

Alternative Compliance Plan

**Water Right Application
A008986**

Browns Valley Irrigation District

November 26, 2018

Alternative Compliance Plan – Application A008986

INTRODUCTION:

The major supply of surface water available to Browns Valley Irrigation District (“BVID” or “District”) comes from Dry Creek, where BVID holds licensed appropriative surface water rights for direct diversion as well as storage in Collins Lake. In addition to the water rights from Dry Creek, the District holds pre-1914 water rights from the North Yuba River. Based on the face value of BVID’s water rights about 98% percent of the District’s available supply of surface water originates from Dry Creek and the Yuba River. Up to 2% (a maximum of approximately 1,270 acre feet) could originate from Tennessee Creek, a small seasonal stream within its boundaries. Tennessee Creek flows through BVID’s service area to Honcut Creek. BVID holds License 2182 (Application 8986) to divert up to 3 cfs from Tennessee Creek from about April 1 to about October 31 for irrigation purposes and during the remainder of the year as required for domestic purposes. A portion of Tennessee Creek’s natural channel is also utilized by BVID as part of its Tennessee Ditch conveyance system. This conveyance system is used to deliver Dry Creek water from Collins Lake and recaptured tailwater from within the District (originating from Dry Creek) to its customers. During the winter season, no water is delivered to Tennessee Creek for conveyance and no diversions from Tennessee Creek occur. During the irrigation season the majority of the water within the shared portion of Tennessee Creek and at the point of diversion originates from BVID’s diversions and conveyance of water from Dry Creek and Collin Reservoir. The comingled sources of water at the point of diversion make it physically impossible separate and measure diversions of Tennessee Creek water at the point of diversion, therefore strict compliance with the requirements for measuring and monitoring is “not feasible”. The comingled water diverted at the point of diversion is measured with Parshall Flumes and staff gages by BVID staff on a daily basis.

During the irrigation season, the District measures the quantities of water delivered to the Tennessee Ditch conveyance system at the head of the ditch (upstream of its confluence with Tennessee Creek) using rated weirs and a Parshall Flume. The quantities of water diverted at the point of diversion, the BV Main’s divergence with Tennessee Creek are measured utilizing a Parshall Flume. The quantities diverted under License 2182 (Application 8986) from Tennessee Creek will be determined as the lesser of 1) the difference between the amount delivered to Tennessee Ditch at its head and the amount diverted to the BV Main at the point of diversion (including adjustments for customer deliveries from the system in between these two locations); and 2) estimates of natural flow in Tennessee Creek upstream of its confluence with Tennessee Ditch. To obtain estimates of Tennessee Creek natural flow, District staff will conduct site visits to Tennessee Creek, upstream of its confluence with conveyed Dry Creek water and upstream of any recirculated tailwater inflow, to determine if/when natural flow is present in Tennessee Creek.

For the above reasons the District is submitting this Plan pursuant to Section 935 of the California Code of Regulations.

Section A – Water Right Owner Information

(1) Owner Name(s)	Browns Valley Irrigation District
(2) Email Address	bvid@bvid.org
(3) Phone Number	(530) 743-5703
(4) Mailing Address Line 1	9370 Browns Valley School Rd
(5) Mailing Address Line 2	PO Box 6
(3) City	Browns Valley
(4) State	California
(5) Zip Code	95918

- | | |
|--|--|
| (6) Is the Water Right Owner also the Primary Contact? | No |
| (7) Installation Deadline | January 1, 2017 |
| (8) Measurement Accuracy | 10% |
| (9) Required Monitoring Frequency | Hourly |
| (10) Qualifications of the Individual Installing/Certifying | California Licensed Professional Engineer (PE) |

Section B – Information on Primary Contact

- | | |
|--|--|
| (1) Name(s) | MBK Engineers |
| (2) Phone Number | (916) 456-4400 |
| (3) Email Address | williams@mbkengineers.com |
| (4) Mailing Address Line 1 | 455 University Avenue |
| (5) Mailing Address Line 2 | Suite 100 |
| (6) City | Sacramento |
| (7) State | California |
| (8) Zip Code | 95825 |
| (9) The Alternative Compliance Plan Primary Contact is a(n) | Designated Contact |

Section C – Information on Qualified Individual

- | | |
|--|--|
| (1) Name(s) | Anne Williams |
| (2) Phone Number | (916) 456-4400 |
| (3) Email Address | williams@mbkengineers.com |
| (4) Mailing Address Line 1 | 455 University Avenue |
| (5) Mailing Address Line 2 | Suite 100 |
| (6) City | Sacramento |
| (7) State | California |
| (8) Zip Code | 95825 |
| (9) The qualifications of the individual certifying the Alternative Compliance Plan are | California Licensed Professional Engineer (PE) |
| (10) Qualifying Individual's PE or Contractor License number, if applicable | 86905 |

Section D – Request for Alternative Compliance

- | | |
|--|---|
| (1a) Diverter is seeking alternative compliance from the requirement(s) | Measuring Device Location, Required Accuracy, Certification of Accuracy, Monitoring Frequency |
|--|---|

(1b) Provide additional information for each of the reasons selected in question 1a:
Due to the comingled sources of water at the point of diversion direct measurement of the water diverted under License 2182 is not possible. Therefore, strict compliance with these requirements is not possible.

During the authorized season of diversion, Tennessee Creek typically conveys little natural flow except during the spring and early summer months. The majority of the water at the point of diversion originates from deliveries by BVID from Dry Creek and Collins Lake. Water diverted from Dry Creek and stored water deliveries from Collins Lake are measured by the District just downstream of Virginia Ranch Dam at its Main Canal weir. Downstream of the Main Canal weir are the delivery points to multiple conveyance systems within BVID, including the Tennessee Ditch/Tennessee Creek conveyance system. The District measures the quantities of water delivered to the Tennessee Ditch from its Main Canal using rated weirs, Parshall flumes, and staff gages. The District measures quantities of water diverted at the point of diversion using Parshall Flumes and staff gages. Readings of the staff gages and associated flows are typically made and recorded daily and/or when changes in deliveries are made. The District monitors natural flow in Tennessee Creek upstream of the confluence with the Tennessee Ditch on a weekly basis.

The quantities diverted under License 2182 from Tennessee Creek are determined as the lesser of; 1) the difference between the amount delivered to Tennessee Ditch at its head and the amount diverted at the point of diversion (including adjustments for customer deliveries from the system in between these two locations); and 2) estimates of natural flow in Tennessee Creek upstream of its confluence with Tennessee Ditch.

The face value of License 2182 represents less than 2% of the combined face value of all of the District's water rights for consumptive uses. During 2017, one of the wettest years on record, the District estimates that 99.8% of surface water deliveries originated from its Dry Creek and Yuba River sources. Only 0.2% (approximately 155 acre feet) was determined to originate from Tennessee Creek. Therefore, the District has determined that strict compliance with the requirements of the Measurement Regulation is not feasible.

(2a) Alternative Compliance is being pursued because strict compliance with one of more of the requirements for measuring and monitoring (check all that apply)

Is not feasible.

(2b) Provide additional information for each justification selected in question 2a:

See Section D (1b) above.

(3a) Alternative compliance is requested under the following categories (check all that apply)

There is an existing measurement device or measurement method in use.

(3b) Provide additional information for each of the categories selected in question 3a:
The District is currently utilizing this alternative measurement methodology. See Section D (1b) above.

(4) Alternative Compliance Plans shall include alternative, objective measurement and performance standards that achieve the closest attainable compliance. Describe the measurement or alternative to measurement that will be used at each point of diversion in the plan to achieve closest attainable compliance:

See Section D (1b) above.

Section E – Area Covered by the Alternative Compliance Plan

(1) Provide a general description of the area covered by the Alternative Compliance Plan:

The area covered by this Plan is the place of use under License 2182. See Attachment 1.

(2) Describe all diversion and conveyance works covered by the Alternative Compliance Plan:

See “Introduction” above and Attachment 2 identifying BVID conveyance facilities. The point of diversion under License 2182 is identified in Attachment 1.

(3) Describe the type(s) of Beneficial Use:

The license authorizes diversion and use for irrigation and domestic purposes. At this time, BVID is diverting water under License 2182 for irrigation purposes only.

**(4) Have you attached a list of assessor's parcel numbers and the current owner of each parcel covered by the Alternative Compliance Plan?
(Attachments may be under Section I of this form)**

Yes

Section F – Measurement and Monitoring

(1) For each point of diversion listed in the Alternative Compliance Plan, describe how the water is measured:

See D (1b) above.

(2) Identify the measurement accuracy associated with the measurement devices:

The Parshall flumes and rectangular weirs used to implement this Plan are capable of having an accuracy of about $\pm 5\%$.

The accuracy of the measurement associated with this ACP will be estimated once discharge measurements are made to check the ratings of the structures.

(3) Describe how the accuracy of the Alternative Compliance Plan was calculated:

Properly constructed and maintained rated Parshall Flumes under free flow conditions can achieve an accuracy of 3-5% and are expected to be accurate to within $\pm 5\%$. (USBR Water Measurement Manual Chapter 8 Section 10) Properly rated and maintained rectangular weirs are also known to provide accurate measurement of discharge, capable of achieving an accuracy of 1% and expected to be accurate within $\pm 5\%$. (USBR Water Management Planner Chapter 10 Section 4) Discharge measurements will be made to check the ratings of the weirs and Parshall Flumes used for this ACP. Based on these discharge measurements, the accuracy of the weirs, Parshall flumes, and overall ACP will be updated. Although the ACP proposes to record measurements on a daily basis and when changes are made to the structures controlling the flows, it is the District's experience that there is little fluctuation in the flow except when changes to diversions or deliveries are made. Therefore, we do not expect additional inaccuracies due to the recording frequency to the overall accuracy associated with this ACP.

Section G – Implementation Schedule

- (1) If applicable, describe the implementation schedule for the Alternative Compliance Plan, including objective milestones from date of filing through final implementation. Milestone's should include date of completion for construction and testing, expected dates of issuance of required permits, and expected date for compliance with the California Environmental Quality Act:**

See Section D (1b) above. The District is currently utilizing this approach. The District annually includes in their budget monies for MBK plan implementation, and water use data review and reporting. Plan implementation will include conducting discharge measurements to verify ratings and periodic checks of the weirs and Parshall Flumes used in this ACP

Section H – Other Permits

- (1) Describe any other permits required to implement the Alternative Compliance Plan. Include information on the agency that will issue the permit, and the expected date of issuance.**

Not applicable.

Section I – Attachments

- (1) Attach documents that support the Alternative Compliance Plan.**
(2) Provide a brief description of the attached documents:

Attachment 1 – License 2182 Place of Use Map
Attachment 2 – BVID Conveyance System Map
Attachment 3 – Assessor's Parcel Numbers (APNs) and Landowner Information for Each Parcel Covered Under the Plan

Section J – Important information and signatures

Yes
Anne Williams

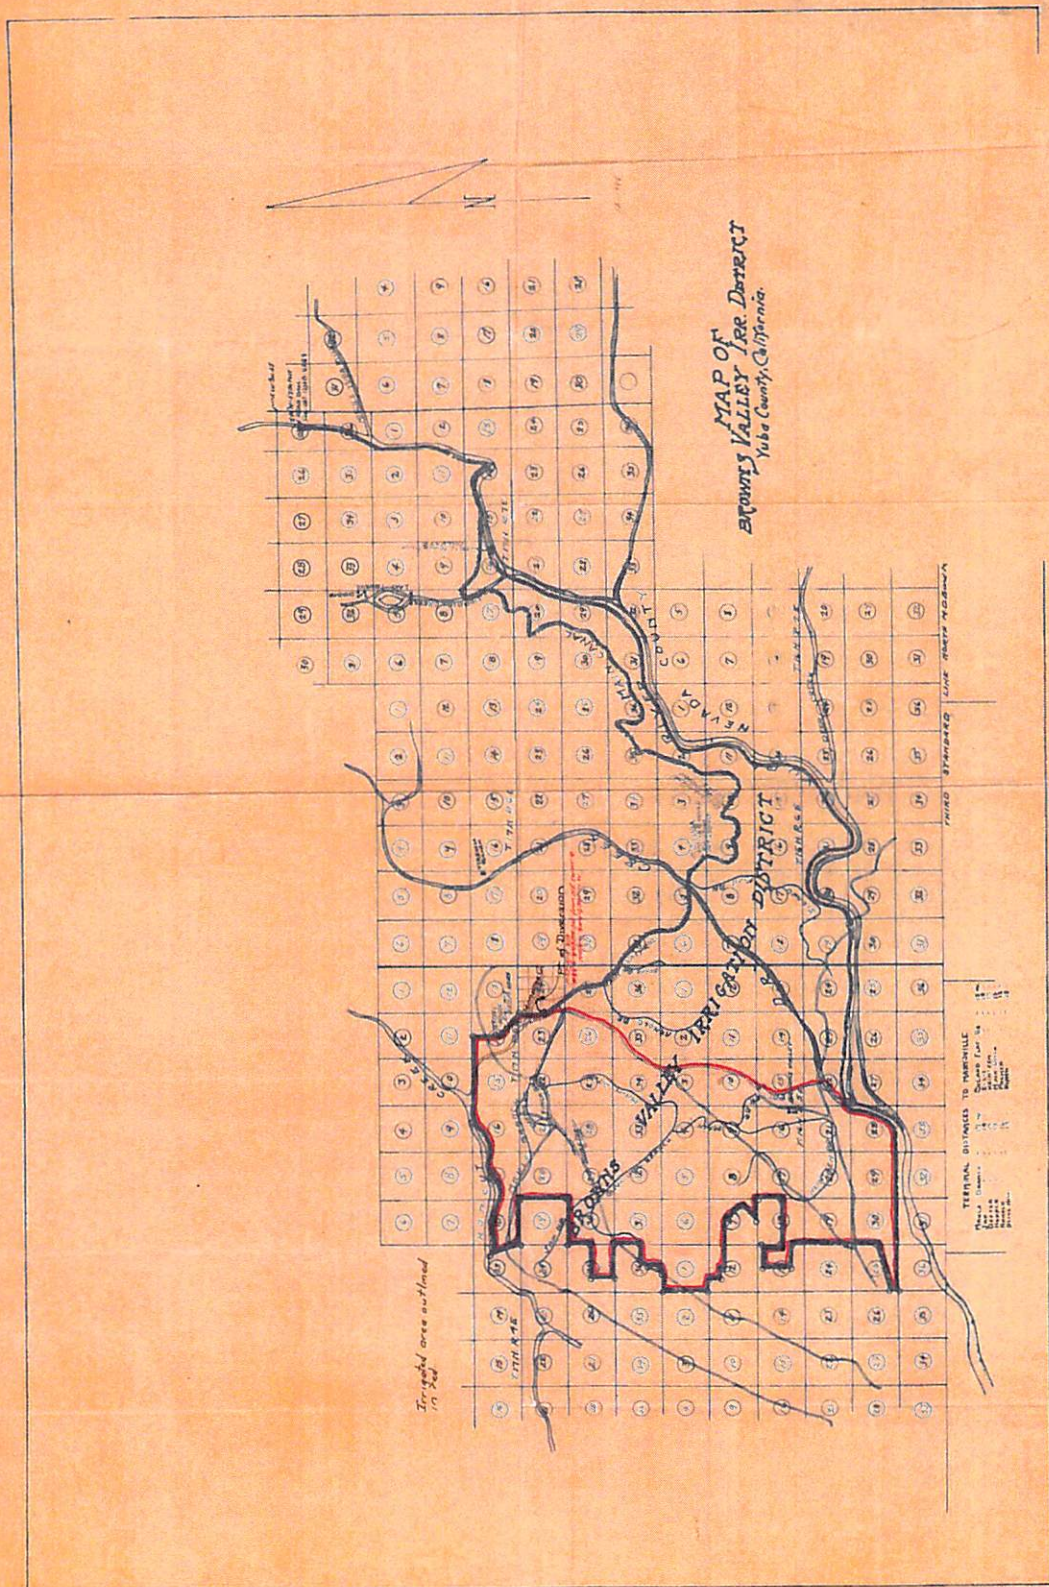

CERTIFICATION:

I, Anne Williams, 455 University Ave Suite 100, Sacramento, California, hereby certify that this Alternative Compliance Plan is in compliance with Chapter 2.8, Section 935 of the California Code of Regulations. This Alternative Compliance Plan is reasonable and practical (based on my multiple site visits and knowledge of District water rights and operation), and facilitates the District's water right reporting and the Division's overall water right management and regulation pursuant to Title 23, California Code of Regulations.

Anne Williams
