Subject: EIR and the Dams

Dear Mr. Thaler,

If you have to do an EIR on the Dams, you should have to do an EIR on Crystal Geyser! They are much more polluting than the situation at the dams.

If you think you must listen to those people who want you to do things to get rid of the dams because they prevent the salmon from spawning and they want a river to run free and clear from all dams, you will be mistaken. You see they "work" for the United Nations (UN) and their "Sustainable Development." The UN considers dams, irrigation, cows in the water, domestic animals, logging, even the culture of rural America is unsustainable and they say so in their 1992, 4 treaties: [1] Agenda 21, [2] The Wildland Project, [3] Biodiversity Treaty and [4] the NGO Alternative Treaty's. Please educate yourselves!

They all want our dams destroyed, as does the Karuk Hierarchy.

That one Karuk who told you to do your duty, 3 times, I did not quite understand. A Stakeholder, Craig Tucker, convinced them the dams were bad.

Stakeholders "work for" and support the UN Treaties. The only stake they have is for the Organizations they support.

It is too bad that you do not understand that all these regulation-laws that have been put upon us, how it makes us feel.

It is destroying our culture, our way of life, our economy. The government which is supposed to protect us, has "invaded us with domestic violence." Read, Article IV. Sec 4, since you are part of our government, but we did not elect you. You were put upon us, to regulate us and usurp our Rights!

Thank you, sincerely,

Nita
