Subject: I Support Klamath Dam Removal
Date: Saturday, February 23, 2019 4:33:55 PM

Dear State Water Resources Control Board,

I am perpetually baffled by the fact that salmon is more expensive than beef. This historic renewable resource should be better protected and removing dams is the simplest way to protect their spawning grounds. In previous cases of dam removal, rivers return to a nearly wild state within months, enabling salmon to thrive and rejuvenate forest systems by bringing in tons of nutrients from their ocean forage.
