P.O. Box 2000
Sacramento, CA 95812-2000

PROJECT TITLE: Grizzly Forebay Dam Outlet Valve Retrofit Project

APPLICANT: Pacific Gas and Electric Company
c/o Melissa Brosnan
77 Beale Street, Mail Code N10A
San Francisco, CA 94177

PROJECT DESCRIPTION: Pacific Gas and Electric Company (PG&E), proposes to retrofit the outlet valve on Grizzly Forebay Dam to facilitate compliance with streamflow release increases required by the Federal Energy Regulatory Commission (FERC) Order issued January 11, 2006, amending the Bucks Creek Project license (FERC No. 619). The project is located on lands within the Plumas National Forest, where PG&E owns and operates the hydroelectric project under special use permit from the U.S. Forest Service.

Project retrofit work will include modifications to the outlet valve at Grizzly Forebay Dam to increase capacity, allowing for flow release equal to or greater than eight cubic feet per second (cfs) as seasonally required. Work consists of closing an upstream gate on the low level outlet to allow replacement of the existing downstream valve with a pressure reducing valve and hood assembly. Additionally, a concrete valve pad and footings will be constructed along with minor modifications to access the immediate area of the dam face. Streamflow releases will be maintained throughout the work phase. Construction activities will not begin until Bald Eagle fledging has been completed, and the affected area will be restored after completion of construction activities.

PROJECT PURPOSE: The purpose of the project is to enlarge the facility outlet valve and upgrade access to the outlet valve area of the dam.

WATER SOURCES: Grizzly Creek (POD within NE ¼ of section 34, T24, R6E) in Plumas County, and transfers from Bucks Creek (PORD within the SW ¼ of section 29, T24N, R 7E MDBM) and Milk Ranch Creek (POD within the NW ¼ of section 5, T24N, R7E, MDBM) in Plumas County.

California Environmental Protection Agency

EXEMPT STATUS: Categorical Exemption for repair, maintenance and restoration of existing facilities, in accordance with title 14, California Code of Regulations, Sections 15301(b) and (d). CEQA applies only to projects that have the potential for causing a significant effect on the environment.

REASONS WHY PROJECT IS EXEMPT:

1. This project will not cause significant adverse impacts on any sensitive environment and will not result in significant cumulative impacts.
2. There are no state or federal threatened or endangered aquatic species known within a two-mile radius from the project site. To avoid potential risk of disturbance to local Bald Eagle breeding activities, construction activity will be delayed until after all fledging has been completed at the occupied nest located approximately one-half mile from the site.
3. The project will not result in impacts that are significant when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects.
4. There are no known hazardous materials at or around the project site that may be disturbed or removed.
5. No long-term impacts to water quality or beneficial uses will result from this project.
6. There are no known cultural resource sites at or around the project site that may be disturbed or removed.
7. It appears that there is no possibility that this project may have a significant effect on the environment.
