WOLFF: Excuse me. I'm going to
- 8 interrupt briefly.
- 9 Mr. Lindsay, do you need a break?
- 10 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- No, I'm fine.
- 12 VICE CHAIRPERSON WOLFF: All right. I just
- 13 wanted to check. Go ahead, please.
- 14 MR. KELLY: And I'll wrap it up quick here.
- VICE CHAIRPERSON WOLFF: No, that's fine.
- 16 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 17 I think I can last that long.
- 18 MR. KELLY: I said I understand what you contend
- 19 is the legal basis, and we disagree on that and that's
- 20 fine.
- 21 The factual basis for the Administrative Civil
- 22 Liability complaint is not having a measuring device in
- 23 place; is that correct?
- 24 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 25 Yes.

MR. KELLY: And that picture there differs from

- 2 the pictures that you took how? With regard to the
- 3 diversion -- let me ask you this: With regard to the
- 4 diversion, what makes that structure different than the
- 5 one that you took a picture of?
- 6 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 7 Oh, on my inspection?
- 8 MR. KELLY: Yes.
- 9 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 10 That one appears to me from the photograph to
- 11 have some sort of a slot that measures the flow through
- 12 it.
- 13 MR. KELLY: That's consistent with -- if you page
- 14 up on that, if you scroll up -- that's consistent with the
- 15 diagram on the bottom of the page?
- 16 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- Yes.
- 18 MR. KELLY: And that's the difference?
- 19 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 20 Yes.
- 21 MR. KELLY: So the violation is not having the
- 22 bypass hole in the board, correct?
- 23 STAFF COUNSEL BULLOCK: That mischaracterizes his
- 24 testimony. It's a combination. As was stated in our
- 25 testimony, it's not having the measuring device and

- 1 diverting water. That was testified to.
- VICE CHAIRPERSON WOLFF: I think that is correct.
- 3 Maybe you want to rephrase the question. It's difficult,
- 4 I know. Take your time.
- 5 MR. KELLY: You did an approximate -- is it
- 6 correct that you did an approximate measure of the bypass
- 7 flows when you were there?
- 8 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 9 Yes, I did.
- 10 MR. KELLY: And perhaps without getting into the
- 11 details of the way that everything was measured, did you
- 12 generally find that they were in compliance with their
- 13 bypass flow requirements?
- 14 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- No. And I'll help you out here. I really made
- 16 no determination.
- 17 MR. KELLY: Okay. So you're not testifying and
- 18 you're not alleging that they were violating bypass flow
- 19 requirements?
- 20 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- No, I'm not.
- 22 MR. KELLY: Had they had this device in place and
- 23 hooked up, would they still be diverting water? I'm just
- 24 trying to find -- and I don't -- again, this isn't a trick
- 25 question. I'm just trying to figure out --

- 1 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- Yes, yes. From what I understand of this device,
- 3 it appears they would be diverting water, yeah.
- 4 MR. KELLY: And perhaps if I could just maybe set
- 5 this question up. You went out and you measured
- 6 approximately .13 cfs of diversion through the pipe into
- 7 the lake?
- 8 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 9 Yes.
- 10 MR. KELLY: Mr. Sagues helped you measure that --
- 11 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 12 Absolutely.
- 13 MR. KELLY: -- and he held the bucket?
- 14 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 15 Yes.
- MR. KELLY: And you measured approximately .13
- 17 cfs. There's a little bit of information there about
- 18 bypass flows.
- 19 My question is just simply that if that device
- 20 was up, could they have still diverted .13 cfs the same as
- 21 they were on the day you were there?
- 22 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- Yes, it's possible to divert .13 cfs and be in
- 24 compliance with a bypass.
- 25 MR. KELLY: Okay. And so I need to understand

- 1 what the alleged harmed is to steelhead. Because if
- 2 they're lawfully operating this diversion structure, is it
- 3 the prosecution team's position and is it your testimony
- 4 that the harm to the steelhead is caused by the .13 cfs
- 5 going into the Vineyard Lake?
- 6 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- You know, in my testimony the only place I
- 8 mentioned steelhead is when I quote the Board decision.
- 9 But to answer your question, if they're diverting
- 10 in accordance with their license, then -- based on the
- 11 Board decision, then there would be no harm to steelhead.
- 12 In other words, if they're following their license --
- 13 MR. KELLY: -- there would be no harm to
- 14 steelhead? That's generally -- right?
- 15 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 16 Yes.
- 17 MR. KELLY: Fish and Game might argue, right,
- 18 but, you know --
- 19 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 20 Again, you know, the decision led to the license
- 21 and -- it's all covered there.
- 22 MR. KELLY: Fair enough.
- 23 And no more water would be diverted either with
- 24 or without the measuring device? It's not a question of
- 25 whether they were meeting their bypass flows. It's

1 whether or not they had the hole in the board or some

- 2 other device that could measure the bypass flows; is that
- 3 correct?
- 4 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 5 I'm really trying here, but I'm a little confused
- 6 here.
- 7 STAFF COUNSEL BULLOCK: That was a little vague.
- 8 MR. KELLY: Okay. Mr. Lindsay, let me maybe
- 9 simplify it. How would steelhead be affected differently
- 10 if the hole was in the board when you went there?
- 11 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 12 Oh, on the day I was there?
- MR. KELLY: Yes.
- 14 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- No difference on the day I was there.
- 16 MR. KELLY: No difference to steelhead. So --
- 17 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 18 Well, you know, of course I'm not a biologist,
- 19 Mr. Kelly. But, again, I would say there's no -- let me
- 20 put it this way: I would say there's no -- I'm
- 21 uncomfortable commenting on how healthy steelhead are.
- 22 But I see where you're going and I'm trying to answer your
- 23 question.
- 24 MR. KELLY: And -- go ahead.
- 25 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:

1 Whether the hole was there or not the day I was

- 2 there, the conditions were the same.
- 3 MR. KELLY: I understand that, and I don't -- all
- 4 I'm trying to establish is when the prosecution team took
- 5 into consideration the harm, one of the harm was harm to
- 6 steelhead, and I'm just trying to understand whether or
- 7 not the lack of the measuring device caused the harm -- in
- 8 other words, if they were exceeding their diversion rate,
- 9 and let's just say that they were diverting the full
- 10 amount of the stream because there was no measuring device
- 11 in place, would it be appropriate to say that exceeding
- 12 their diversion quantity was causing harm because they
- 13 weren't meeting bypass flows?
- 14 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- Now, you've just set it up so there's no bypass
- 16 flow and they're diverting more than their quantity?
- 17 MR. KELLY: Yes.
- 18 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 19 So if there's no bypass flow, then there's no
- 20 water left in the stream below the dam.
- 21 MR. KELLY: Right.
- 22 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- Well, that might be a problem with fish. But,
- 24 again, I'm no biologist.
- 25 MR. KELLY: I appreciate that. But here it's not

- 1 the case that they're not meeting bypass flow
- 2 requirements. The bypass -- there's no allegation that
- 3 they're not meeting bypass flow requirements. So I'm
- 4 trying to understand where the harm to steelhead comes if
- 5 there's no less water in the stream --
- 6 VICE CHAIRPERSON WOLFF: Are you asking a
- 7 question?
- 8 MR. KELLY: I'll asking a question.
- 9 VICE CHAIRPERSON WOLFF: Thinking out loud is not
- 10 asking a question. So ask a question please.
- 11 MR. KELLY: I'm asking where the harm to
- 12 steelhead is.
- 13 VICE CHAIRPERSON WOLFF: That's fine. There's a
- 14 question.
- 15 STAFF COUNSEL BULLOCK: It's argumentative.
- 16 VICE CHAIRPERSON WOLFF: The question is
- 17 argumentative?
- 18 STAFF COUNSEL BULLOCK: I think so.
- 19 VICE CHAIRPERSON WOLFF: I do not concur.
- 20 STAFF COUNSEL BULLOCK: Okay. Thank you.
- 21 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 22 Okay. The question is, where is the harm to
- 23 steelhead?
- 24 MR. KELLY: Correct.
- 25 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:

- 1 Okay.
- 2 STAFF COUNSEL BULLOCK: I would object on --
- 3 VICE CHAIRPERSON WOLFF: Perhaps let's state the
- 4 question a little more clearly. I think you're asking
- 5 something like: Does the existence of -- does the lack of
- 6 existence of a measuring device cause harm to steelhead?
- 7 Or how does the lack of existence of a measuring device
- 8 cause harm to steelhead? Is that what you're trying to
- 9 get at?
- 10 MR. KELLY: Thank you, Dr. Wolff. And I thought
- 11 that that's kind of where we went with discussing the
- 12 board with the hole versus not the hole.
- 13 But how does the lack of a measuring device
- 14 contribute to harm to steelhead?
- 15 STAFF COUNSEL BULLOCK: I would object. As Mr.
- 16 Lindsay has stated, he's not a biologist. He's an
- 17 engineer. He doesn't know about harm to fish. He just
- 18 knows the terms of the permit -- the license. Pardon me.
- 19 MR. KELLY: It's in his testimony.
- 20 VICE CHAIRPERSON WOLFF: Just a moment. Just a
- 21 moment.
- 22 Let's go off the record.
- 23 (Thereupon a discussion occurred off the record.)
- 24 VICE CHAIRPERSON WOLFF: The objection is not
- 25 sustained. It's overruled.

Go ahead with the question. Let's repeat it if

- 2 you need it repeated, Mr. Lindsay.
- 3 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 4 Okay.
- 5 VICE CHAIRPERSON WOLFF: Do you need it repeated?
- 6 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 7 Please.
- 8 VICE CHAIRPERSON WOLFF: Can you restate it or do
- 9 we want to scroll back?
- 10 MR. KELLY: I'll take a shot it.
- 11 VICE CHAIRPERSON WOLFF: All right.
- 12 MR. KELLY: Subject to objection.
- 13 How does the lack of a measuring device -- or how
- 14 does a lack of a hole in the board contribute to harming
- 15 steelhead?
- 16 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 17 Without a measuring device diversions could take
- 18 place such that .4 cfs may not be going down the stream.
- 19 In the decision that led to the permit, that decision
- 20 documents that studies were done and .4 cfs was the number
- 21 decided upon at that time. Anything less than that could
- 22 be a harm. Above that number's apparently okay. Without
- 23 the measuring device, we don't know if that's taking
- 24 place.
- 25 MR. KELLY: Okay. Let me make sure that I

- 1 understand what you're saying then.
- The harm to the steelhead results from not
- 3 bypassing the required flows?
- 4 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 5 Yes.
- 6 MR. KELLY: And there's no allegation here that
- 7 they were not meeting their bypass flows?
- 8 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 9 No, my attempt to measure that was inconclusive.
- 10 MR. KELLY: Okay. So if you can answer the
- 11 question directly. There's no allegation here that they
- 12 were failing to meet bypass flows?
- 13 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- No, on the day that I was there.
- MR. KELLY: Fair enough.
- So you still didn't tell me how you get harm to
- 17 steelhead then from having just not -- missing the hole if
- 18 they're meeting the bypass.
- 19 VICE CHAIRPERSON WOLFF: I think he's answered
- 20 your question, Mr. Kelly. Move on to another line of
- 21 questioning.
- MR. KELLY: That's fine.
- 23 And is it your testimony that you told Mr. Sagues
- 24 that they needed to stop their diversion because it was
- 25 unlawful, when you were there?

1 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:

- 2 I apologizing for mispronouncing his name
- 3 earlier.
- 4 MR. KELLY: That's okay.
- 5 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- But, no, I didn't tell him to stop diverting.
- 7 MR. KELLY: Okay. I have no further questions.
- 8 Thank you.
- 9 VICE CHAIRPERSON WOLFF: Thank you.
- 10 I want to say Mr. Broderick. But that's not
- 11 quite your name, is it?
- 12 STAFF COUNSEL BULLOCK: Bullock.
- 13 VICE CHAIRPERSON WOLFF: Mr. Bullock, do you have
- 14 some redirect?
- 15 STAFF COUNSEL BULLOCK: Yeah, I'd like to check
- 16 with the witness though.
- Do you need a break now or do you want to finish
- 18 up?
- 19 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 20 Let's -- unless you want one.
- 21 REDIRECT EXAMINATION
- 22 BY MR. MATTHEW BULLOCK, STAFF COUNSEL, representing the
- 23 Division of Water Rights:
- 24 Mr. Lindsay, did you know the bypass on the day
- 25 that you did the inspection? Were you able to determine

- 1 it for certain?
- 2 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 3 On the day I inspected I was not able to
- 4 determine the bypass for certain.
- 5 STAFF COUNSEL BULLOCK: Without a measuring
- 6 device, is there any way to determine for certain what the
- 7 bypass is?
- 8 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 9 No.
- 10 STAFF COUNSEL BULLOCK: So without the device is
- 11 there a way to know whether the steelhead are being
- 12 harmed?
- 13 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 14 No.
- 15 STAFF COUNSEL BULLOCK: What day were you out
- 16 there on the inspection?
- 17 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 18 What --
- 19 STAFF COUNSEL BULLOCK: What day?
- 20 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 21 May 4th, 2005.
- 22 STAFF COUNSEL BULLOCK: If you know, is that the
- 23 driest part of the diversion season for the Vineyard Club?
- 24 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- Well, I would say no.

1 STAFF COUNSEL BULLOCK: There was some discussion

- 2 in the cross about the letter that was sent out to
- 3 everyone in the area. I wanted to ask, do you have any
- 4 definite knowledge that the Vineyard Club was aware of
- 5 your inspection before you went out?
- 6 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 7 Other than my phone call to set up the
- 8 inspection, no, I don't know if they received the letter.
- 9 STAFF COUNSEL BULLOCK: But you did speak with
- 10 Mr. Sagues before you went out there?
- 11 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 12 Yes, I did.
- 13 STAFF COUNSEL BULLOCK: When did the Vineyard
- 14 Club first request information about its license
- 15 requirements and coming into compliance? Was it before or
- 16 after the inspection?
- 17 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 18 Oh, after the inspection.
- 19 STAFF COUNSEL BULLOCK: Have they installed
- 20 anything since the inspection, to your knowledge?
- 21 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- Not to my knowledge.
- 23 STAFF COUNSEL BULLOCK: And the fact that they
- 24 have not been diverting in the 2006 season, was that taken
- 25 into consideration when you were setting the ACL amounts?

1 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:

- 2 Yes.
- 3 STAFF COUNSEL BULLOCK: Would you concur with
- 4 that, Mr. Stretars?
- 5 SENIOR WATER RESOURCES CONTROL ENGINEER STRETARS:
- 6 I would.
- 7 STAFF COUNSEL BULLOCK: Have you kept the
- 8 Vineyard Club from installing -- by "you," I mean the
- 9 Division -- has the Division kept the Vineyard Club from
- 10 installing a device on the creek?
- 11 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 12 No.
- 13 MR. KELLY: Your honor, I would object to that
- 14 question as to whether or not Mr. Lindsay can speak on
- 15 behalf of the entire Division of Water Rights.
- 16 STAFF COUNSEL BULLOCK: I'll rephrase the
- 17 question.
- 18 Mr. Lindsay, have you done anything to keep the
- 19 Vineyard Club from installing a --
- 20 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 21 No.
- 22 STAFF COUNSEL BULLOCK: Okay. Mr. Stretars, the
- 23 same question.
- 24 SENIOR WATER RESOURCES CONTROL ENGINEER STRETARS:
- No, I have not.

1 STAFF COUNSEL BULLOCK: Are you aware of anyone

- 2 else in the Division doing anything to keep them from
- 3 installing an appropriate device?
- 4 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 5 No, I'm not.
- 6 SENIOR WATER RESOURCES CONTROL ENGINEER STRETARS:
- 7 No.
- 8 STAFF COUNSEL BULLOCK: Do you see there's being
- 9 a reason that the old design with the plywood is
- 10 unacceptable now even if it was acceptable before?
- 11 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 12 Yes, I do.
- 13 STAFF COUNSEL BULLOCK: And what is that reason?
- 14 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- Well, first of all, again looking at the
- 16 photograph of it, it looks like it's inundated in that
- 17 picture. And let's make it clear that the staff member
- 18 who was involved with that at the time was not a civil
- 19 engineer. There's no -- doesn't appear from that
- 20 photograph to be any kind of a free-fall out through that
- 21 slot. And that's necessary for the slot to operate
- 22 properly. So that's one thing.
- 23 I'm concerned about the material of that old one.
- 24 It appears to be plywood. And that's just not right to
- 25 put in to a streambed like that and expect it to last.

```
1 STAFF COUNSEL BULLOCK: Why is that not right?
```

- 2 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 3 Well, it's going to deteriorate relatively
- 4 quickly. Plus the slots are supposed to be -- you know,
- 5 all the equations you use for these are based on -- a lot
- 6 of them are based on thin-plate weirs. And the shape of
- 7 that slot, the edge of the slot is important. And rough
- 8 cutting it out of plywood, again, there are ways to do it,
- 9 I mean if you were to design it larger perhaps than the
- 10 equation requires for. But, again, that's also why we
- 11 look for an actual testing of this device. There's more
- 12 to this than just a hole in a board.
- 13 STAFF COUNSEL BULLOCK: Does any of your concern
- 14 about the material have anything to do with the history of
- 15 the Vineyard Club specifically?
- 16 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 17 Well, knowing that there was apparently a device
- 18 in place about the time of licensing, knowing that there
- 19 was not one when I showed up, somewhere during that period
- 20 of time something happened to it. And as we've talked
- 21 about -- no, I don't know for sure what happened to it.
- 22 Based on looking at what it was made of, one of the
- 23 possibilities is that it deteriorated.
- 24 STAFF COUNSEL BULLOCK: And have you addressed
- 25 the material with the Vineyard Club at any point between

- 1 the inspection and today?
- 2 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 3 Yes.
- 4 STAFF COUNSEL BULLOCK: And did they respond to
- 5 that concern?
- 6 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 7 No.
- 8 STAFF COUNSEL BULLOCK: Okay. Thank you.
- 9 RECROSS-EXAMINATION
- 10 BY MR. DANIEL KELLY, ESQ., representing The Vineyard Club,
- 11 Inc.:
- 12 I just have a couple of very brief questions.
- 13 Mr. Bullock just asked you whether or not the
- 14 Vineyard Club has anything installed in the creek now.
- 15 And you answered I believe no, whether they have any
- 16 diversion board? You don't have to look -- you can --
- 17 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 19 STAFF COUNSEL BULLOCK: I believe the question
- 20 was, to his knowledge was there.
- 21 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 22 No, I don't think they have anything installed
- 23 right now.
- 24 MR. KELLY: Okay. And if the Vineyard Club's not
- 25 diverting water at all, is there any reason for them to

- 1 have a measuring device installed?
- 2 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 3 Without diverting water, no, I don't --
- 4 MR. KELLY: So if they removed the device in
- 5 May -- if they removed that board in May of '05 and
- 6 haven't diverted since, there's no requirement that they
- 7 have a measuring device in that creek, is there?
- 8 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 9 Oh, not in the creek when they're not diverting,
- 10 no.
- 11 MR. KELLY: Okay. And if the Vineyard Club wants
- 12 to be able to remove that structure after the brief
- 13 diversion period so they don't block passage of fish and
- 14 they don't cause other environmental harm to the creek and
- 15 they don't want debris to build up behind the flashboard,
- 16 is it unreasonable for them to want to remove that device
- 17 every year so the creek can just flow through its channel?
- 18 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 19 No.
- 20 MR. KELLY: So if they removed the device in
- 21 2005, between now and then have they violated any terms of
- 22 their water right permit -- or license, I mean? Have they
- 23 violated anything?
- 24 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 25 If they have not diverted without a measuring

1 device in place, then, no, they have not violated that.

- 2 MR. KELLY: So, if --
- 3 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 4 At Oak Flat Creek.
- 5 MR. KELLY: So if the Vineyard Club testifies
- 6 that they've not diverted since May of '05, then they've
- 7 not been in noncompliance since then, right?
- 8 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 9 They have not diverted illegal -- in an
- 10 unauthorized manner.
- 11 MR. KELLY: They've not violated any conditions
- 12 of their water right license?
- 13 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 14 Correct.
- 15 MR. KELLY: Thank you.
- I have nothing further.
- 17 VICE CHAIRPERSON WOLFF: Thank you.
- 18 STAFF COUNSEL BULLOCK: Dr. Wolff, is it okay to
- 19 ask one more question?
- 20 VICE CHAIRPERSON WOLFF: Go ahead.
- 21 REDIRECT EXAMINATION
- 22 BY MR. MATTHEW BULLOCK, STAFF COUNSEL, representing the
- 23 Division of Water Rights:
- 24 Mr. Lindsay, on WR-5, page 2, which is the CDO,
- 25 the cease and desist order, under the proposed language

1 for the order, under "It is hereby ordered," Section 2,

- 2 would the cease and desist -- are you there?
- 3 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 4 Yes. "It is hereby ordered..." Okay.
- 5 STAFF COUNSEL BULLOCK: Under Section 2, would
- 6 the cease and desist order require them to put in a
- 7 measuring device, or would they have another option?
- 8 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 9 Oh, they have another option.
- 10 STAFF COUNSEL BULLOCK: What is that option?
- 11 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 12 It's in paragraph B, which would, you know,
- 13 remove the threat of future violations by having us amend
- 14 the license to remove the point of diversion on Oak Flat
- 15 Creek.
- 16 STAFF COUNSEL BULLOCK: Okay. Thank you.
- 17 VICE CHAIRPERSON WOLFF: Mr. Kelly, since I
- 18 granted Mr. Bullock an opportunity --
- 19 MR. KELLY: Perhaps just one question. And if I
- 20 could do it from --
- 21 VICE CHAIRPERSON WOLFF: Please, go ahead, as
- 22 long as you have a mike.
- 23 RECROSS EXAMINATION
- 24 BY MR. DANIEL KELLY, ESQ., representing The Vineyard Club,
- 25 Inc.:

1 If the diversion structure's not in the creek and

- 2 the pipe's not in the creek, haven't they already complied
- 3 with B?
- 4 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 5 Well, B is addressing a change to the license
- 6 itself. It permanently removes the opportunity to divert
- 7 at Oak Flat Creek.
- 8 MR. KELLY: Well, I guess -- what I don't
- 9 understand is, this -- the proposed CDO says that it
- 10 should include -- shall include a time schedule for
- 11 installation of the device. And if they have no need to
- 12 divert and they've already offered up a proposal and were
- 13 in discussions with the Division of Water Rights to
- 14 attempt to come into compliance, and the diversion
- 15 structure's removed and they're not diverting, why do you
- 16 need a cease and desist order to force them to do what
- 17 they've already demonstrated they're willing to do?
- 18 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 19 The cease and desist order's based on a threat of
- 20 violation. And I see a threat of violation throughout the
- 21 history that I've researched in the file.
- 22 Now, yes, without the diversion in place, without
- 23 the diversion -- you know, without the structure in place
- 24 in the stream, they're not diverting illegally. I mean
- 25 they're not diverting.

1 MR. KELLY: And the history you talk of is the

- 2 pre-license inspection in 1991 or '92 and the 2005
- 3 inspection; that's the history of violations that you're
- 4 talking about?
- 5 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 6 And the time I showed up and the -- you know,
- 7 I --
- 8 MR. KELLY: Do you have personal -- sorry.
- 9 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 10 I advised the Vineyard Club when I was inspecting
- 11 that they needed to design a measuring device, engage a
- 12 civil engineering, and get going on doing this. And it
- 13 didn't get done.
- 14 So I don't see where they've exercised any
- 15 diligence in really doing anything. I'll grant you, they
- 16 have not diverted illegally -- or appear not to have
- 17 diverted illegally in that time period. But the threat's
- 18 there in my opinion.
- 19 VICE CHAIRPERSON WOLFF: Thank you.
- 20 MR. KELLY: Thank you, your Honor.
- 21 VICE CHAIRPERSON WOLFF: Does prosecution wish to
- 22 enter some exhibits at this time?
- 23 STAFF COUNSEL BULLOCK: Yes, I would ask that all
- 24 of our exhibits, Nos. WR-1 through WR-21, be entered.
- 25 VICE CHAIRPERSON WOLFF: So done. So ordered, I

- 1 guess I should say.
- 2 (Thereupon Exhibits WR-1 to WR-21 were
- 3 admitted into evidence.)
- 4 VICE CHAIRPERSON WOLFF: All right. We'll move
- 5 now to the presentation of the case in chief by the
- 6 Vineyard Club. Seeing that the lunch hour is not too far
- 7 off, I'm going to just move forward. However, if anyone
- 8 becomes lightheaded or feels that they cannot function
- 9 appropriately and needs a lunch break, please speak up at
- 10 that time. Otherwise, when I become lightheaded and feel
- 11 I cannot function, I will declare lunch.
- 12 Do you need a break?
- 13 THE REPORTER: I'm all right.
- 14 VICE CHAIRPERSON WOLFF: All right for now. All
- 15 right.
- 16 STAFF COUNSEL BULLOCK: Dr. Wolff I'm really
- 17 sorry to interrupt. I was wondering, could we have a
- 18 three-minute break just to run to the bathroom?
- 19 VICE CHAIRPERSON WOLFF: Certainly.
- Three-minute bathroom break so ordered.
- 21 (Thereupon a recess was taken.)
- 22 VICE CHAIRPERSON WOLFF: The hearing is now
- 23 reconvened.
- 24 Would the Vineyard Club come forward to present
- 25 their case.

1 MR. KELLY: Good morning. And it is still

- 2 morning thankfully.
- 3 As I think it came out a little bit on cross, you
- 4 know, the Vineyard Club believes that this case is about
- 5 whether or not there was a hole in that board when the
- 6 inspection took place. And I think that the relevant
- 7 question is, you know, what did the Vineyard Club really
- 8 do to try to come into compliance? And the question
- 9 should be whether or not the Vineyard Club made an effort
- 10 to come into compliance and to be sure that they were
- 11 complying with the terms and the conditions of their water
- 12 right.
- 13 And I think that goes right to the issue of
- 14 whether or not there's a threat, and I think it goes --
- 15 and again I guess I'll reiterate that we don't believe
- 16 that there's jurisdiction to issue an Administrative Civil
- 17 Liability complaint in this circumstance. But to the
- 18 extent that there is, I think that the actions of the
- 19 Vineyard Club have demonstrated I believe diligence in
- 20 attempting to come into compliance. And they've not
- 21 diverted since they removed that device in May 2005. And
- 22 they will not divert again, and they're going to testify
- 23 that they're not going to divert again until they've got a
- 24 plan that's approved and the approval of the California
- 25 Department of Fish and Game. Those facts are not in

- 1 dispute.
- 2 The Vineyard Club is a volunteer organization.
- 3 They purchased a large piece of property in this area and
- 4 developed a lake to preserve open space for the benefit of
- 5 the entire community out there. They've managed a lake
- 6 for environmental benefit. They work under the Department
- 7 of Fish and Game guidelines to use environmental-friendly
- 8 practices in managing the lake. They've received
- 9 accolades from the Division of Safety of Dams with regard
- 10 to their maintenance of the dam and the spillway that
- 11 creates the lake. They do not have a history of violating
- 12 the law. They're not bad actors. They're certainly not
- 13 bad actors.
- 14 I think that the cooperation that they've
- 15 tried to show is evidenced by the communication that
- 16 they've maintained with the Division of Water Rights
- 17 staff, in requesting the materials in August of 2005 and
- 18 informing the Division that they weren't going to divert
- 19 in March of 2006. They had two communications in March
- 20 2006. The first time they received anything -- well, they
- 21 did get a copy of the license in August 2005. The next
- 22 communication they got from the Division of Water Rights
- 23 was an Administrative Civil Liability complaint. And that
- 24 does nothing to help them come into compliance with their
- 25 permit terms and conditions.

You're going to hear testimony that when Mr.

- 2 Lindsay went out there for the inspection, Peter Sagues
- 3 helped him, carried his stuff up to the diversion up in
- 4 the creek, stood in the lake and held the bucket. They
- 5 weren't trying to be obstructionists. They weren't trying
- 6 to get away with something. They simply just weren't
- 7 aware that there had to be a hole in the board to bypass
- 8 the flows. And since that day they've attempted to come
- 9 into compliance.
- 10 We think that the evidence actually shows that
- 11 the Division of Water Rights failed to maintain contact
- 12 and to give them the information that they needed to
- 13 actually come into compliance prior to issuing the
- 14 Administrative Civil Liability complaint.
- 15 I'll also say that they're very reluctant to
- 16 proceed to this hearing. And as I've stated in my motion
- 17 to dismiss prior to this hearing, they're here under a
- 18 looming threat and testimony by the prosecution team that
- 19 they should receive the statutory maximum because they've
- 20 requested this hearing. So they're here rather
- 21 reluctantly and are very concerned that state agency
- 22 personnel would actually advocate increased fines to the
- 23 statutory maximum simply for requesting a hearing without
- 24 any change in any of the other circumstances
- 25 surrounding -- factual circumstances surrounding the

- 1 inspection or the alleged violations.
- They've attempted to come into compliance. The
- 3 first report of the inspection that they received, you're
- 4 going to hear testimony, I think you already heard
- 5 testimony, was the administrative Civil Liability
- 6 complaint. They didn't think that they needed a measuring
- 7 device in the creek in 2006 because they weren't
- 8 diverting. There's simply no reason for them to get a
- 9 device installed and get a permit to install it if they're
- 10 not going to divert. They got the Administrative Civil
- 11 Liability complaint. They contacted the Board. They
- 12 attempted to get information about acceptable design,
- 13 acceptable devices.
- 14 They eventually got the calculations right. They
- 15 went to a civil engineer. They had the civil engineer
- 16 sign off on the device. And in February they sent that
- 17 device to the Chief of the Division of Water Rights, to
- 18 Victoria Whitney, who in an E-mail to them said she never
- 19 got the plan. They E-mailed it to her again. And they're
- 20 still waiting to hear from what the prosecution team says
- 21 is the only person that can approve that device, is the
- 22 Chief of the Division of Water Rights.
- 23 They've submitted the plan. They've submitted an
- 24 engineering plan. They've submitted a compliance plan
- 25 where they said that they would go get Fish and Game

- 1 approval. They've already contacted Fish and Game.
- 2 They've offered to on a monthly basis get a hand-held flow
- 3 meter and measure the bypass flow devices and report those
- 4 on a monthly basis to the Division of Water Rights.
- 5 I don't understand where the threat is. And, in
- 6 fact, in my conversations in an attempt to settle this
- 7 matter, members of the prosecution team told me for all
- 8 practical purposes that the device that they submitted and
- 9 the calculations would satisfy that condition. And now
- 10 there's discussion that it needs to be made of steel. The
- 11 Vineyard Club thinks that that's ridiculous and that --
- 12 STAFF COUNSEL BULLOCK: I need to --
- MR. KELLY: -- would prohibit them -- this is an
- 14 opening statement.
- 15 VICE CHAIRPERSON WOLFF: I'll ask what I believe
- 16 might be the question, which is: Do you intend to produce
- 17 evidence to that effect?
- 18 MR. KELLY: Absolutely. And there's actually
- 19 evidence in the record, and there are letters and
- 20 communications and E-mails between myself and the
- 21 prosecution team on this matter. That is in the
- 22 testimony.
- VICE CHAIRPERSON WOLFF: We'll get there then.
- 24 Great. Thank you.
- MR. KELLY: I guess in sum, the evidence is going

- 1 to show there's no current violation and there's
- 2 absolutely no threat of a violation of any condition in
- 3 that water right license. There absolutely is none. And
- 4 the evidence also is going to show, and I believe already
- 5 shows, that there's really -- the harm that the
- 6 prosecution team alleges in their testimony and in the
- 7 Administrative Civil Liability complaint isn't there.
- 8 It's not there. And I think that you've already heard
- 9 testimony in that regard. But because this opening
- 10 statement came after the cross-examination, I think that
- 11 the evidence doesn't show that.
- 12 And with that, I'd like to bring up the witnesses
- 13 from The Vineyard Club.
- 14 DIRECT EXAMINATION
- 15 BY MR. DANIEL KELLY, ESQ., representing The Vineyard Club,
- 16 Inc:
- 17 Mr. Sagues, can you state your name and your
- 18 address for the record please.
- 19 MR. SAGUES: My name is Peter Sagues. My address
- 20 is 390 Deer Path Drive, Geyserville, California.
- 21 MR. KELLY: Mr. Sandell, can you do the same
- 22 please.
- MR. SANDELL: Yes. My name is Bert Sandell. I
- 24 live at 3348 Paradise Drive, Tiburon, California.
- 25 MR. KELLY: Did you both prepare testimony and

- 1 qualifications for this proceeding?
- 2 MR. SAGUES: Yes, we did.
- 3 MR. SANDELL: Yes.
- 4 MR. KELLY: And to your knowledge, is that
- 5 testimony a part of the exhibits submitted by the Vineyard
- 6 Club?
- 7 MR. SAGUES: Yes.
- 8 MR. SANDELL: Yes.
- 9 MR. KELLY: Okay. Possibly take turns. And
- 10 perhaps, Peter, maybe you can go first and provide the
- 11 hearing team with a summary of your testimony.
- 12 MR. SAGUES: Yes, sir.
- Dr. Wolff.
- 14 My name is Peter Sagues. I'm the Facilities
- 15 Manager for the Vineyard Club in Geyserville. The
- 16 Vineyard Club is an organization of about between 80 and
- 17 90 families, and fluctuates slightly, who live -- most of
- 18 the them live within a mile or two of the Vineyard Club
- 19 Lake.
- 20 The Vineyard Club -- my job as Facilities Manager
- 21 is maintaining the grounds, the clubhouse, the lake. The
- 22 Vineyard Club operates a great deal as a volunteer
- 23 organization. I started out -- I've been a member for
- 24 about eight years. And one of the first things I was
- 25 asked was to be on the Board of Directors of the Vineyard

- 1 Club. It's a nonpaying volunteer job. I was asked, I
- 2 found out later on, because I have a general contractor's
- 3 license and they needed a lot of remodeling done at the
- 4 club. And I did volunteer my services for that.
- 5 And then when an opening came to be facilities
- 6 manager, I was asked to take that. It is a job that pays
- 7 \$750 a month. I just mention that because it's virtually
- 8 a volunteer job. And as such, I do not study necessarily
- 9 all of the documents as carefully as I might if it were a
- 10 full-time position.
- I would like to cover the date of the inspection.
- 12 I received a call from Larry Lindsay asking me if I would
- 13 accompany him on an inspection. And we met at the parking
- 14 lot of the Vineyard Club, and Larry offered to drive me up
- 15 to the diversion site.
- I do not recall him giving me a copy of the
- 17 permit. There's a good possibility. And if so, it was
- 18 left either in his car or his truck.
- 19 We hiked into the diversion, as Mr. Lindsay
- 20 mentioned. It is quite a substantial hike. And I offered
- 21 to carry some of his equipment in with him. He had quite
- 22 a bit of equipment and it was a pretty strenuous hike.
- When we got to the site, Mr. Lindsay immediately
- 24 mentioned that there was no bypass device and asked me if
- 25 I knew about that. And I had no knowledge of it.

1 He did not ask me whether or not we had diverted

- 2 any water in the previous year. And, indeed, the pipeline
- 3 was not hooked up the previous year. 2005 was the first
- 4 year when I as manager -- when we had a diversion pipe
- 5 hooked up while I was manager.
- 6 Mr. Lindsay looked around, took quite a number of
- 7 photographs. And at one point I remember him walking to
- 8 the left of these photographs that you see. And on the
- 9 left there was a pile of debris. There was some pieces of
- 10 pipe and some pieces of plywood. And he said, "Oh, this
- 11 look likes this might be the old diversion or the old
- 12 bypass device part of the diversion dam." And he went
- 13 over with his camera and took pictures of that bypass
- 14 device and commented on it. And I did not go over and
- 15 take a look at that.
- And he said he wanted to try and measure the flow
- 17 of water in the stream. And he took out what he
- 18 identified as a Montana flume. And I offered to help him
- 19 with trying to divert the water through the stream. And
- 20 what we did was to, by hand -- we did not have any
- 21 tools -- we dug out rocks and gravel from the bottom of
- 22 the stream and set the Montana flume in -- and it has a
- 23 small skirt on the outside of a small canvas or plastic
- 24 tarp -- and weighted the corners of that down. And it is
- 25 my memory, and it's very clear to me, that we did not put

1 the flume directly on top of rock, that is, it went on top

- 2 of pieces of boulder and rock. It did not get down to,
- 3 say, the base bedrock at the bottom of the stream.
- We spent probably ten minutes or so wading in the
- 5 creek -- and we did not have boots and it was May, it was
- 6 very cold -- and diverted the water. And one thing that I
- 7 noticed was that a great deal of the water was bypassing
- 8 the flume. It's very difficult to build a dam out of
- 9 rocks the water was flowing. And, in fact, the
- 10 photographs that Mr. Lindsay showed the water to be
- 11 flowing.
- 12 After those measurements were made Mr. Lindsay
- 13 indicated that if the water got up to the .3 mark on his
- 14 Montana flume, that we were probably all right, that
- 15 probably there was enough flow in the creek. So I was not
- 16 concerned that we were not bypassing enough water to meet
- 17 our requirements.
- 18 Before we left the creek -- we were collecting
- 19 the gear and getting it altogether to get ready to carry
- 20 out. And it was very clear to me that Mr. Lindsay -- I
- 21 was asking him what a bypass device was and how it would
- 22 work. And he said, well -- and he volunteered that he had
- 23 some photographs and/or some drawings in his office and he
- 24 would send them over to me, and that what we needed to do
- 25 was to contact a licensed engineer or a civil engineer and

1 have a bypass device designed before we could divert more

- 2 water.
- 3 And it is also very clear to me that he said,
- 4 "Well, there's not going to be enough time the rest of
- 5 this season to build" -- "have a device engineered and
- 6 built before the end of May." This was the 4th of May,
- 7 and it going be the 31st the end of our diversion season.
- 8 So there was no discussion about whether or not
- 9 we should take out the pipeline, what we should do. It
- 10 was just that's where we stand, nothing can be done this
- 11 season. But he said, "Before you divert any water next
- 12 season, I want to see an engineered bypass device built
- 13 into that diversion dam."
- 14 Let me check my notes. One more.
- 15 Also, Mr. Lindsay did not say anything about
- 16 taking out the pipeline where -- it was my concern, now
- 17 thinking about it now, is that there was a possibility
- 18 that near the end of May as water levels gradually dropped
- 19 in that creek there would be a possibility that no more
- 20 water would be flowing over the top of the dam and any
- 21 water that was left would be going out through our
- 22 pipeline. So there was certainly a possibility that our
- 23 pipeline would have drained all of the water in the creek.
- 24 That was a possibility.
- 25 There was a small amount of leakage around the

1 dam itself. It's just a piece of plywood slipped down

- 2 into a slot of steel -- steel and concrete, so it tended
- 3 to leak around the edges. But there would have been very
- 4 little water bypassing that. And there was a possibility
- 5 that for a short time, until the water level dropped below
- 6 our pipeline, that no water would have been available to
- 7 go on downstream.
- 8 But it is very clear to me that I was not asked
- 9 to remove the pipeline because we're in violation. And
- 10 certainly if I had known then what I know now, that it
- 11 might cost as much as \$500 a day for that period, from May
- 12 5th to May 31st, I would taken it out to save half a day.
- 13 I would have taken it out by noon that day.
- 14 We walked back out, which is a pretty steep
- 15 climb, and went down to the lake where I helped Mr.
- 16 Lindsay to measure water coming out of the pipeline. And
- 17 to do that we waded out into the lake. I'm just
- 18 mentioning this because it was a matter of cooperating.
- 19 And I felt like cooperating everything -- I felt our
- 20 relationship was very good and got along very well with
- 21 Mr. Lindsay.
- 22 MR. KELLY: Did you ever receive any of the
- 23 information that Mr. Lindsay indicated he would send you
- 24 with regard to bypass devices?
- MR. SAGUES: No, I did not. And, in fact, you

1 know, he did mention -- we did talk about getting a report

- 2 or getting some information. I don't know the exact
- 3 wording of that, but he was going to let me know the
- 4 results of the inspection. And I did call two times, one
- 5 in March -- and these were all calls that I instigated.
- 6 In my E-mail I said, "Thank you for your call, Larry." I
- 7 had placed a call to him and left a voice mail with him
- 8 and he called me back. I should have said, "Thank you for
- 9 calling back."
- 10 So I did call him at that time. And during that
- 11 call -- the first call was in August where I asked him for
- 12 a copy of the permit. And also just asked him for a copy
- 13 of the report.
- 14 The call that I remember was the one -- remember
- 15 best was the one in March where we were getting near our
- 16 diversion season and we wanted to get started and I'd not
- 17 heard any word from him on how to design a bypass device,
- 18 the information he promised me. And the thing that sticks
- 19 very clearly in my mind was when I asked Mr. Lindsay about
- 20 that information and the report, he was hesitant and he
- 21 apologized and he was stumbling a bit, said, "You know,
- 22 Peter, we're in a difficult situation right now. I can't
- 23 really tell you very much, because somebody up higher in
- 24 the Board is trying to decide whether or not there will be
- 25 enforcement action for the Vineyard Club on small projects

1 like yours. Frankly, "he said, "the Water Resources Board

- 2 is in a situation" -- "a difficult financial situation.
- 3 We're trying to decide whether we can even fund these
- 4 sorts of enforcement actions."
- 5 I misunderstood "enforcement," of what that
- 6 meant. I thought it had to do with straightening out
- 7 situations. I didn't realize that enforcement meant
- 8 specifically fines or ACLs. All of that language pretty
- 9 much went over my head at the time.
- 10 MR. KELLY: And Did you know -- when you asked
- 11 Mr. Lindsay for the results of the inspection, did you
- 12 know that you should have asked specifically for the
- 13 official report that was prepared? I mean what did you
- 14 think you were going to get from Mr. Lindsay pursuant to
- 15 your request?
- 16 MR. SAGUES: I expected that I might get a report
- 17 similar to what I get on any other inspections where I am
- 18 dealing with agencies. My job as a general contractor and
- 19 prior to that as a factory manager for a company I was
- 20 with for 16 years, I was subject to many inspections.
- 21 There have probably been several hundred inspections where
- 22 I have been the representative of the organization. These
- 23 are anybody from OSHA to NIOSH to Workmen's Compensation
- 24 Boards. There could be audits by a variety of different
- 25 organizations.

- 1 And now of course as a general contractor, I'm
- 2 dealing with planning departments, building departments,
- 3 sewage -- you name it -- fire marshals. There are people
- 4 inspecting all the time.
- 5 And in almost all of these cases either there is
- 6 a report immediately, where there is a note with a list of
- 7 items, such as in a building job, at the end of the job
- 8 we're asking for a final, they might give me a list of ten
- 9 things to take care of. That would be enough of a report
- 10 for me. In others the report will -- in the case of a
- 11 building permit, will be signed off. In the case of an
- 12 OSHA inspection, there would be a report made within a
- 13 couple of weeks after that.
- 14 So I was expecting the facts of the inspection to
- 15 be revealed to me.
- 16 MR. KELLY: Thank you.
- 17 Mr. Sandell.
- 18 MR. SANDELL: Yes. Good afternoon. Just to
- 19 summarize my written testimony.
- 20 As Peter mentioned, the Vineyard Club is an
- 21 organization, really a homeowners' association of about 80
- 22 to 90 families. And they come together for recreational
- 23 purposes. One of the primary assets of the club is this
- 24 26-acre lake.
- 25 Since the early sixties when it was first

1 developed, like a lot of warm water lakes, it's had severe

- 2 algae and weed growth problems. The primary method of
- 3 treating those problems historically has been the
- 4 application, under the appropriate guidelines, I assume,
- 5 of copper sulfate and other defoliant agents.
- 6 As an avid fisherman, a father of two kids, I
- 7 decided that we could do some things a little differently
- 8 there. In working with Peter and a small group of
- 9 volunteers, we stopped applying the chemicals and we
- 10 instituted a program that involved a number of things.
- 11 The pipeline connection was an important item. For
- 12 example, we installed the whole lake aeration system,
- 13 similar to those used by fisheries. We began a manual
- 14 dredging of weeds in the lake and perfected some systems
- 15 that we use about six days a year, in effect, to mow the
- 16 lake. We worked with Fish and Game and introduced a
- 17 number of naturally occurring microbes to keep the algae
- 18 levels down. And we started a very detailed measurement
- 19 of what was going on in the lake.
- 20 In my qualifications, I noted that I have an
- 21 industrial engineering degree and operations research
- 22 degree from the University of California at Berkeley. My
- 23 kids claim I'm a nerd, and I'm proud of that.
- 24 But one of the things we did is on a biweekly or
- 25 monthly basis we now measure the lake for pH at the

1 surface and six feet down, we measure dissolved oxygen, we

- 2 measure turbidity, and we measure water temperature,
- 3 really to establish how we're doing on the lake.
- 4 Anyway, as I mentioned earlier, one important
- 5 element of lake maintenance is to keep the level of the
- 6 lake up. When the lake level is higher, the weeds don't
- 7 reach the surface, they don't interfere with fishing,
- 8 boating, swimming, the things that people love to do
- 9 there.
- 10 And so the diversion was not set up in 2004, as
- 11 Mr. Sagues testified. But with a small group I rallied
- 12 and we installed the diversion in 2005, with the objective
- 13 of getting the water level up. It was a dry year. We had
- 14 real concerns. I was not aware of the need for a bypass
- 15 device. I would have been glad to install it. Had I cut
- 16 a hole, none of us would be here today, and we would have
- 17 gladly done it.
- 18 The next involvement I had with the dam -- well,
- 19 excuse me. Peter called me after the inspection and let
- 20 me know that we didn't need to take the dam down this
- 21 season, but that in the future we needed to install a
- 22 bypass device. And so on May 29th I dismantled the dam
- 23 personally. And at that time, I would say there was good
- 24 flow around the diversion. The creek was far from dry.
- 25 If you were to look at the photographs taken during the

- 1 May 4th or May 5th inspection, I would say it was
- 2 generally in that range of overflow. Although I didn't
- 3 have any measuring devices, it was clearly far from dry.
- 4 Nevertheless, when the Vineyard Club received the
- 5 ACL and the CDO in December of 2006, Mr. Sagues was
- 6 traveling overseas, and I stepped in to try to help figure
- 7 out how we meet the requirements of the Water Board to get
- 8 a device that worked.
- 9 As part of my job, I'm involved with the
- 10 construction of commercial real estate. I work with
- 11 architects, engineers, consultants on a daily basis. At
- 12 this time I have a large structural upgrade going with a
- 13 warehouse. And one of the things that I like to do is to
- 14 provide those consultants and engineers with direction.
- 15 It's very important not just to give them a blank slate,
- 16 because then you get a bill that you didn't expect.
- 17 So in an effort to understand what it was exactly
- 18 the Board wanted, I first of all asked for a copy of the
- 19 report, at Peter's suggestion. We were able to talk. And
- 20 Mr. Lindsay provided it to me in short order. I know that
- 21 that was something Peter was frustrated he hadn't been
- 22 able to find or to get.
- 23 And I started a series of conversations with
- 24 various members of the Board staff, Mr. Lindsay, a
- 25 gentleman named Mr. O'Hagan. And my objective was to

1 figure out what they wanted. We were happy to provide it.

- We just needed to know what was needed.
- 3 And, you know, in Mr. Lindsay's testimony I see
- 4 that he was trying to lead me in the right direction.
- 5 Well, how about just telling me what it was they wanted.
- 6 I would have been happy to do it. We weren't trying to
- 7 play any games. What we wanted to do was meet the
- 8 requirement and go back to enjoying our lake.
- 9 Nevertheless, we did make some progress. On
- 10 February 1st I sent a letter to Division Chief Whitney
- 11 that included, not only a design, but also a workplan for
- 12 the diversion. And that workplan specifically said that
- 13 we would log on a monthly basis and hand measure with a
- 14 hand-held device the flow -- the bypass flows to ensure
- 15 that we were in compliance. It did not -- the plan did
- 16 not specifically call out the materials. And at some
- 17 point hopefully I'll have a chance to comment on those
- 18 materials.
- But as of the time I wrote my testimony, which
- 20 was on or about March 12th, we had not heard back from the
- 21 Board. I still have not received anything from Ms.
- 22 Whitney telling me what we need to do or don't need to do.
- 23 We are more than happy to try to get it done.
- 24 And so that is a summary of the testimony.
- 25 MR. KELLY: Is the Vineyard Club the only entity

- 1 that uses the lake?
- MR. SANDELL: No. On a periodic basis it's my
- 3 understanding that it's used by the CDF for firefighting
- 4 purposes as well.
- 5 MR. KELLY: And how do they use the like for
- 6 firefighting purposes?
- 7 MR. SANDELL: You, know I've not seen it, but
- 8 I've always wanted to. It's my understanding that they'll
- 9 fly over with a bucket hung from a helicopter and scoop
- 10 it, fly to the fire site and dump it.
- 11 MR. SAGUES: I actually have witnessed CDF coming
- 12 in several times with their helicopter taking water.
- 13 MR. KELLY: Has it ever been either of your
- 14 intent or the club's intent to try to dodge the
- 15 requirement to install a measuring device before you
- 16 divert again?
- MR. SAGUES: No, never.
- 18 MR. SANDELL: Quite the contrary. It would be
- 19 wonderful to get some formal feedback telling us what we
- 20 need to do to adjust the plan that was submitted on
- 21 February 1st.
- 22 MR. KELLY: And had you received that information
- 23 back in August of '05, Peter, I think when you contacted
- 24 the Board, or in March of '06, when you again informed the
- 25 Board -- if you'd have received information way back then,

- 1 would you have started the process of getting something
- 2 together if you knew specifically what they required?
- 3 MR. SAGUES: If we had had the general standards
- 4 of what the Board required for that, we would have hired a
- 5 civil engineer to design it for us, yes.
- 6 MR. KELLY: Okay. And, Bert, you talked a little
- 7 bit about the plan that the Vineyard Club submitted to Ms.
- 8 Whitney. Did you receive an E-mail after it was submitted
- 9 from Ms. Whitney with regard to that plan
- 10 MR. SANDELL: Yes. Subsequently I sent Ms.
- 11 Whitney a follow-up letter asking for feedback. She sent
- 12 me an E-mail saying that she'd not received the letter due
- 13 to some administrative reasons. Now, that was sent via
- 14 E-mail and via U.S. mail. So I was a little concerned
- 15 about the distribution process. Nevertheless, she told me
- 16 that she would get back to me personally. The response I
- 17 did get -- so that was around, oh, March 12th, 13th, 14th
- 18 I sent follow-up letter. On March 23rd, a gentleman, I
- 19 believe his name was James Castle, I received a letter --
- 20 I viewed a letter from him saying that -- advising Ms.
- 21 Whitney not to approve the plan, but again not providing
- 22 specifics about what they'd like to see.
- 23 MR. KELLY: Okay. And the plan that you
- 24 submitted to Ms. Whitney that's part of the record, was
- 25 that actually signed by a professional engineer?

1 MR. SANDELL: Yes, an engineer reviewed the

- 2 calculations, provided a stamp on that. He provided a
- 3 cover letter that explained that he reviewed the
- 4 calculations and the bypass methodology and was -- it met
- 5 with his approval. He noted in there -- he qualified it.
- 6 He said that the -- he was not certifying the structural
- 7 integrity of the dam, which wasn't something we were
- 8 after. After all, if the dam breaks and fails, there's no
- 9 bypass -- there's no diversion and there's no bypass. So
- 10 it didn't seem to make sense to pay him to do that.
- 11 MR. KELLY: And you mentioned some -- you
- 12 mentioned that the plan didn't include specifics about the
- 13 material of the diversion structure, the measuring device.
- 14 Can you talk a little bit more about what you've heard and
- 15 about that issue?
- 16 MR. SANDELL: Sure. I'm certain that that plan
- 17 is in an exhibit and its part of the materials that have
- 18 been provided. But subsequent to that, I believe it was
- 19 Mr. Castle's letter talked about the materials, the
- 20 orifice opening, and a plan to make sure that the bypass
- 21 conformed to the calculations.
- 22 As I just noted, the material of the weir or the
- 23 dam is not particularly relevant. What's relevant is the
- 24 bypass. As a matter of fact, were we to build this out of
- 25 metal, it would create a problem with inserting it and

1 removing it every year. Now, here we have a small stream

- 2 that, at best, is maybe a little wider than this table.
- 3 In the winter months this thing will get eight feet, nine
- 4 feet deep, as evidenced by the debris and the brush being
- 5 depressed on the side of the stream. So if we were to put
- 6 something in there and leave it there on a seasonal basis,
- 7 after one season it would be completely backfilled with
- 8 debris, rocks, gravel. And it could potentially damage
- 9 the concrete structure that holds the flashboards. So we
- 10 really need something that's light and can be installed on
- 11 a seasonal basis. So that addresses the material.
- 12 The other question had to do with the orifice
- 13 opening. Now, in our calculations, we used a worst-case
- 14 scenario, and we reduced the volume coming through that
- 15 orifice by 40 percent. So if we had just about the worst
- 16 orifice possible, I feel we would still have the bypass.
- 17 Nevertheless, we've agreed and we've stated in a written
- 18 plan that we're willing to measure this at the time of
- 19 installation and on a monthly basis at all times we're
- 20 diverting water, and log it, and present that to any Board
- 21 representatives that wanted to see it at any time. And
- 22 because of that, I'm not sure that the material or the
- 23 orifice are as important as the fact that we're able to
- 24 demonstrate and log that we've got adequate bypass, which
- 25 is really the objective.

- 1 MR. KELLY: And --
- 2 SENIOR STAFF COUNSEL KATZ: Could I interrupt for
- 3 just a second?
- 4 MR. KELLY: Certainly.
- 5 SENIOR STAFF COUNSEL KATZ: We're trying to keep
- 6 track of exhibits as they come up. So when he's
- 7 talking --
- 8 MR. KELLY: VC-18 I believe is the letter to Ms.
- 9 Whitney with the plan and the device.
- 10 SENIOR STAFF COUNSEL KATZ: Okay.
- 11 MR. KELLY: And I believe that all of the -- the
- 12 written testimony actually cites to the specific exhibits
- 13 that they're talking about.
- 14 SENIOR STAFF COUNSEL KATZ: Thanks. We're just
- 15 trying --
- 16 MR. KELLY: They just don't have their --
- 17 SENIOR STAFF COUNSEL KATZ: Yeah, we're just
- 18 trying to clarify this.
- 19 MR. KELLY: I appreciate that. And it was VC I
- 20 believe 18.
- 21 WATER RESOURCES CONTROL ENGINEER McCUE: He also
- 22 mentioned an exhibit -- or I mean a letter from Jim
- 23 Castle, that I'm not sure is an exhibit. Are you making
- 24 it an exhibit or --
- 25 MR. KELLY: I don't know -- it came from the

- 1 prosecution team and it went to Vicky Whitney. And Jim
- 2 Castle sent the letter, and it was just a day or so ago.
- 3 And I --
- 4 STAFF COUNSEL BULLOCK: Would you like me to
- 5 speak to that -- would that be helpful? -- in terms of
- 6 where it is?
- 7 MR. KELLY: Sure.
- 8 STAFF COUNSEL BULLOCK: I believe it's in the --
- 9 not in the hearing record, but it is a part of the record
- 10 for the Vineyard Club file.
- 11 MR. KELLY: Yeah, it was just a day or so ago,
- 12 which is why it wasn't submitted as part of the submittal
- 13 package. It was actually just sent.
- 14 VICE CHAIRPERSON WOLFF: Well, I may not be aware
- 15 of it. Is it being entered into this record? Because if
- 16 they've testified about it, then we need to have the
- 17 exhibit to support the testimony.
- 18 MR. KELLY: Well, it's certainly part of the
- 19 administrative -- it's not part of the hearing record to
- 20 date and it's not been submitted as an exhibited. But to
- 21 the extent now that they've testified about it, I would
- 22 include that in the documents that we want to move then
- 23 into evidence. And the hearing team actually I believe
- 24 should -- I don't know who it was distributed to actually.
- 25 VICE CHAIRPERSON WOLFF: Is this the letter in

- 1 which the hearing -- in which the prosecution team
- 2 recommends that the device be durable?
- 3 MR. KELLY: No, it's the -- it is a letter
- 4 wherein the prosecution team -- and I'm try to be fair --
- 5 expresses concern with the device and I think recommends
- 6 that it needs to be -- Mr. Lindsay testified that --
- 7 SENIOR STAFF COUNSEL KATZ: The March 23rd letter
- 8 to --
- 9 MR. KELLY: That sounds right. I think -- Mr.
- 10 Sandell, do you have an actual copy?
- 11 MR. SANDELL: Yes, I do have a copy. I can read
- 12 the relevant section.
- 13 SENIOR STAFF COUNSEL KATZ: Is it the March 23rd,
- 14 2007, letter from Jim Castle to Victoria Whitney?
- 15 MR. SANDELL: Yes. But it's stamped as opposed
- 16 to a written. That's right.
- 17 SENIOR STAFF COUNSEL KATZ: Yeah, okay. I've got
- 18 that.
- 19 WATER RESOURCES CONTROL ENGINEER McCUE: So that
- 20 would be Vineyard Club 43?
- 21 MR. KELLY: If that's the next in order, I would
- 22 certainly appreciate if the hearing team could mark that,
- 23 yes.
- 24 VICE CHAIRPERSON WOLFF: And let me clarify then.
- 25 I have seen that letter. And I have no objection to it

- 1 being entered as an exhibit. But the relevance of the
- 2 letter goes to the issue of whether the prosecution team
- 3 has performed in a punitive or acted in a punitive manner
- 4 or not. We do not have before us here the issue of
- 5 whether to approve or not to approve a measuring device.
- 6 That's not an issue before us. Only the ACL and the CDO
- 7 are before us.
- 8 MR. KELLY: Although, Dr. Wolff, I will say --
- 9 and perhaps somebody from the prosecution team can confirm
- 10 it, and I think it might be Mr. O'Hagan -- that in one of
- 11 the E-mail correspondence, and I can locate it, I think
- 12 that Mr. O'Hagan may have suggested that the device can be
- 13 approved by Victoria Whitney or approval of the device can
- 14 occur as a part of this hearing process. Is that -- Am I
- 15 recalling that correctly? And I can locate that --
- 16 VICE CHAIRPERSON WOLFF: What is the point you're
- 17 trying to make though?
- 18 MR. KELLY: You just said that it's not part of
- 19 this process, the approval of the device. And I think the
- 20 prosecution team actually had suggested that the result of
- 21 this can be an approval of that device.
- 22 STAFF COUNSEL BULLOCK: I don't think that's
- 23 quite accurate.
- 24 VICE CHAIRPERSON WOLFF: Okay. That's not a
- 25 matter before us. It's possible that someone said that.

1 I'm not certain. But whether they did or they didn't,

- 2 that's not the matter before us.
- 3 MR. KELLY: Okay.
- 4 VICE CHAIRPERSON WOLFF: We have an ACL and a CDO
- 5 before us.
- 6 So certainly this letter is relevant to the
- 7 question of potentially punitive behavior. I don't
- 8 anticipate our making a decision about the measuring
- 9 device as part of the resolution of -- you know, that
- 10 grows out of this hearing.
- 11 MR. KELLY: Okay. Thank you.
- 12 VICE CHAIRPERSON WOLFF: I see no basis for our
- 13 even being able to do that as a matter of law.
- 14 MR. KELLY: Okay. One last thing.
- Do you have something else to add?
- MR. SANDELL: Yes, I wanted to comment that my
- 17 March 19th letter to Ms. Whitney asking for a response
- 18 also noted that we would be more than happy to -- quote,
- 19 "The club can reinstall the system that was approved by
- 20 the Board at the time the permit was issued." So I also
- 21 offered. And as part of this, I attached a document, that
- 22 is actually one of the exhibits, showing the design and
- 23 the photograph. And we've seen this already. I just
- 24 don't have the exhibit number off the top of my head.
- 25 MR. KELLY: So the Vineyard Club is willing to

- 1 either install the proposed plan that signed by an
- 2 engineer or the plan that was apparently previously
- 3 approved by the Board?
- 4 MR. SANDELL: Absolutely.
- 5 MR. KELLY: Okay. There's some suggestion I
- 6 believe in the testimony and documentation that there
- 7 should be a requirement that a PE actually install this
- 8 device. Do you have any thoughts on that?
- 9 MR. SANDELL: I do. Engineers are consultants.
- 10 It would not be an appropriate use of funds to pay an
- 11 engineer to physically install a flashboard weir and a
- 12 diversion dam. That's not the industry -- that's not the
- 13 standard use of engineers, to physically do the manual
- 14 labor themselves.
- 15 MR. KELLY: Thank you.
- 16 Thank you, Dr. Wolff. And I think with that I'll
- 17 turn them over for cross-examination.
- 18 VICE CHAIRPERSON WOLFF: Before we begin that,
- 19 you had listed some other witnesses in your notice of --
- 20 whatever it is -- intent. There were some other witness
- 21 you were going to call, some adverse witnesses?
- 22 MR. KELLY: Yeah, Dr. Wolff. It was our intent
- 23 to call members that -- after our preliminary review of
- 24 the file had indicated that other people had worked on
- 25 this matter.

1 And, frankly, I had no idea which of those people

- 2 that the prosecution team would call as witnesses.
- 3 Ms. Whitney, who I would have liked to have
- 4 talked to about the communications, is unavailable, and I
- 5 learned that. And at this point, I think that I don't
- 6 necessarily need their testimony, that the exhibits that
- 7 the Vineyard Club has submitted are sufficient for the
- 8 purposes that we would have required those folks for.
- 9 Thank you.
- 10 VICE CHAIRPERSON WOLFF: Okay. Thank you.
- 11 Cross-examination. Please proceed, Mr. Bullock.
- 12 CROSS EXAMINATION
- 13 BY MR. MATTHEW BULLOCK, STAFF COUNSEL, representing the
- 14 Division of Water Rights:
- 15 Mr. Sandell, I'd first like to say we do
- 16 appreciate your concern for the water quality in your
- 17 lake. And that's a good thing. We fully support that.
- 18 I do want to ask, the water from Oak Flat Creek,
- 19 without the diversion would that be going into your lake
- 20 or does that go someplace else?
- 21 MR. SANDELL: It does not go into the lake.
- 22 STAFF COUNSEL BULLOCK: Okay. So it's being
- 23 diverted separately?
- 24 MR. SANDELL: That's correct.
- 25 STAFF COUNSEL BULLOCK: Mr. Sagues -- and I

1 apologize if I get your name wrong. Feel free to correct

- 2 me.
- 3 On the day of the inspection was there a
- 4 measuring device installed in Oak Flat --
- 5 MR. SAGUES: No. No, there was not a measuring
- 6 device.
- 7 STAFF COUNSEL BULLOCK: And was there a measuring
- 8 device installed at any time in 20057
- 9 MR. SAGUES: No, there was not any time during
- 10 2005.
- 11 STAFF COUNSEL BULLOCK: Okay. How long have you
- 12 been the club manager?
- 13 MR. SAGUES: I've been club manager since 2003.
- 14 And you remember, 2005 was the spring of 2005. So I
- 15 started in the summer of 2003.
- 16 STAFF COUNSEL BULLOCK: Okay. Mr. Sandell, you
- 17 helped to install the diversion pipeline in 2005?
- 18 MR. SANDELL: Yes, I did.
- 19 STAFF COUNSEL BULLOCK: Okay. And when did you
- 20 do that?
- 21 MR. SANDELL: You know, I don't have an exact
- 22 date. It was probably -- mid to late March would be my
- 23 guess.
- 24 STAFF COUNSEL BULLOCK: But you don't know more
- 25 specifically?

- 1 MR. SANDELL: I don't have an exact date.
- 2 STAFF COUNSEL BULLOCK: Not the last day of March
- 3 or first day of -- sometime middle to late?
- 4 MR. SANDELL: Yeah, I think I installed it and --
- 5 and it's about a mile and a half pipe, and it is a heck of
- 6 a thing to get started. So I think we installed it, it
- 7 stopped. We had to -- it gets air in it. And so it was
- 8 probably installed mid to late March. And by the time we
- 9 got it up and going -- I'm not sure. I had to hike that
- 10 trail at least five, six times. I brought my kids and
- 11 wife down there one time trying to bleed the line of air.
- 12 So continuous operation I'm unclear on. But it probably
- 13 was, I don't know, early, mid April through the time I
- 14 disconnected it on March -- excuse me -- May 29th.
- 15 STAFF COUNSEL BULLOCK: But your testimony --
- 16 your written testimony was mid to late March; is that
- 17 correct?
- 18 MR. SANDELL: For the diversion dam installation,
- 19 that's right. And as I said, the water -- the operation
- 20 of the diversion is a little different.
- 21 STAFF COUNSEL BULLOCK: Sure.
- 22 Do you know when in 2005 the Vineyard Club
- 23 stopped diverting water from Oak Flat Creek?
- 24 MR. SANDELL: Yes, I personally stopped the
- 25 diversion and dismantled the dam on May 29th. And the

1 reason I know that is because I wrote it in my notebook

- 2 for the lake measurements.
- 3 STAFF COUNSEL BULLOCK: Part of your job is to
- 4 help to put the diversion works in; is that correct?
- 5 MR. SANDELL: Well, it's not a job. Its a
- 6 volunteer effort. It's all volunteer.
- 7 STAFF COUNSEL BULLOCK: Your position, how about
- 8 that?
- 9 MR. SANDELL: Yeah. Well, you know, it's kind of
- 10 unclear. That's the way these volunteer organizations
- 11 work. And I recognize that it -- to preserve the lake
- 12 quality, as I mentioned earlier, it was one of five
- 13 important steps. And nobody else was going to do it, so I
- 14 did it.
- 15 STAFF COUNSEL BULLOCK: And how long have you
- 16 been helping with the installation?
- 17 MR. SANDELL: Well, that was the only time I did
- 18 it. And I haven't done it -- it hasn't happened since.
- 19 STAFF COUNSEL BULLOCK: How long have you been
- 20 the Chair of the Vineyard Club?
- 21 MR. SANDELL: I tried to get out of it a couple
- 22 times. But probably since 2003, about the time Peter came
- 23 on board.
- 24 STAFF COUNSEL BULLOCK: I believe in your written
- 25 testimony you said 2002. Does that sound --

- 1 MR. SANDELL: Okay. Late 2002, early 2003.
- 2 STAFF COUNSEL BULLOCK: Okay. To your knowledge,
- 3 has the Vineyard Club at any time that you were there ever
- 4 installed a measuring device?
- 5 MR. SANDELL: To my knowledge, no, because I
- 6 wasn't involved with it.
- 7 STAFF COUNSEL BULLOCK: Other than what you've
- 8 seen in the record from 1992, do you know of any time
- 9 one's been installed?
- 10 MR. SANDELL: Well, Jean Schettler's name shows
- 11 up on that document. Jean was on point for installing it
- 12 from that date until 2002. So an assumption would be,
- 13 since he was aware of it, his name was on it, that at all
- 14 times he was using the -- installing the bypass device.
- 15 STAFF COUNSEL BULLOCK: You're not personally
- 16 aware of it though?
- 17 MR. SANDELL: No.
- 18 STAFF COUNSEL BULLOCK: Mr. Sagues?
- 19 MR. SAGUES: No, I have no knowledge. I've not
- 20 seen it operating without the bypass or even -- I can't
- 21 even tell you what years it was operating.
- 22 STAFF COUNSEL BULLOCK: Do either of you have any
- 23 knowledge of what happened to the old device -- the old
- 24 measuring device?
- MR. SAGUES: My only knowledge of it was that

1 there were pieces of it or possibly the entire piece was

- 2 to the left of the diversion dam as you're -- from
- 3 downstream view. And Mr. Lindsay commented on that and
- 4 took some photographs of that. And that was my only
- 5 knowledge of -- I didn't even know what a bypass device
- 6 looked like at the time.
- 7 STAFF COUNSEL BULLOCK: Mr. Sandell, did anyone
- 8 from the Division attempt to help you with designing the
- 9 measuring device in the time after the inspection?
- 10 MR. SANDELL: Yes, I had contact with Mr. O'Hagan
- 11 and Mr. Lindsay. And their help involved -- I would
- 12 submit some calculations and there were some corrections.
- 13 What I wish had happened, because it would have made it a
- 14 lot easier, I wish they had just given me the document
- 15 that was approved, because it would have saved a lot of
- 16 paperwork, a lot of headache and some engineering fees.
- 17 STAFF COUNSEL BULLOCK: But the Division did make
- 18 efforts to help you to design it?
- 19 MR. SANDELL: Yes.
- 20 STAFF COUNSEL BULLOCK: Yes. Thank you.
- 21 When did you first hire an engineer to do work
- 22 relating to the measuring device?
- MR. SANDELL: You know, I'd have to look at my
- 24 notes here. But it was after those discussions.
- 25 STAFF COUNSEL BULLOCK: Sure. When was the first

- 1 time, if you know, that there was a response from the
- 2 engineer or any record of, from him, any knowledge for the
- 3 Division that you had hired an engineer?
- 4 MR. SANDELL: Sure. You know, again I'd have to
- 5 look through my notes, but it was after those discussions.
- 6 And I sent him as much progress as I'd made and asked him
- 7 if it was the kind of work he did and if he was willing to
- 8 help us out. And he responded. We had a couple
- 9 conversations. And then I sent him some material and he
- 10 stamped it and added his qualifying letter.
- 11 STAFF COUNSEL BULLOCK: And that letter -- that
- 12 first letter that at least the Division has -- if you have
- 13 previous letters, I'd like to speak to that -- but that
- 14 was on January 25th of 2007?
- 15 MR. SANDELL: It's the letter that was attached
- 16 to the letter I sent to Vicky Whitney on February 1st.
- 17 And we referenced it a little bit earlier. It's one of
- 18 the exhibits. I don't know which one.
- 19 STAFF COUNSEL BULLOCK: It's Water Rights 19, for
- 20 the hearing committee.
- 21 MR. SANDELL: Right. So that was -- I received
- 22 two communications with the engineer. One was that letter
- 23 and the other was a bill.
- 24 (Laughter.)
- 25 STAFF COUNSEL BULLOCK: Okay. Now, did he design

- 1 the device or did he just review your calculations?
- 2 He reviewed the calculations, which is quite --
- 3 you know, the objective is to meet the bypass requirement,
- 4 not to, you know, see who can design the system.
- 5 STAFF COUNSEL BULLOCK: Right. Do you have that
- 6 letter handy from --
- 7 MR. SANDELL: Maybe we could pull it up here.
- 8 STAFF COUNSEL BULLOCK: It's on I think it's page
- 9 4 of that exhibit you were just on.
- 10 You went by it. Back one more.
- 11 So if we can scroll down just a little bit.
- 12 MR. SANDELL: That's it.
- 13 STAFF COUNSEL BULLOCK: Okay. You have to give
- 14 me a second. I apparently need new glasses.
- 15 (Laughter.)
- 16 STAFF COUNSEL BULLOCK: Under the bullets -- that
- 17 paragraph under the bullets, the second sentence, can you
- 18 just read that for us quickly.
- 19 MR. SANDELL: Where it says, "The flashboard dam
- 20 and diversion pipe have been successfully installed" --
- 21 STAFF COUNSEL BULLOCK: Sorry. No, the paragraph
- 22 under the bullets, the second paragraph -- or second
- 23 sentence starting "as such".
- Oh, "As such my review of your plan consists
- 25 solely of reviewing the bypass opening and corresponding

- 1 calculations."
- 2 STAFF COUNSEL BULLOCK: So he only reviewed what
- 3 you had done?
- 4 MR. SANDELL: That's right. And he stamped and
- 5 approved it.
- 6 STAFF COUNSEL BULLOCK: Sure. And you're not a
- 7 civil engineer; is that correct?
- 8 MR. SANDELL: I'm not a civil engineer.
- 9 STAFF COUNSEL BULLOCK: Okay. Mr. Sandell, I'd
- 10 like to direct your attention to the last paragraph of
- 11 your testimony, if you have that in front of you.
- 12 MR. SANDELL: Okay. I'm there.
- 13 STAFF COUNSEL BULLOCK: Now, there's been talk,
- 14 quite a bit of talk today about your concern with the
- 15 environment. And in your testimony you state that -- this
- 16 is a quote -- "The Vineyard Club is always very careful to
- 17 follow the requirements imposed on it by all government
- 18 agencies." And you also state that you have worked over
- 19 the years to, quote, "comply with all laws and regulatory
- 20 requirements."
- 21 Do you still agree with your written testimony?
- 22 MR. SANDELL: You know, I might amend that to say
- 23 that we're always very careful to follow the requirements
- 24 we're aware of. Because had we been aware of this, I
- 25 guarantee you we wouldn't be here today.

- 1 STAFF COUNSEL BULLOCK: Sure.
- Mr. Sagues, you have similar statements in your
- 3 testimony. Would you want to make the same amendment to
- 4 your statements?
- 5 MR. SAGUES: I would.
- 6 STAFF COUNSEL BULLOCK: Okay. And, Mr. Sandell,
- 7 would you agree that your license is a requirement imposed
- 8 by a government agency?
- 9 MR. SANDELL: The permit and license issued in
- 10 1991?
- 11 STAFF COUNSEL BULLOCK: '92, yes.
- MR. SANDELL: '92. Well, sure.
- 13 STAFF COUNSEL BULLOCK: Okay. Until Mr. Lindsay
- 14 conducted his inspection and alerted you that there was a
- 15 violation and that you were facing enforcement, were you
- 16 following the requirements imposed by the State Water
- 17 Board?
- 18 MR. KELLY: I'm going to object to that as -- I
- 19 think the testimony's not clear that Mr. Lindsay informed
- 20 them of that information when he was at the inspection.
- 21 STAFF COUNSEL BULLOCK: I could rephrase the
- 22 question. That's fine.
- Until Mr. Lindsay conducted his inspection, were
- 24 you following the requirements imposed by the State Water
- 25 Board?

```
1 MR. SAGUES: Apparently not.
```

- 2 STAFF COUNSEL BULLOCK: So that's a no?
- 3 MR. SAGUES: That's correct.
- 4 STAFF COUNSEL BULLOCK: Up to that point had you
- 5 ever read your license to know what the requirements were,
- 6 Mr. Sandell?
- 7 MR. SANDELL: I had not.
- 8 STAFF COUNSEL BULLOCK: Mr. Sagues?
- 9 MR. SAGUES: No, I had not.
- 10 STAFF COUNSEL BULLOCK: Did you know that you had
- 11 a license, either of you?
- 12 MR. SAGUES: I was aware that there was some
- 13 requirements, that our major requirement was that we could
- 14 take water through the pipeline only until the end of May.
- 15 That was the only part of the requirement. I really
- 16 wasn't aware of who was -- who the authority was who said
- 17 that, but that was what my understanding was.
- 18 MR. SANDELL: If I may.
- 19 STAFF COUNSEL BULLOCK: Sure.
- 20 MR. SANDELL: I attempted to obtain a copy of the
- 21 license prior to doing the work. I got some material
- 22 related to it, but I wasn't able to actually obtain a copy
- 23 of the license itself.
- 24 STAFF COUNSEL BULLOCK: Could you clarify when?
- 25 MR. SANDELL: Yeah, this was before installing

- 1 the dam. And some of that literature indicated the
- 2 periods of diversion, but it did not include mention of
- 3 the bypass requirement, which is one of the requirements
- 4 of the license.
- 5 STAFF COUNSEL BULLOCK: So you did not have a
- 6 copy of your license?
- 7 MR. SANDELL: I did not have a copy of the
- 8 license at the time I oversaw the installation of the dam.
- 9 STAFF COUNSEL BULLOCK: Were you aware that it's
- 10 a public record and it's available here at the State Water
- 11 Board?
- 12 MR. SANDELL: Well, you know, these volunteer
- 13 things -- we all do volunteer things --
- 14 STAFF COUNSEL BULLOCK: I understand. I'm just
- 15 wondering if you knew or not.
- MR. SANDELL: No, no.
- 17 STAFF COUNSEL BULLOCK: Do you believe --
- 18 MR. SANDELL: I was just pretty happy that
- 19 someone was getting -- you know, that it was happening.
- 20 But -- go ahead. Sorry.
- 21 STAFF COUNSEL BULLOCK: Do you believe that
- 22 ignorance of the terms of your license is an excuse for
- 23 not following those terms?
- 24 MR. KELLY: I'm going to object to that question.
- 25 STAFF COUNSEL BULLOCK: Can I ask what --

```
1 VICE CHAIRPERSON WOLFF: On what grounds?
```

- MR. KELLY: On the fact that it's argumentative,
- 3 speculative, and simply unnecessary to use the word
- 4 "ignorance" in a question to a witness.
- 5 VICE CHAIRPERSON WOLFF: Well, let's take those
- 6 one by one.
- 7 Argumentative, I do not support your objection.
- 8 What was your second one? Speculative. It's
- 9 about a belief of the witness. I do not support that
- 10 objection.
- 11 And what was the third?
- 12 MR. KELLY: I think it's just an improper
- 13 question. I think that the fact that they didn't have the
- 14 license, claiming that that's ignorance, is inappropriate.
- 15 VICE CHAIRPERSON WOLFF: All right. Mr. Bullock,
- 16 please rephrase your question using words which are as
- 17 neutral as possible.
- 18 STAFF COUNSEL BULLOCK: Do you believe, Mr.
- 19 Sandell, that not knowing the terms in your license --
- 20 would you agree that you did not know the terms in your
- 21 license?
- 22 MR. SANDELL: I did not -- I was not aware of all
- 23 the terms, that's correct.
- 24 STAFF COUNSEL BULLOCK: Would you agree that --
- 25 or would you -- do you believe that not knowing the terms

1 in your license is an excuse for not following those

- 2 terms?
- 3 MR. KELLY: I'm going to object to the relevance
- 4 of this whole line of questioning. The Vineyard Club
- 5 testified that there was no measuring device in place when
- 6 the inspection took place. And that's not at issue.
- 7 VICE CHAIRPERSON WOLFF: This is overruled. You
- 8 have alleged that the prosecution acted in a punitive
- 9 manner. The prosecution is attempting -- and you've also
- 10 alleged that your clients acted in an exemplary manner.
- 11 The prosecution is asking a question about the belief of
- 12 the defendant with regard to what is acceptable behavior.
- 13 I think it's within the realm of the issues that are being
- 14 discussed here.
- 15 MR. SANDELL: Would you restate the question
- 16 please?
- 17 STAFF COUNSEL BULLOCK: Sure. Let me just start
- 18 over. We'll phrase it differently. Maybe it will be more
- 19 acceptable to Mr. Kelly.
- 20 Would you agree that you have a responsibility to
- 21 know and abide by the terms of your license?
- 22 MR. SANDELL: I'd say that's a fair statement.
- 23 STAFF COUNSEL BULLOCK: You state on -- I'm
- 24 sorry. This is for Mr. Sagues. And actually let me ask
- 25 you that same previous question. Do you feel that you

1 have a responsibility to know and abide by the terms of

- 2 your state license?
- 3 MR. SAGUES: All of my life I've heard that
- 4 ignorance of the law is no excuse, so I have no objection
- 5 to that.
- 6 STAFF COUNSEL BULLOCK: Okay. Mr. Sagues, on
- 7 page 5 of your testimony you state that you were not
- 8 advised to stop diverting water in 2005; is that correct?
- 9 MR. SAGUES: I was not advised to stop diverting
- 10 water for the rest of the month of May, that's correct.
- 11 STAFF COUNSEL BULLOCK: At the time of the
- 12 inspection, did Mr. Lindsay show you a copy of the
- 13 license?
- 14 MR. SAGUES: I do not remember him giving me a
- 15 copy of the license. And, in fact, as you can see from
- 16 the E-mail records, I asked him for a copy of the license
- 17 in August, just a few months later.
- 18 STAFF COUNSEL BULLOCK: And Did he show you a
- 19 copy of the license? Did you see the term?
- 20 MR. SAGUES: No, I do not remember that at all.
- 21 STAFF COUNSEL BULLOCK: Did he inform you that --
- 22 as I asked previously, did he inform you? So did you know
- 23 on that date that your license prohibited you from
- 24 diverting without a license -- or sorry -- without a
- 25 measuring device?

1 MR. SAGUES: Mr. Lindsay mentioned to me when we

- 2 got to the dam that there was not a bypass device on and
- 3 that we were possibly in violation by not having it.
- 4 Does that answer your question?
- 5 STAFF COUNSEL BULLOCK: Yeah. So you understood
- 6 on that date that you -- the law and your license
- 7 prohibited you from diverting water without a measuring
- 8 device, after the inspection with Mr. Lindsay?
- 9 MR. SAGUES: I understood after the inspection.
- 10 STAFF COUNSEL BULLOCK: Okay. On the date of the
- 11 inspection were you aware that you had had a license since
- 12 1992 that had that term?
- 13 Let me ask you those two separately. I'm sorry.
- 14 That was kind of a compound question.
- 15 On the date of the inspection were aware that you
- 16 had a license since 1992?
- MR. SAGUES: No, I was --
- 18 MR. KELLY: Objection. Relevance.
- 19 VICE CHAIRPERSON WOLFF: I find it highly
- 20 relevant.
- 21 MR. SAGUES: No, I was not aware that we had a
- 22 license since 1992.
- 23 STAFF COUNSEL BULLOCK: But you were -- did you
- 24 have any knowledge of -- because you've stated that you
- 25 knew that there was a license; is that correct?

1 MR. SAGUES: I don't know that I stated that I

- 2 knew we had a license. I knew there was some terms and
- 3 conditions. And the only one that I had heard of prior to
- 4 this inspection was that we were not permitted to divert
- 5 water after the end of May.
- 6 STAFF COUNSEL BULLOCK: A few minutes ago I asked
- 7 you -- or Mr. Sandell I guess I asked whether he knew if
- 8 he had a license. And you said yes; is that correct?
- 9 We can check back if you'd feel more comfortable.
- 10 MR. SANDELL: Yeah, I was aware there was a
- 11 license. As I commented, I was not able to obtain a copy
- 12 and move forward with the installation of the dam -- the
- 13 diversion.
- 14 STAFF COUNSEL BULLOCK: Perhaps I've confused
- 15 myself now.
- 16 Mr. Sagues, can you please clarify for me,
- 17 because I've gotten a little confused, when you first
- 18 became aware that you had a license?
- 19 MR. SAGUES: It would have been at the time that
- 20 Mr. Lindsay mentioned that license.
- 21 STAFF COUNSEL BULLOCK: Okay. And today you're
- 22 aware that that license has been in place for quite some
- 23 time?
- 24 MR. SAGUES: Absolutely I am now, yeah.
- 25 STAFF COUNSEL BULLOCK: When did you come across

- 1 that knowledge?
- 2 MR. SAGUES: Over the past several months and
- 3 meeting with attorneys.
- 4 STAFF COUNSEL BULLOCK: And you're now aware that
- 5 your license says that no water shall be diverted from Oak
- 6 Flat Creek unless there's a measuring device installed?
- 7 MR. SAGUES: I have that firmly implanted, yes.
- 8 STAFF COUNSEL BULLOCK: Mr. Sandell?
- 9 MR. SANDELL: Yes, I'm clear on that.
- 10 STAFF COUNSEL BULLOCK: Just one last question
- 11 here.
- 12 Mr. Sagues, you state on page 5 of your testimony
- 13 that you, "you" being the Vineyard Club, have attempted to
- 14 meet the license requirements.
- 15 If you want to take a second to find that, we can
- 16 wait.
- 17 MR. SAGUES: Are you talking about 5, conclusion?
- 18 STAFF COUNSEL BULLOCK: Yes.
- 19 MR. SAGUES: Okay.
- 20 STAFF COUNSEL BULLOCK: Would you agree with
- 21 that, that you have attempted to comply with the license
- 22 requirements?
- MR. SAGUES: We've always been very careful to
- 24 try and follow those when we understood them, yes.
- 25 STAFF COUNSEL BULLOCK: Mr. Sandell, same

- 1 question.
- 2 MR. SANDELL: Yes.
- 3 STAFF COUNSEL BULLOCK: Okay. And when did you
- 4 begin attempting to comply with the license requirements?
- 5 Was it before or after the inspection?
- 6 MR. SAGUES: It was at the end of the inspection
- 7 when I began asking Mr. Lindsay for information about
- 8 bypass devices. And he offered to send it to me. And
- 9 we -- I started finding out information about how we can
- 10 go about doing that.
- 11 STAFF COUNSEL BULLOCK: So it was not until after
- 12 the inspection that you started coming into compliance; is
- 13 that correct?
- 14 MR. SAGUES: That is correct. I did not -- for
- 15 example, there was a letter that was mentioned. I did not
- 16 receive any copy of a letter six weeks or so prior to that
- 17 inspection. The first I knew was Mr. Lindsay calling up
- 18 asking if he could inspect the diversion dam.
- 19 STAFF COUNSEL BULLOCK: Maybe I didn't make that
- 20 question clear.
- 21 The first time that you made efforts to come into
- 22 compliance with the -- the term in your license that says
- 23 no water shall be diverted, the first time that you began
- 24 working toward doing that was after the inspection?
- 25 MR. SAGUES: During the inspection, I would say.

- 1 STAFF COUNSEL BULLOCK: Not before?
- MR. SAGUES: Not before.
- 3 STAFF COUNSEL BULLOCK: Okay. Thank you.
- 4 REDIRECT EXAMINATION
- 5 BY MR. DANIEL KELLY, ESQ., representing The Vineyard Club,
- 6 Inc:
- 7 A couple of brief questions. And this is to
- 8 either or perhaps both of you.
- 9 Prior to the diversion in 2005, did either of
- 10 you -- were either of you in charge of installing the
- 11 diversion system?
- MR. SAGUES: No.
- MR. SANDELL: No.
- 14 MR. KELLY: Do either of you know when prior to,
- 15 Bert, to you installing that system in May of -- or, I'm
- 16 sorry -- late March or early April of 2005 -- prior to
- 17 that do you know the last time that that diversion system
- 18 was installed?
- 19 MR. SAGUES: I believe it was either the season
- 20 of 2002 or 2003. But I have no way of finding that out
- 21 without contacting our previous -- the man who previously
- 22 installed it. And he's currently living in Arkansas.
- MR. KELLY: And who is that?
- 24 MR. SAGUES: That is Jean Schettler.
- MR. KELLY: And is that the same name that

1 appears on that 1992 document we've been looking at that

- 2 shows the old measuring device?
- 3 MR. SAGUES: That is correct. He was acting
- 4 as -- he was not officially the manager. His wife was the
- 5 manage for ten years. So he was taking care of that
- 6 responsibility from about 1991 to about 2001, and I took
- 7 over in 2002 or 2003.
- 8 MR. KELLY: So from the time that the license
- 9 inspection was done back in '92 that shows that photograph
- 10 up until the last time right before you installed it, that
- 11 same gentleman took care of installing the diversion
- 12 system?
- 13 MR. SAGUES: That is correct.
- 14 MR. KELLY: Okay. Do you have any knowledge --
- 15 personal knowledge of whether prior to the time, Bert,
- 16 that you installed the device whether or not there was the
- 17 lack of a device?
- 18 MR. SANDELL: No knowledge.
- MR. KELLY: So you just don't know either way?
- 20 MR. SANDELL: Right.
- 21 MR. KELLY: And it's completely possible that --
- 22 is it Jean was his name?
- MR. SAGUES: That's correct
- 24 MR. SANDELL: That's right.
- MR. KELLY: It's entirely possible that Jean

- 1 could have?
- 2 STAFF COUNSEL BULLOCK: Objection. These are
- 3 leading questions. And this is a direct.
- 4 VICE CHAIRPERSON WOLFF: Well, you're asking him
- 5 to speculate about what Jean might or might not have done.
- 6 So why don't you rephrase your question.
- 7 MR. KELLY: Do you have any knowledge that there
- 8 was a lack of a device in 2000?
- 9 MR. SANDELL: No, I don't. But I do know Jean
- 10 Schettler. And he's a guy that when told to do something
- 11 does it. And his history -- he and I have worked on
- 12 several projects together. And I have no reason to
- 13 believe that if he was aware of the bypass, that he would
- 14 not have installed it.
- 15 MR. KELLY: When did Mr. O'Hagan and Mr. Lindsay
- 16 begin to assist helping you design this device -- or help
- 17 you in your design of the device?
- 18 MR. SANDELL: This was after I contacted them
- 19 after the delivery of the ACL and the CDO.
- 20 MR. KELLY: So prior to the ACL and the CDO you
- 21 received no assistance?
- 22 MR. SANDELL: I personally did not.
- 23 MR. KELLY: Peter, did you receive any assistance
- 24 in coming to an acceptable device prior to the issuance of
- 25 the ACL?

1 MR. SAGUES: I got no information back in spite

- 2 of asking Mr. Lindsay at least two times for that
- 3 information, information which he volunteered on the day
- 4 of the inspection.
- 5 MR. KELLY: I have no further questions.
- 6 VICE CHAIRPERSON WOLFF: Thank you.
- 7 Any recross?
- 8 STAFF COUNSEL BULLOCK: Just very quickly.
- 9 RECROSS-EXAMINATION
- 10 BY MR. MATTHEW BULLOCK, STAFF COUNSEL, representing the
- 11 Division of Water Rights:
- 12 I just wanted to clarify. You said that you
- 13 presumed that in 2002, 2003 that the measuring device had
- 14 been installed. You didn't say what that presumption was
- 15 based on. If you could tell me what makes you -- I think
- 16 it was Mr. Sandell that made that statement.
- 17 MR. SANDELL: Right. Mr. Schettler -- so you're
- 18 curious -- well, as I said, I know Jean, and Jean is a
- 19 contractor. You know, that's his living. And Jean, if
- 20 he's aware of a requirement and he knows the consequences,
- 21 I'm assuming he's going to do that. As an example, he was
- 22 told by the dam inspection people to do a number of things
- 23 over time, clear tules, cut willows, and he always
- 24 complied with it immediately.
- 25 So based on my experience with Jean, my

1 assumption is that the entire time he was responsible for

- 2 installing the diversion dam he complied with the rules.
- 3 That's an assumption. I haven't personally seen that.
- 4 STAFF COUNSEL BULLOCK: And that's Based on your
- 5 belief that Mr. Schettler is an upstanding person who
- 6 complies with the law?
- 7 MR. SANDELL: And personal history of dealing
- 8 with him.
- 9 STAFF COUNSEL BULLOCK: Did he pass on any of
- 10 this knowledge about -- you're suggesting that he had an
- 11 awareness of the requirement in the license. That's the
- 12 assumption you're working on; is that correct?
- 13 MR. SAGUES: Perhaps I could address that.
- 14 STAFF COUNSEL BULLOCK: Sure.
- 15 MR. SAGUES: Mr. Schettler was acting with his
- 16 wife, as I mentioned, as manager for about ten years. And
- 17 they were -- they resigned kind of under pressure and the
- 18 conditions were not all that great. He was very, very
- 19 upset or very angry about the situation with the board for
- 20 letting him go or accepting his resignation. He was not
- 21 about to help me to pass on any of this information. The
- 22 information that I know about the pipeline was just what I
- 23 heard from him several years prior to that, the
- 24 requirement that the pipeline could only be hooked up
- 25 until the end of May.

- 1 STAFF COUNSEL BULLOCK: Okay. So you had
- 2 no -- very little information about the organizational
- 3 history of the Vineyard Club when you started your
- 4 positions?
- 5 MR. SAGUES: That is correct. And that is a
- 6 situation that we have been correcting for the last five
- 7 years. Since we have had three new managers there, we are
- 8 keeping very diligent paper records.
- 9 STAFF COUNSEL BULLOCK: I appreciate your time.
- 10 Thank you.
- 11 VICE CHAIRPERSON WOLFF: I have questions, both
- 12 for the defense witnesses and the prosecution witnesses.
- 13 However, I may have made a procedural error.
- 14 So I'm going to suggest -- but will only do this
- 15 if both counsel concur -- I'm going to suggest that we
- 16 allow the defense witnesses to take a break, we enter the
- 17 exhibits into testimony, we have a lunch break; when we
- 18 come back we recall the prosecution witnesses and I ask my
- 19 questions of them, we recall the defense witnesses and I
- 20 ask my questions of them. This preserves the order that
- 21 would have occurred in the normal process. And then we
- 22 move to rebuttals.
- 23 Would anyone object to that procedure?
- 24 STAFF COUNSEL BULLOCK: The prosecution team does
- 25 not.

```
1 MR. KELLY: We have no objection.
```

- VICE CHAIRPERSON WOLFF: And let me be clear with
- 3 my counsel. Is there any chance given they do not object
- 4 that this change in procedure causes a basis for something
- 5 later?
- 6 SENIOR STAFF COUNSEL KATZ: No.
- 7 VICE CHAIRPERSON WOLFF: Thank you.
- 8 So with that, let's move to entering exhibits.
- 9 Mr. Kelly, you have exhibits to enter?
- 10 MR. KELLY: Yes, Dr. Wolff. I would move to
- 11 admit exhibits VC-1 through I think it's VC-40 -- I'm
- 12 trying to see what the last number -- it would be VC-43 I
- 13 think was added. So I would move to admit those into
- 14 evidence.
- 15 VICE CHAIRPERSON WOLFF: So ordered.
- 16 (Thereupon Exhibits VC-1 through VC-43 were
- 17 admitted into evidence.)
- 18 VICE CHAIRPERSON WOLFF: Do those include the
- 19 letters you sent to me and my responses, and are you
- 20 interested in entering those letters?
- 21 MR. KELLY: They don't, Dr. Wolff. And I don't
- 22 know that they necessarily need to be part of the
- 23 evidentiary record so long as they're part of the record
- 24 of the proceedings. And perhaps Ms. Katz can --
- 25 VICE CHAIRPERSON WOLFF: So those letters in

1 addition to the E-mail that was mentioned in footnote 1 to

- 2 my letter from yesterday are all part of the
- 3 administrative record. And you're saying you see no
- 4 reason to enter them into the evidentiary record?
- 5 MR. KELLY: I see no need to so long as they're
- 6 part of the record. Thank you.
- 7 VICE CHAIRPERSON WOLFF: They are your exhibits.
- 8 MR. KELLY: Thank you.
- 9 VICE CHAIRPERSON WOLFF: You're welcome.
- 10 Will there be rebuttal? Do the parties have
- 11 rebuttal?
- 12 MR. KELLY: Currently the Vineyard Club has no
- 13 plan to call any rebuttal witness.
- 14 STAFF COUNSEL BULLOCK: Nor do we.
- 15 VICE CHAIRPERSON WOLFF: Well, perhaps we should
- 16 press through with my questions and then we could be done.
- 17 I don't know. I'm getting a little lightheaded. Not too
- 18 bad.
- 19 MR. KELLY: I guess it would be up to the
- 20 witnesses, Dr. Wolff. And I think that maybe just a
- 21 minute or two just to close and we could wrap this up and
- 22 all go.
- 23 STAFF COUNSEL BULLOCK: I think some of our
- 24 witnesses would appreciate another short break.
- VICE CHAIRPERSON WOLFF: Five minutes.

Well, let's take what we'll call five but turns

- 2 out to be ten. It always does. So no more than ten and
- 3 we'll be back. And we'll start with the prosecution
- 4 witnesses.
- 5 (Thereupon a recess was taken.)
- 6 VICE CHAIRPERSON WOLFF: We'll now reconvene.
- Would the prosecution witnesses proceed to the
- 8 penalty box.
- 9 (Laughter.)
- 10 VICE CHAIRPERSON WOLFF: It's possible a few of
- 11 these questions were answered in testimony subsequent to
- 12 when I wrote them down. So if you believe you've answered
- 13 it before, it's fine to simply say, "I believe I've
- 14 answered that."
- 15 For both members -- for both witnesses, do I
- 16 understand correctly you were not aware of the full
- 17 history of this site when the \$4100 ACL was issued?
- 18 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 19 I'll go first. You know, I wasn't aware of
- 20 the -- you know, I'd seen that previous photograph in
- 21 there of the measuring device around 1992. So I knew
- 22 there wasn't a measuring device -- what I'm getting at
- 23 here is, had I really thought about the permit period?
- 24 No, I hadn't really studied the permit period and looked
- 25 at the possibility that 1992 was the first time a

- 1 measuring device had actually gone in.
- So I think to answer your question, no. There
- 3 is -- I did go further back into the record once I knew we
- 4 were going to a hearing. To tell you exactly where that
- 5 point is that I went back from, it was approximately
- 6 around that 1992 period.
- 7 VICE CHAIRPERSON WOLFF: That's adequate.
- 8 Mr. Stretars.
- 9 SENIOR WATER RESOURCES CONTROL ENGINEER STRETARS:
- 10 Again, I would kind of limit the same type of
- 11 thing. I'm Larry's supervisor, so I did not look as in
- 12 detail initially -- his job was to do the inspection. He
- 13 basically looked at enough information and was aware of
- 14 the project when we went out there. Not necessarily do
- 15 any details, especially since we were looking at what was
- 16 there at this point in time. So he developed -- and that
- 17 was the basis of the original evaluation. Then as time
- 18 drug on and things began to happen, again because of the
- 19 timeframe we started looking at the history of the file,
- 20 and more things became somewhat apparent that there was
- 21 some concerns that it had existed earlier, you know. Not
- 22 that we could necessarily directly answer or that we could
- 23 then identify as totally being appropriate or
- 24 inappropriate as far as their actions, but that there was
- 25 some questions there.

1 VICE CHAIRPERSON WOLFF: Okay. And does either

- 2 of you have any personal or professional experience with
- 3 the Vineyard Club members prior to the inspection?
- 4 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 5 No, I do not.
- 6 VICE CHAIRPERSON WOLFF: Mr. Stretars?
- 7 SENIOR WATER RESOURCES CONTROL ENGINEER STRETARS:
- 8 Yes, I do, in fact.
- 9 VICE CHAIRPERSON WOLFF: Please.
- 10 SENIOR WATER RESOURCES CONTROL ENGINEER STRETARS:
- 11 Dates way back. There was a complaint filed
- 12 years and years ago, in 1977, which I was a very young
- 13 gentleman in this Division at that point in time, and I
- 14 actually went out and inspected -- went out to visit the
- 15 project on the basis of the complaint, and assisted them
- 16 to some extent in getting the original application filed.
- 17 And that was my involvement up until very recent. In
- 18 fact, I didn't even recognize it until the file came up
- 19 that --
- 20 VICE CHAIRPERSON WOLFF: So that was 1977. So
- 21 that's prior to a permit even being issued, that's --
- 22 SENIOR WATER RESOURCES CONTROL ENGINEER STRETARS:
- 23 It was way back, yes. The permit was 1984,
- 24 thereabouts, something like that I think.
- 25 VICE CHAIRPERSON WOLFF: Are any of the people

1 who you met at that time involved in any way in this

- 2 hearing, to --
- 3 SENIOR WATER RESOURCES CONTROL ENGINEER STRETARS:
- 4 No, no one. No one I know at all,
- 5 no connection --
- 6 VICE CHAIRPERSON WOLFF: Mr. Jean Schettler, does
- 7 that ring a bell, or any of the names -- the name of the
- 8 person who was previously involved?
- 9 SENIOR WATER RESOURCES CONTROL ENGINEER STRETARS:
- No, sir.
- 11 VICE CHAIRPERSON WOLFF: Okay. Thank you.
- 12 Let me ask you about the size of the ACL you
- 13 recommended.
- 14 What are the typical costs of taking an ACL to
- 15 hearing? Not this one in particular, but typically what
- 16 kind of range of costs are involved in preparing for a
- 17 hearing, paperwork, et cetera?
- 18 SENIOR WATER RESOURCES CONTROL ENGINEER STRETARS:
- 19 We haven't really done that many per se. I think
- 20 as the exhibit showed, there was about six of them that
- 21 Mr. Kelly wished to enter that are previous actions.
- 22 Again, from our side of the coin, we don't really
- 23 get involved with the hearing costs per se. The costs
- 24 relative to the prosecution team relates to basically the
- 25 time the engineer was out there, my time in reviewing his

1 work basically, to some extent a little bit of attorney's

- 2 time prior to the ACL being issued, and thereafter then
- 3 the operation relative to potential settlement,
- 4 discussions with the permitting -- or with the prosecution
- 5 team, and basically our time assembling for a hearing.
- 6 VICE CHAIRPERSON WOLFF: So you don't have a
- 7 range of costs. And the reason I'm asking -- I'm not
- 8 trying to lead you someplace. But the reason I'm asking
- 9 is you stated there was a discount -- \$4100 represented a
- 10 discount. Well, a discount from what? Now, maybe that's
- 11 just a casual way of speaking and that's the answer to the
- 12 question: It was a low number but there wasn't a higher
- 13 number that was discussed.
- 14 SENIOR WATER RESOURCES CONTROL ENGINEER STRETARS:
- 15 The discount we were looking at related to the
- 16 fact that the 60-day period of time at \$500 a day was
- 17 \$30,000. But we discounted that down to 4100, which was
- 18 looking at these other factors of harm, potential injury,
- 19 corrective actions they did; to some extent looked at our
- 20 costs for staff time, what the cost of potentially that
- 21 quantity of water might have been.
- 22 VICE CHAIRPERSON WOLFF: So you started with
- 23 30,000 as a maximum. But one of the exhibits talks about
- 24 120 days -- of potentially 120 days of violation based on
- 25 the inspection. And so that would be 60,000, not 30,000.

1 So where did the 30,000 come from? And, you know, why not

- 2 40,000, why not 20,000? Tell me a little bit more about
- 3 your thinking at picking that number to start from -- as a
- 4 place to discount down from and/or returning to that
- 5 number when you decided to re-up it.
- 6 You know, why 30? That's my question. Why not
- 7 40, why not 20, why not 60?
- 8 SENIOR WATER RESOURCES CONTROL ENGINEER STRETARS:
- 9 The 30, again, because the testimony of the --
- 10 information of -- the fact that we were out there, that
- 11 the diversion was occurring. And Mr. Sagues has indicated
- 12 that -- I indicated that the original structure had been
- 13 put in somewhere around the first of April, that it was
- 14 taken out the end of May, the 29th to be mere exact, more
- 15 recently. Amount of 60 days basically of potential
- 16 diversion time that would have occurred. The requirements
- 17 under the code say we cannot request anything more than
- 18 \$500 per day. So that would be the maximum based on that
- 19 stance.
- 20 VICE CHAIRPERSON WOLFF: Okay. Let's go back to
- 21 the question of when you reviewed the record in
- 22 preparation for the hearing you discovered what you
- 23 thought was a serious history of violation, and so that
- 24 was part of the basis of increasing the size of the ACL.
- 25 Did you consider recommending withdrawing the ACL

1 and the CDO and recommending revocation of the permit?

- 2 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 3 Well, it's at a license at this point.
- 4 VICE CHAIRPERSON WOLFF: I'm sorry, a license.
- 5 Revocation of the license. I've misstated my question.
- 6 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 7 That's all right.
- 8 No. Revoking the license, no, sir.
- 9 VICE CHAIRPERSON WOLFF: Didn't consider it?
- 10 SENIOR WATER RESOURCES CONTROL ENGINEER STRETARS:
- 11 No.
- 12 VICE CHAIRPERSON WOLFF: And why not?
- 13 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 14 Well, didn't see any reason to. I mean they're
- 15 in violation of it, but they can come in to compliance.
- 16 And also I mean thinking about all the things that
- 17 would -- there is a storage project there. They would
- 18 have to take out the lake if we revoked the license.
- 19 VICE CHAIRPERSON WOLFF: But if they're such bad
- 20 actors, they have such a bad history, why not consider
- 21 that?
- 22 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- I don't think that's one of the remedies in this
- 24 case.
- 25 VICE CHAIRPERSON WOLFF: Mr. Stretars, do you

1 have anything to add? Did you think about it -- maybe you

- 2 didn't think about it at the time, and that's a sufficient
- 3 answer.
- 4 SENIOR WATER RESOURCES CONTROL ENGINEER STRETARS:
- No, we didn't think about it, or I didn't think
- 6 about it anyway.
- 7 VICE CHAIRPERSON WOLFF: Okay. Thank you.
- 8 For either of you, is approval of the measuring
- 9 device required by the Board -- approval of the design of
- 10 the measuring device required by the Board, either under
- 11 the original license or under the tentative CDO?
- 12 SENIOR WATER RESOURCES CONTROL ENGINEER STRETARS:
- By the Board, you're referring to --
- 14 VICE CHAIRPERSON WOLFF: I'm sorry. No, by the
- 15 staff of the Board, by the Division. By the Division.
- 16 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 17 Yes, the measuring device -- here's where I'm a
- 18 little confused, and I want to make sure I'm answering
- 19 your question. Are you talking about the one we're trying
- 20 to get them to install now or --
- 21 VICE CHAIRPERSON WOLFF: Yes, yes. The
- 22 defendants are seeking to install a measuring device.
- 23 They've asked for Division approval of a proposal.
- 24 Is Division approval of the proposal required?
- 25 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:

- 1 Yes, based on the term.
- VICE CHAIRPERSON WOLFF: What is the basis of
- 3 that? The term of the license itself requires it?
- 4 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 5 Yes. You know, and I apologize. I left my
- 6 notebook over here. Let me go over here.
- 7 VICE CHAIRPERSON WOLFF: That's fine. If the
- 8 license says a measuring device acceptable to someone --
- 9 is that right?
- 10 SENIOR WATER RESOURCES CONTROL ENGINEER LINDSAY:
- 11 Yes. It says satisfactory to the State Water
- 12 Resources Control Board. I think that's been delegated.
- 13 I don't have evidence --
- 14 VICE CHAIRPERSON WOLFF: Thank you. No, that's
- 15 fine, that's fine. I wasn't clear on that point.
- 16 Those are my questions for the prosecution team.
- 17 Thank you very much.
- 18 I'd like now to recall the defense witnesses.
- 19 VICE CHAIRPERSON WOLFF: Mr. Sagues, I just want
- 20 to be clear that the photos that were shown by the
- 21 prosecution team in their case -- were those photos of the
- 22 property that you manage? There were three photos, I
- 23 believe.
- 24 MR. SAGUES: That is correct. There were some
- 25 photos taken from private property looking out on to the

1 lake. And the lake is the property of the Vineyard club.

- VICE CHAIRPERSON WOLFF: Maybe we should put the
- 3 three photos up again to be sure then.
- 4 Here's one.
- 5 MR. SAGUES: No, those photos are not of the
- 6 Vineyard Club property. Those belong to a private owner.
- 7 VICE CHAIRPERSON WOLFF: I'm sorry. But those --
- 8 is that a photo at the location of your diversion off Oak
- 9 Creek Flat?
- 10 MR. SAGUES: That belongs to a man named Dan
- 11 Merritt.
- 12 VICE CHAIRPERSON WOLFF: I asked the question
- 13 wrong the first time.
- 14 Is this your diversion point?
- 15 MR. SAGUES: That is correct.
- 16 VICE CHAIRPERSON WOLFF: I'm just being certain.
- 17 And what's the board with the hole in it? The
- 18 one sitting to the right there that's not connected to the
- 19 pipe.
- 20 MR. SAGUES: Since Bert put that together, maybe
- 21 he could tell you.
- 22 VICE CHAIRPERSON WOLFF: Sure.
- 23 MR. SANDELL: That was some material that was
- 24 used to reinforce the dam at installation. And it was
- 25 installed -- it was laying about with some debris that was

- 1 used to strengthen the dam.
- VICE CHAIRPERSON WOLFF: Okay. And let's just
- 3 flip to the next picture.
- 4 This is your pond -- the Vineyard Club pond?
- 5 MR. SAGUES: That is correct.
- 6 VICE CHAIRPERSON WOLFF: Okay. And the next one.
- 7 I thought there were three.
- 8 Yeah, this one. This is the old one, right? Do
- 9 you have any reason to believe this is not your facility?
- 10 Since Mr. Kelly brought this up earlier, I want to be sure
- 11 we're all talking about the same thing. This came out of
- 12 an inspection report, I believe, is that right?
- 13 MR. KELLY: Dr. Wolff, that actually is contained
- 14 in the file for this water right.
- 15 VICE CHAIRPERSON WOLFF: Yes. And the file
- 16 indicates that it came from this facility. I'm asking the
- 17 defense witnesses if they have any reason to believe or
- 18 disbelieve whether it is --
- 19 MR. SANDELL: Dr. Wolff, it appears to be the
- 20 same diversion point taken from a different angle. It's
- 21 upstream instead of downstream.
- 22 VICE CHAIRPERSON WOLFF: Okay. I mean I know you
- 23 can't be certain. You weren't there. But it does seem as
- 24 if --
- MR. SANDELL: Yeah, it looks -- yeah, I think

- 1 that's it.
- VICE CHAIRPERSON WOLFF: All right.
- 3 Mr. Sagues, I'm a little unclear on what took
- 4 place with the license at the time of the inspection. We
- 5 have testimony that a license was present in someone's
- 6 truck. Do you remember the license being present in the
- 7 truck?
- 8 MR. SAGUES: No, I don't remember that at all.
- 9 There's certainly a possibility that Mr. Lindsay gave me
- 10 that, as he mentioned, at the start of the inspection.
- 11 And then it was raining lightly that day, so I probably
- 12 did not carry that with me down into the creek and back.
- 13 And I think if he gave me one, I probably left it in his
- 14 truck at the end of that day. That would just be my
- 15 guess. Or left it some other place.
- 16 VICE CHAIRPERSON WOLFF: All right. But at the
- 17 end of the inspection when he left you were aware that
- 18 there was such a thing as a license and it had a condition
- 19 in it about measuring device, right?
- 20 MR. SAGUES: Within a short time after that I
- 21 reported to the Board of Directors of the Vineyard Club
- 22 that we had been in violation of our license.
- 23 VICE CHAIRPERSON WOLFF: Okay. Mr. Kelly
- 24 suggested earlier that maybe a measuring device was
- 25 present almost every year prior to the time of inspection

1 between '92 and 2005. And the only evidence that I'm

- 2 aware of that was presented to that effect was, Mr.
- 3 Sandell, your testimony that Mr. Schettler -- if I'm
- 4 pronouncing his name correctly -- was an upright man who
- 5 would have done that if he knew that he needed to do it.
- 6 Is there any other evidence the measuring device
- 7 was present in any of the years between the photos we've
- 8 just looked at?
- 9 MR. SANDELL: I don't -- I'm not aware of any
- 10 evidence. I've not visually seen it. I think that if we
- 11 were to seek out additional evidence through testimony of
- 12 other members and Mr. Schettler, we could probably come up
- 13 with some information. But we're not -- we don't have
- 14 that today.
- 15 MR. SAGUES: I think possibly I have one
- 16 explanation. The parts of the old diversion dam were
- 17 lying next to the dam, not very high up above the
- 18 waterline, at the time of the inspection by Mr. Lindsay.
- 19 It is my view that since that creek gets up very, very
- 20 high, that anything that was left in that position would
- 21 have been washed away during a heavy winter, even just a
- 22 moderately heavy winter. So that that material was
- 23 probably not left there for a very long time.
- 24 VICE CHAIRPERSON WOLFF: Thank you. I think
- 25 you've just equaled the prosecution in terms of

- 1 speculation.
- 2 (Laughter.)
- 3 VICE CHAIRPERSON WOLFF: Everyone's speculating
- 4 and that's fine. We all do.
- 5 Let me just be clear. How far back do the two of
- 6 you have personal knowledge of diversions? Just for a
- 7 couple of years, as I understand, maybe 2004, 2005, and
- 8 2006?
- 9 MR. SANDELL: Personally?
- 10 VICE CHAIRPERSON WOLFF: Yes.
- 11 MR. SANDELL: I do not believe there was a
- 12 diversion in the spring of 2003, because Mr. Schettler was
- 13 not involved at that point, and I didn't do it.
- 14 It didn't happen in 2004. It happened in 2005.
- 15 It did not happen in 2006. Other years -- years other
- 16 than those, I don't have any information on.
- 17 MR. SAGUES: Yes, I also was not involved in any
- 18 way that I had any personal knowledge of any of those
- 19 years.
- 20 VICE CHAIRPERSON WOLFF: And did Mr. Schettler's
- 21 role in this matter go all the way back to the beginning
- 22 of the work under the permit? Or was there anyone prior
- 23 to him that you're aware of?
- 24 MR. SAGUES: Yes, the manager -- from what I
- 25 understand, the manager -- at the time that the Vineyard

- 1 Club was contacted and was working through the license,
- 2 the manager was Stew Nimmo or Stewart Nimmo. Stewart
- 3 Nimmo died about six or seven years ago. And he had been
- 4 manager of the club for several years, but I'm not sure
- 5 what. And at that time of the transition of the change
- 6 from Stewart Nimmo as manager to the Schettlers as manager
- 7 was the time when the new diversion dam was designed and
- 8 built.
- 9 VICE CHAIRPERSON WOLFF: Thank you.
- Just checking my notes to make sure I didn't miss
- 11 anything.
- No, that's it for me.
- 13 Thank you very much.
- 14 MR. SANDELL: Thank you.
- 15 VICE CHAIRPERSON WOLFF: So I'll move to closing
- 16 arguments.
- 17 Closing arguments by the prosecution team first.
- 18 How long do you need, Mr. Bullock?
- 19 STAFF COUNSEL BULLOCK: Ten minutes at the most.
- 20 VICE CHAIRPERSON WOLFF: Sounds fine.
- 21 STAFF COUNSEL BULLOCK: I'd like to start out by
- 22 addressing something that came up quite a while ago, but I
- 23 think is really important to remember. We were discussing
- 24 the terms of Decision 1608 and why they were in there and
- 25 how those got transferred into the license.

1 And as a legal matter, it's important to remember

- 2 that what 1608 says is not relevant. But what's relevant
- 3 is what the license says about what is allowed for the
- 4 Vineyard Club to do with a reference to diversion of
- 5 water.
- 6 The Vineyard Club has a license that's very
- 7 clear. It states, "No water shall be diverted under the
- 8 license unless the licensee has installed a measuring
- 9 device in Oak Flat Creek." The wording of that license is
- 10 very clear that if there's not a measuring device, they do
- 11 not have a right to divert water. Section 1052 of the
- 12 Water Code says, "The diversion or use of water subject to
- 13 the Division other than is authorized in the Division is a
- 14 trespass subject to \$500 a day."
- By the Vineyard Club's own testimony today, they
- 16 were diverting in 2005 for a period of at least 60 days
- 17 with no measuring device installed at any time during
- 18 those 60 days.
- 19 There's also been evidence presented today that
- 20 they were violating the same term in their permit in 1991,
- 21 and that it required help from the Division to install a
- 22 measuring device before they came into compliance with
- 23 that term.
- 24 Also has come out in the evidence today that that
- 25 measuring device was removed at some point.

1 The Vineyard Club claims to diligently comply

- 2 with the law. But it has a history dating back over 15
- 3 years showing noncompliance.
- 4 This ACL is not being issued against Mr. Sandell
- 5 and Mr. Sagues. The Water Board, the Division, the
- 6 prosecution team, we're not in any way questioning their
- 7 motives, saying that they're bad people. This isn't about
- 8 Mr. Sagues and Mr. Sandell. It's about the Vineyard Club
- 9 and about their history. And what their history shows is
- 10 that they lack organizational memory. That there is a
- 11 measuring device in place and somehow for some reason it's
- 12 gone and nobody knows why, nobody knows when,
- 13 This ACL and CDO are necessary to formally ensure
- 14 that the Vineyard Club not only comes into compliance, but
- 15 that they stay in compliance coming into the future and
- 16 that there is some sort of organizational memory making
- 17 sure that they comply with the law as they say they want
- 18 to do.
- 19 Thank you.
- 20 VICE CHAIRPERSON WOLFF: Mr. Kelly.
- 21 MR. KELLY: I think it's important to keep an eye
- 22 on the fact that it's the prosecution team that bears the
- 23 burden, and it is solely that that bears the burden. And
- 24 there's been a lot of speculation about when devices may
- 25 have been in place and when they've not been in place.

1 But the fact is that there's no evidence either way. And

- 2 in that regard, the prosecution team simply failed to
- 3 carry its burden to establish the lack of a device in
- 4 anything but May of 2005. And everything else has been
- 5 speculation.
- 6 So I think that -- I mean I know there's been a
- 7 lot of discussion about it. But that to me raises a
- 8 concern. And I want to be sure that we -- that everybody
- 9 keeps their eye on the fact that it's the prosecution that
- 10 bears the burden. They need to prove everything that
- 11 they've alleged. They need to prove it all.
- 12 The Vineyard Club does not have to prove that
- 13 there was a device there in 1998 or 1999. If the
- 14 prosecution team alleges it, they've got to prove it. And
- 15 there's been absolutely no proof.
- Now, regarding the proposed -- the draft cease
- 17 and desist order, I really -- I think that the material
- 18 facts really aren't in dispute. There seems to be a
- 19 little bit of contradictory testimony with regard to the
- 20 conversations that took place when Mr. Lindsay was out at
- 21 the site. But I think generally the facts aren't in
- 22 dispute, that the Vineyard Club contacted the folks at
- 23 Division, contacted Mr. Lindsay -- the contact report's in
- 24 there -- tried to obtain information about the results of
- 25 the inspection. Mr. Lindsay had indicated that he would

1 send them examples of measuring devices. The testimony

- 2 was that they didn't receive it.
- 3 When they received the report, the results of the
- 4 inspection, and they saw that all this was going on, they
- 5 immediately got into gear and have attempted to comply,
- 6 and to date are still attempting to comply. There is
- 7 simply -- and I think the testimony was by Mr. Lindsay
- 8 that there's no current violation -- there's certainly no
- 9 current violation, because they're not diverting. They
- 10 didn't divert in 2004. The prosecution team in their
- 11 testimony you'll see thought that they were and reduced
- 12 that 120 days down to 60.
- 13 But the testimony was there was no diversion in
- 14 2004, testimony was there's no diversion in 2006. The
- 15 testimony and the evidence show that these folks are
- 16 trying to come into compliance. They're not diverting.
- 17 And they've said -- and they've said in writing and
- 18 they've said in E-mails that they will not divert until
- 19 they comply with that term of their license. They know
- 20 about it now and they are going to do whatever it takes to
- 21 comply with that license. There's no threat that these
- 22 folks are going to go out tomorrow and put up a diversion
- 23 dam and start diverting water without a bypass device.
- 24 Absolutely no threat.
- 25 And on that basis, there's no factual basis upon

1 which to issue a cease and desist order. It's absolutely

- 2 unnecessary, absolutely unnecessary.
- 3 Regarding the Administrative Civil Liability
- 4 complaint. We have provided the hearing team with
- 5 reasonably extensive briefing on that issue. And we still
- 6 believe that based upon the -- if you just -- if you just
- 7 look at the State Water Board's documents with regard to
- 8 investigating water right complaints. And that's in the
- 9 record, and I think it might be VC-3.
- 10 That document lays out the different types of
- 11 violations that occur. One of them is a violation of a
- 12 condition or a term in a permit or license. And then the
- 13 other is unauthorized diversion of water. And if you look
- 14 at that, it says unauthorized diversion of water is
- 15 diverting water without a valid water right. The permit
- 16 term -- violations of permit terms and conditions are
- 17 completely different.
- 18 And if you look in that same document toward the
- 19 end with regard to the remedies for violating a permit
- 20 term or condition and the remedies for engaging in the
- 21 unauthorized diversion of water, which is diverting water
- 22 without a water right, those potential penalties are very
- 23 different.
- 24 The State Water Resources Control Board cannot
- 25 issue Administrative Civil Liability for violating permit

- 1 terms and conditions pursuant to the statute.
- 2 Administrative Civil Liability can only be imposed for the
- 3 unauthorized diversion of water, which in that document --
- 4 that State Water Board document that was prepared in
- 5 February 2005, two to three months prior to this
- 6 inspection, makes an absolute distinction between the
- 7 unauthorized diversion of water and violating a term or
- 8 condition in the permit or license.
- 9 The allegations here are that it is a term
- 10 or condition -- it is a condition of the license that's
- 11 being violated. That is entirely different from engaging
- 12 in the unauthorized diversion of water. The unauthorized
- 13 diversion of water is diverting water without a valid
- 14 water right.
- 15 Regarding the amount. To the extent that the
- 16 hearing team believes that you can issue Administrative
- 17 Civil Liability for violating a term or condition in a
- 18 permit or license, I think -- and I appreciate Mr.
- 19 Lindsay's candor -- that the harm that was alleged -- the
- 20 environmental harm that was alleged in the complaint and
- 21 the testimony really isn't about -- isn't caused by the
- 22 lack of the measuring device; that that harm is caused by
- 23 the absence of the bypass flows. The testimony was, the
- 24 evidence is, that there's -- and the witnesses concurred
- 25 that there's no allegations that they weren't meeting

- 1 bypass flows.
- So there's no support that there's any kind of
- 3 environmental harm. There's no evidence that there's any
- 4 water that's not available to downstream folks, because
- 5 that harm would have been caused by not meeting your
- 6 bypass flows. That's not at issue here.
- 7 It's the hole in the piece of wood. That's
- 8 what's at issue here. And Mr. Lindsay testified that not
- 9 having the hole in the wood isn't what would cause the
- 10 harm. It's not meeting those bypass flows. There's no
- 11 evidence that the bypass flows weren't being met. The
- 12 evidence is actually to the contrary.
- 13 The last thing regarding the amount of the
- 14 Administrative Civil Liability that's been proposed. The
- 15 prosecution team started out at 4100; and then as a result
- 16 of the request for this hearing shot up to the statutory
- 17 maximum. That's unsupported by the statute, because you
- 18 have to take into consideration everything.
- 19 Environmental harm, we've established, didn't
- 20 occur as result of the measuring device, violating that
- 21 term, because the bypass flows were being met. The
- 22 attempts to come into compliance, the persistence of the
- 23 violation. It's just not there. It's not there.
- 24 Absolutely not there.
- 25 The water right orders that we made part of the

1 evidence in this record, I'd invite you to go take a look

- 2 at those. Included in those, for example, was a cease and
- 3 desist order whereby Mr. Lindsay testified on behalf of
- 4 the prosecution team against the United States and against
- 5 the Department of Water Resources for violating salinity
- 6 standard in the Delta. No Administrative Civil Liability
- 7 there. Cease and desist order, but no Administrative
- 8 Civil Liability.
- 9 If you go through and you look at those where
- 10 Administrative Civil Liability's been imposed, there are
- 11 circumstances in there where people have multiple
- 12 reservoirs and they're diverting water into multiple
- 13 reservoirs without a water right. ACL in the amount of
- 14 \$3,000, \$3,070, \$4,000. And these are people who have
- 15 diverted water without a valid water right. Okay?
- 16 These folks have a valid water right.
- 17 The original amount proposed at \$4100 was based
- 18 upon the assumption that they were unlawfully diverting
- 19 water in '04. Actually the testimony's contrary to that
- 20 now.
- 21 It alleged a violation and harm to steelhead. It
- 22 came out in testimony this actually didn't cause any harm
- 23 to steelhead.
- 24 So the original amount proposed in the ACL was
- 25 completely out of line with past actions by the State

1 Water Resources Control Board with regard to imposing

- 2 Administrative Civil Liability.
- 3 And I firmly believe, and I want -- I would
- 4 appreciate that the hearing team, you know, seriously
- 5 consider whether or not this type of violation of a water
- 6 right whether or not the Board can actually properly issue
- 7 civil liability in this circumstance, because that's a big
- 8 jump. It is a big jump. And we think that there are
- 9 jurisdictional problems, you know.
- But to the extent that you find that you can, I
- 11 think that the amount -- you know, the amount is just
- 12 outrageous to me, absolutely outrageous, given the
- 13 testimony, the facts of this case, and the attempts of the
- 14 folks at the Vineyard Club to come into compliance.
- 15 Thank you.
- 16 VICE CHAIRPERSON WOLFF: Thank you.
- 17 I believe that concludes the hearing.
- 18 Is there anything further to be said?
- 19 Ah, I need to read a last paragraph.
- The Board will take this matter under submission.
- 21 All parties who participated in this hearing will be sent
- 22 notice of the Board's proposed decision on this matter in
- 23 any forthcoming board meeting at which this matter will be
- 24 considered.
- 25 After the Board adopts an order on this matter,

1 any person who believes the order is in error has 30 days

- 2 within which to submit a written petition for
- 3 reconsideration by the Board.
- 4 I'm sorry, that needs clarification to me.
- 5 You're saying that after the Board -- the full
- 6 Board makes a decision there's 30 days to ask the full
- 7 Board to reconsider?
- 8 SENIOR STAFF COUNSEL KATZ: You file a petition
- 9 for reconsideration.
- 10 All right. Thank you all for your interest,
- 11 cooperation and participation in the hearing.
- 12 The hearing is adjourned.
- 13 (Thereupon the State Water Resources
- 14 Control Board, Division of Water Rights
- 15 hearing adjourned at 1:38 p.m.)
