

Letter for SSMP Board for March 19th 2019 Meeting at the North Shore Yacht Club

To whom it may concern,

We are the residents of North Shore and we are asking that you please help us save the Salton Sea. Those who have a voice and a vote are much closer to the authorities (governing bodies) and have more access to help us save the Salton Sea. It is more evident now that water is life and all of the water in the Salton Sea is primarily not freshwater it contributes beauty to our community. If you come to the Salton Sea one afternoon to see the sunset or see it during a full moon night, you would be able to see the moon light reflecting off of the water and see how it inspiring this sight is.

We the community of North Shore, are hard-working people. We are humble, we love our children and it is for them that we are worried about the Salton Sea evaporating. We are concerned that the receiving Salton Sea is causing different Health problems in our community. For example, some folks I have had skin issues where they have developed allergies and skin blemishes, others have had nosebleeds and have developed asthma as well. These health issues concern us gravely, we are concerned that exposure of the Salton Sea bed will cause the dust particles to not only affect our health issues but also affect our agricultural industry, where the exposure to the Salton Sea playa dust will affect fruit trees, vegetables and other plants around us. We are worried that these dust particles are toxic, potentially filled with chemicals or other toxins that can harm us severely and cause death in our community.

Not only is this a grave problem for the health of community members, but should be a concern for the economy of our Valley. The Coachella Valley is a major contributor to the economy through the agricultural industry, we produce the fruits and vegetables and without the Salton Sea the Coachella Valley will become a lifeless area. Those who remain will have to leave to another place. We will end up losing our homes, which we have built up through hard work, love and labor in this community. Without our community, we would not know what we would work, for our work is in the fields and our homes/community is here.

Let's work together to make the difference. We ask wholeheartedly that we work together for to save the Salton Sea so that we've we have have a better future for the next generations. In saving the Salton sea we would not only be saving our communities but we would also be creating new opportunities for other folks, including tourists to come and enjoy the beautiful Salton Sea.

Elias, Irma Torres, Ramona Aide Biarco, G.R.H., B. R.

A quien Corresponda.

Señoras y Señores, somos los residentes de north shore y estamos básicamente pidiendo de favor que ustedes que pueden ayudar a Salvar la laguna, los que tienen voz y voto y están más cerca de las autoridades, y los altos mandos ayudenos a salvar la laguna, porque ahora si que el agua es vida y aunque es sabida primero que nada es algo muy hermoso, bueno si ustedes vinieran aca y por ejemplo vieran un atardecer les encantaria, o esas noches de luna si vieran que bonito se refleja sobre el agua es algo impresionante, nosotros somos personas muy trabajadoras, sencillas y que amamos a nuestros hijos y es por ellos que estamos muy preocupados por que la laguna se esta secando y eso esta causando enfermedades en las personas, ~~algunas~~ algunas tienen manchas en la piel, otras tienen alergias, les sangra la nariz otros les a dado asma entonces esas enfermedades nos preocupan mucho, eso sin contar que al irse secando, el polvo acabara con los arboles frutales, las verduras, las plantas y al final algunos moriremos por los químicos del polvo toxico.

Hoy por hoy esto es un problema muy grave si se ponen a pensar afectara tambien la economia porque nuestro valle es el mayor impulsor en la economia por todas ^{las} frutas, verduras y maiz al final este valle de coachella sera Zona muerta, y los que quedentendrian que hirse a otro lugar y perderiamos nuestras casas que con tanto esfuerzo trabajo y amor construimos y no sabriamos en que trabajar porque nosotros somos gente del field. Entonces hagamos pntes la diferencia trabajemos por nuestra laguna para tener un mejor futuro para las nuevas generaciones, se los pedimos de todo corazon.

Talves si la laguna se arregla vendrian turistas de muchos lugares del mundo a ver y disfrutar de un verano espectacular. ATTE: Delia Centeno
