Subject: Klamath River Dams

To Whom It May Concern,

Please use your authority to enforce the Clean Water Act, support the Klamath River Dam removal, improve long-term water quality in the Klamath River, support fishing, support the tribes, and restore the health of our ecosystems along the Klamath. We should retire and remove all hydroelectric structures along the mainstem of the Klamath.

Please do the right thing for the people and our environment which sustains our life.
