GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream system.

An appropriative right is required for use of water on non-riparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. After the formation of the California Water Commission back on December 19, 1914, new appropriators have been required to obtain a permit and license from the State. Appropriative rights can be granted to waters "foreign" to the natural stream system.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users as set forth in Water Code section 5100 with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

Dear Miss Mrowka

the packet and I hope I have
filled it out correctly.

Thank you for

May I have

one more "Statement" for our
winter range near Paynes Creek.
This water is a diversion
known as the Nanny ditch.

Again used since the late 1800's
1/4 of the water was deeded

to Mrs Woodward a sister and
neighbor to the Nanny's. As
a youngster I knew the ranch

as the Child's ranch - Olive
Childs was born Olive Nanny
and after the property was sold
& resold I bought 3500 acres

of the heart including rights to
3/4 of the water and am now
irrigating with it. The Berner
Woodwards and I have a

"Country" agreement which better
be formalized. They pump out of
the ditch 6 hrs a day and
let the water run in its
intirety 18 hrs to reach our
land. I have a 5 year contract
with QCS and this coming year
I will be eligible for ditch
improvement and I want to
be sure the water is correctly
owned.

After you finish with me
you'll be ready to write for
"Mother Earth"

Thank you

Elizabeth Seward

Telephone ☒ Number 916-595-4420

Individual(s)/Agency Contacted Elizabeth Hanna Seward

Conversation Description I called Ms. Seward in response to her
letter regarding obtaining water rights for 3 springs
on her property. Apparently, the name of the spring
which she has been using is 3 springs & 3 1/2 springs,
there are 3 springs. She stated that her family
bought the ranch in 1924 and that the spring which
she is currently using had already been in use on the
ranch since the 1890's. In the 1950's they traded
some the land which the spring is on to the USFS,
retaining a right-of-way to the spring pipeline to
the Ranch. The spring has been in continual use
since the 1890's on her ranch.

I am sending her paperwork to file a statement of
water use.

Gentlemen:

I wish to file waters rights on springs which have served my property since the early 1900's. Due to a land trade with the U.S. Forest Service, 3 springs now are outside our ownership and the pipeline carrying the water down to the headquarters area passes through USFS land.

Will you please send me two sets of documents so I can initiate this filing. Thanking you in advance.

Sincerely,

Elizabeth Hanna Seward

STATEMENT OF WATER DIVERSION AND USE

(This is not a Water Right)

This statement should be typewritten or legibly written in ink.

A. Name of person diverting water Elizabeth Hanna Seward, Route 5, Box 2500
 Address ⑥ Ranch Mill Creek, CA 96061 Telephone: 916 595-4420

B. Name of body of water at point of diversion Three Fork Spring
 Tributary to Mill Creek indirectly

C. Place of diversion SW 1/4 SE 1/4 Section 15, Township _____, Range T29N, R4E B&M,
TEHAMA County, or locate it on sketch of section grid on reverse side with regard to section lines or prominent local landmarks.

D. Name of works Three Fork Spring

E. Capacity of diversion works adds 90 lbs of pressure - Minimum 100 gals m cubic feet per second
 Capacity of storage reservoir none - surge tank 400 gallons gallons per minute
 State quantity of water used each month in gallons or acre-feet

| Year | Jan. | Feb. | Mar. | Apr. | May | June | July | Aug. | Sept. | Oct. | Nov. | Dec. | Total Annual |
|------|------|------|------|------|------|------|------|------|-------|------|------|------|--------------|
| | 1000 | 1000 | 1000 | 1000 | 1000 | 4000 | 5000 | 5000 | 5000 | 4000 | 1000 | 1000 | 30000 |

If monthly and annual use are not known, check months in which water was used. State extent of use in units, such as acres of each crop irrigated, average number of persons served, number of stock watered, etc.

Maximum annual water use in recent years 30,000 gallons
 Minimum annual water use in recent years 30,000 acre-feet
 Type of diversion facility: gravity X, pump _____

Method of measurement: weir _____, flume _____, electric power meter _____, water meter _____, estimate X

F. Purpose of use (what water is being used for) Household - 3 - Garden irrigation and Fire protection - Our system has fire hydrants

G. General description or location of place of use (use sketch of section grid on reverse side if you desire)

H. Year of first use as nearly as known 1890
