Hello,

My name is Michael Mees a student at HSU and I am honored to be currently living on unceded Wiyot land. I am writing to voice my support for this project. The DEIR was conducted and presented very thoroughly. Salmon are vital to the lively hoods and way of life for traditional peoples in these areas. It is tantamount to their culture and is what connects them to each other and the land. Salmon is also vital to a thriving fishing economy. These dams have all but killed these practices along the Klamath watershed. It is about time that we right the wrongs from our past and remove them to restore and revitalize these areas. Thank you for your hard work and collaboration.
