**Subject:** I Support SAVING Scott dam at Lake Pillsbury  
**Date:** Sunday, February 10, 2019 8:54:32 AM

---

Dear State Water Resources Control Board,

I strongly support saving Scott dam at Lake Pillsbury.  
Keeping this dam is way more beneficial then destroying it.  
The people of Potter Valley have been depending on this  
water for a hundred years. Without the water from Scott dam.  
Potter Valley would dry up. Also Lake Mendocino would go dry  
60 percent of the time!

Due to climate change and global warming, detroying Scott dam  
would actually have devastating impacts on Salmon in the Eel river.  
In the summer months Scott dam releases cold oxygenated water for fish  
to survive. Without the dam, the upper Eel river would become a small trickle  
in the summer months killing fish due to lack of oxygen.

Wildlife depends on Lake pillsbury, Elk, Eagles, Bear, Deer, Mountain lion, are all well  
established  
thanks to Lake Pillsbury.

Please save Scott dam and Lake pillsbury !

Sincerely,

John Steinhart
