

Chili Bar - Response to Comments on California Environmental Quality Act (CEQA) Document – Initial Study & Draft Negative Declaration

Commenting Organization* (Representative)	Response to Comment
Army Corps of Engineers (Peck Ha)	Thank you for your comments regarding the draft Negative Declaration for the Chili Bar Hydroelectric Project (Project) (ACOE Reference No. SPK-2007-02147). The Project covered by this water quality certification does not include any discharges of dredged or fill material to waters of the United States. As a result, wetlands delineation is unnecessary.
Caltrans (Jorge Riveras Jr.)	Thank you for your letter. To keep up to date on this and other Federal Energy Regulatory Commission water quality certifications, please subscribe to the “Water Rights Water Quality Certification” Subscription List online at: http://www.waterboards.ca.gov/resources/email_subscriptions/swrcb_subscribe.shtml#rights
American Heritage Land and Home Inc. (Candy Wall)	Thank you for your inquiry. The proposed project will have no significant effects on the parcel in question. No change to the CEQA document is necessary.
* The deadline to provide comments was February 13, 2012.
