Mr. Brian Deason  
Hydroelectric Compliance Analyst  
El Dorado Irrigation District  
2890 Mosquito Road  
Placerville, CA 95667

NOTICE OF APPLICABILITY (NOA), GENERAL 401 WATER QUALITY CERTIFICATION REQUIREMENTS FOR THE EL DORADO IRRIGATION DISTRICT’S NO NAME CREEK STREAMGAGE INSTALLATION, OGILBY CREEK STREAMGAGE INSTALLATION, AND BULL CREEK STREAMGAGE INSTALLATION, EL DORADO COUNTY

On August 18, 2016, the El Dorado Irrigation District (District or Applicant) filed with the State Water Resources Control Board (State Water Board) a notification requesting coverage under the State Water Board’s April 19, 2012, Clean Water Act Section 401 Water Quality Certification of U.S. Army Corps of Engineers 2012 Nationwide Permits (General Certification) for three projects: (1) No Name Creek Streamgage Installation Project; (2) Ogilby Creek Streamgage Installation Project; and (3) Bull Creek Streamgage Installation Project (collectively referred to as Projects). The District owns and operates the El Dorado Hydroelectric Project (Hydro Project), which is licensed by the Federal Energy Regulatory Commission (FERC) as Project No. 184. The District prepared a Streamflow and Reservoir Storage Gaging Plan (Plan) in 2007, as required by Condition 40 of the Hydro Project’s FERC license (Condition 9 of the State Water Board’s water quality certification). The Plan identifies the need to install a streamgage at No Name Creek, Ogilby Creek, and Bull Creek to measure license-specified minimum streamflow requirements. The Projects are proposed to start on October 1, 2016 and be completed by December 31, 2016.

The Projects will be permitted under United States Army Corps of Engineers’ Nationwide Permit No. 5 - Scientific Measurement Devices, and are subject to the conditions and requirements contained therein. After review of the notifications and the supplemental materials (collectively Application Packages) submitted by the Applicant, the State Water Board has determined that the Projects qualify for enrollment under the General Certification, as issued under the General Order pursuant to section 3838 of the California Code of Regulations.

SUMMARIES OF THE PROJECTS

No Name Creek

The No Name Creek Streamgage Installation Project (No Name Creek Project) is located on No Name Creek, approximately 2.4 miles west of Kyburz in El Dorado County (Latitude: 38°45’49.19” N and Longitude: 120°20’18.35” W). The No Name Creek Project will take place within approximately 0.003 of an acre of waters of the United States. The District will dewater the construction area and modify the creek channel to fully seat a prefabricated H type Flume assembly within the creek channel. Additionally, the District will install a gage house. The flume will be capable of measuring
El Dorado Irrigation District

Streamgage Installation Projects for No Name Creek, Ogilby Creek, and Bull Creek

flows between 0 and 5.39 cubic feet per second (cfs), which will allow measurement of the license-specified minimum streamflow requirements of 1 cfs or natural flow in No Name Creek below the No Name Creek Diversion Dam.

Ogilby Creek

The Ogilby Creek Streamgage Installation Project (Ogilby Creek Project) is located on Ogilby Creek, approximately 6.8 miles east of Pollock Pines in El Dorado County (Latitude: 38°45'46.75" N and Longitude: 120°28'14.50" W). The Ogilby Creek Project will take place within approximately 0.003 of an acre of waters of the United States. The District will dewater the Ogilby Creek diversion canal and modify an existing diversion structure to support a prefabricated H type Flume assembly. Additionally, the District will install a gage house within an existing building. The flume will be capable of measuring flows between 0 and 5.39 cfs, which will allow measurement of the FERC license-specified minimum streamflow requirement of 1 or 2 cfs (depending on the month) or natural flow in Ogilby Creek below the Ogilby Creek Diversion Dam.

Bull Creek

The Bull Creek Streamgage Installation Project (Bull Creek Project) is located on Bull Creek, approximately 9.8 miles east of Pollock Pines in El Dorado County (Latitude: 38°45'54.46" N and Longitude: 120°25'41.08" W). The Bull Creek Project will take place within approximately 0.004 of an acre of waters of the United States. The District will dewater the construction area and install a prefabricated H type Flume assembly to an existing diversion structure. Additionally, the District will repair the existing diversion structure and install a gage house within an existing building. The Bull Creek flume will be capable of measuring flows between 0 and 1.95 cfs, which will allow measurement of the license-specified minimum streamflow requirements of 1 cfs or natural flow in Bull Creek below the Bull Creek Diversion Dam.

CALIFORNIA ENVIRONMENTAL QUALITY ACT

As explained in the General Certification, the certification of projects under Nationwide Permit No. 5 generally is exempt from the California Environmental Quality Act (CEQA) because these Projects should not have a significant effect on the environment. Notice of Exemptions for the Projects will be filed with the State Clearinghouse within five days of issuance of this NOA. The following table outlines how each of the Projects qualifies for multiple CEQA exemptions.

A hard copy of the General Certification is enclosed. An electronic copy of the General Certification can also be found on the State Water Board’s website at:

The Projects shall proceed in accordance with the conditions and requirements contained in the General Certification and this NOA. The Application Packages include detailed project descriptions and impact avoidance and minimization measures. If the Projects are modified from the provided project descriptions then coverage under the General Certification is no longer permitted. The Applicant shall promptly notify the State Water Board’s Deputy Director for Water Rights of any significant modifications to the Projects.

CONDITIONS

State Water Board staff has determined that the proposed activities may proceed under the General Certification. The following conditions and requirements from the General Certification are applicable to the Projects:

1. **Subject to Review:** This Certification [water quality certification] action is subject to modification or revocation upon administrative or judicial review, including review and amendment pursuant to the Water Code, section 13330, and the California Code of Regulations (Cal. Code Regs.), title 23, section 3867 and following.

2. **Hydroelectric Facilities Requiring a Federal Energy Regulatory Commission (FERC) License:** This Certification action is not intended and shall not be construed to apply to any activity involving a hydroelectric facility requiring a FERC license or an amendment to a FERC license, unless the pertinent Certification application was filed pursuant to Cal. Code Regs., title 23, section 3855, subdivision (b), and the application specifically identified that a FERC license or amendment to a FERC license for a hydroelectric facility was being sought.

3. **Fees:** This Certification is conditioned upon total payment of any fee required under California Code Regulations, title 23, section 3830 et seq., and owed by the applicant.

4. **Porter-Cologne Water Quality Control Act:** All activities shall comply with all requirements of California’s Porter-Cologne Water Quality Control Act (Wat. Code, §13000, et seq.) and applicable State or Regional Water Quality Control Plans.

5. **Unenforceable Conditions:** If any conditions are found to be invalid or unenforceable, certification for all activities to which that condition applies is denied.

6. **Water Diversion and Use:** Certification is denied for any activity involving a new or modified diversion or impoundment of water, unless the State Water Board has already approved a water rights permit, or such diversion or impoundment is solely for the purpose of drainage or flood control.

7. **Other Federal Permits and Licenses:** This Certification action is not intended and shall not be construed to apply to any discharge from any activity requiring the issuance or amendment of any other federal license or permit, including enrollment under two or more Nationwide Permits.
8. **Endangered Species:** Certification is denied for any project that would result in the taking of any candidate, threatened, or endangered species or any other violation of the federal Endangered Species Act (16 U.S.C. §1531, et seq.) and the California Endangered Species Act (Fish and G. Code, §2050, et seq.).

9. **Compensatory Mitigation:** No project that requires compensatory mitigation is eligible for enrollment under this Certification.

10. **Hazardous Waste Sites:** Certification is denied for any project located on a site which is included on any list compiled pursuant to section 65962.5 of the Government Code (i.e., "Cortese List").

11. **Enforcement:**
   a) In the event of any violation or threatened violation of the conditions of this Certification, the violation or threatened violation shall be subject to any remedies, penalties, process, or sanctions as provided for under state law. For purposes of Colonel William J. Leady - 5- APR 192D §401 (d) of the Clean Water Act, the applicability of any state law authorizing remedies, penalties, process, or sanctions for the violation or threatened violation constitutes a limitation necessary to assure compliance with the water quality standards and other pertinent requirements incorporated into this Certification.

   b) In response to a suspected violation of any condition of this Certification, the State Water Board or a Regional Water Quality Control Board may require the holder of any permit or license subject to this Certification to furnish, under penalty of perjury, any technical or monitoring reports the State Water Board deems appropriate, provided that the burden, including cost, of the reports shall bear a reasonable relationship to the need for the reports and the benefits to be obtained from the report.

   c) In response to any violation of the conditions of this Certification, the State Water Board may add to or modify the conditions of this Certification as appropriate to ensure compliance.

If you have questions regarding this NOA, please contact the Hydro Project Manager, Mr. Philip Choy, by phone at (916) 341-5408 or by email at Philip.Choy@waterboards.ca.gov.

Sincerely,

Thomas Howard
Executive Director

Dear Colonel Leady:

CLEAN WATER ACT SECTION 401 WATER QUALITY CERTIFICATION OF 2012 NATIONWIDE PERMITS

The previous U.S. Army Corps of Engineers (Corps) Nationwide Permits (NWPs) became effective on March 19, 2007, and expired on March 18, 2012.

In your letter of February 23, 2011, the State Water Resources Control Board (State Water Board) was informed of the notification in the Federal Register regarding proposed NWPs for 2012. (76 Fed. Reg. 9174-01 (Feb. 16, 2011).) The State Water Board subsequently received notice of the final NWPs on February 21, 2012. (77 Fed. Reg. 10184-01 (Feb. 21, 2012).) This notice served as the Corps’ complete application for a water quality certification (certification). In your letter of February 29, 2012, you requested that the State Water Board review the newly issued NWPs and determine whether to certify, certify with conditions, or deny certification pursuant to Clean Water Act section 401 (33 U.S.C. § 1341).

In addition to the Corps’ notice in the Federal Register, the State Water Board also posted notice of the Corps’ application for certification of the NWPs on our 401 Program web page at: http://www.waterboards.ca.gov/water_issues/programs/cwa401/notices.shtml on February 27, 2012, for a 45 day noticing period which ended on April 12, 2012.

State Water Board staff reviewed the newly issued NWPs, considered comments received, and determined whether to certify, certify with conditions, or deny certification for each of the NWPs. California’s certification decision is required within 60 days, according to the notice in the Federal Register; i.e., by Monday, April 23, 2012.

For this action, the State Water Board is Lead Agency for the purposes of compliance with the California Environmental Quality Act (CEQA) and is required to analyze the environmental impacts and make a determination for each NWP. In considering this task and the timeframe...
allowed, the State Water Board elects to issue certifications for those NWPs covering activities that are categorically exempt from CEQA at this time.

As authorized by the State Water Board, I am issuing a certification for 13 of the 50 NWPs on this basis. The enclosed certification identifies those NWPs and the associated conditions. I request that you notify the State Water Board if any of these conditions do not comport with your regulations in title 33, sections 325.4 and 330.4 of the Code of Federal Regulations. In addition, the Corps has the right to petition the State Water Board for reconsideration of this certification in accordance with California Code of Regulations, title 23, section 3867 et seq.

If you would like to discuss these matters further, please contact Ken Harris, Assistant Deputy Director, Division of Water Quality, at (916) 341-5500 (kharris@waterboards.ca.gov), or Vicky Whitney, Deputy Director, Division of Water Quality, at (916) 341-5568 (vwhitney@waterboards.ca.gov).

Sincerely,

Thomas Howard
Executive Director

CLEAN WATER ACT SECTION 401 WATER QUALITY CERTIFICATION OF U.S. ARMY CORPS OF ENGINEERS 2012 NATIONWIDE PERMITS

PROJECT: U.S. Army Corps of Engineers 2012 Nationwide Permits

APPLICANT: Colonel William Leady, P.E.
District Commander
U.S. Army Engineer District, Sacramento
Corps of Engineers
1325 J Street
Sacramento, CA 95814-2922

This Certification responds to your request on behalf of U.S. Army Corps of Engineers for the 2012 Nationwide Permits.

ACTION:

☐ Order for Standard Certification  ☐ Order for Denial of Certification
☐ Order for Technically Conditioned Certification  ☐ Order for Waiver of Waste Discharge Requirements

Pursuant to title 23, section 3838 of the California Code of Regulations, the Executive Director hereby makes the following Clean Water Act (CWA) Section 401 Water Quality Certification (Certification) determination for the U.S. Army Corps of Engineers' (Corps) Nationwide Permits (NWP) which became effective on March 19, 2012, and which will expire on March 18, 2017.

A. CERTIFICATION:

Commencing on the date of this certification, the 13 NWPs listed in Table A are hereby granted certification subject to the Conditions and the Notification Requirements described below. The activities authorized by these 13 NWPs are exempt from California Environmental Quality Act (CEQA) review since their activities should not have a significant effect on the environment, either individually or cumulatively. Because these 13 NWPs are exempt from CEQA, for purposes of the following conditions, the term "project" means "the whole of an action, which has a potential for resulting in either a direct physical change in the environment, or a reasonably foreseeable indirect physical change in the environment." (Cal. Code Regs., tit. 14, § 15378.)

CONDITIONS:

1. Subject to Review: This Certification action is subject to modification or revocation upon administrative or judicial review, including review and amendment pursuant to the Water Code, section 13330, and the California Code of Regulations (Cal. Code Regs.), title 23, section 3867 and following.

2. Hydroelectric Facilities Requiring a Federal Energy Regulatory Commission (FERC) License: This Certification action is not intended and shall not be construed to apply to any activity involving a hydroelectric facility requiring a Federal Energy Regulatory Commission (FERC) license or an amendment to a FERC license, unless the pertinent Certification application was filed pursuant to Cal. Code Regs., title 23, section 3855, subdivision (b), and the application specifically identified that a FERC license or amendment to a FERC license for a hydroelectric facility was being sought.

3. Fees: This Certification is conditioned upon total payment of any fee required under California Code Regulations, title 23, section 3830 et seq., and owed by the applicant.

4. Porter-Cologne Water Quality Control Act: All activities shall comply with all requirements of California’s Porter-Cologne Water Quality Control Act (Wat. Code, §13000, et seq.) and applicable State or Regional Water Quality Control Plans.

5. Unenforceable Conditions: If any conditions are found to be invalid or unenforceable, certification for all activities to which that condition applies is denied.

6. Water Diversion and Use: Certification is denied for any activity involving a new or modified diversion or impoundment of water, unless the State Water Resources Control Board (State Water Board) has already approved a water rights permit, or such diversion or impoundment is solely for the purpose of drainage or flood control.

7. Other Federal Permits and Licenses: This Certification action is not intended and shall not be construed to apply to any discharge from any activity requiring the issuance or amendment of any other federal license or permit, including enrollment under two or more NWPs.

8. Endangered Species: Certification is denied for any project that would result in the taking of any candidate, threatened, or endangered species or any other violation of the federal Endangered Species Act (16 U.S.C. §1531, et seq.) and the California Endangered Species Act (Fish and G. Code, §2050, et seq.).

9. Compensatory Mitigation: No project that requires compensatory mitigation is eligible for enrollment under this certification.

10. Hazardous Waste Sites: Certification is denied for any project located on a site which is included on any list compiled pursuant to section 65962.5 of the Government Code (i.e., “Cortese List”).

11. Enforcement:

   a) In the event of any violation or threatened violation of the conditions of this certification, the violation or threatened violation shall be subject to any remedies, penalties, process, or sanctions as provided for under state law. For purposes of
§401(d) of the CWA, the applicability of any state law authorizing remedies, penalties, process, or sanctions for the violation or threatened violation constitutes a limitation necessary to assure compliance with the water quality standards and other pertinent requirements incorporated into this Certification.

b) In response to a suspected violation of any condition of this Certification, the State Water Board or a Regional Water Quality Control Board (Regional Water Board) may require the holder of any permit or license subject to this certification to furnish, under penalty of perjury, any technical or monitoring reports the State Water Board deems appropriate, provided that the burden, including cost, of the reports shall be a reasonable relationship to the need for the reports and the benefits to be obtained from the report.

c) In response to any violation of the conditions of this Certification, the State Water Board may add to or modify the conditions of this certification as appropriate to ensure compliance.

12. NWP 4 – Fish and Wildlife Harvesting, Enhancement, and Attraction Devices and Activities: No activities that could be permitted under NWP 48 - Commercial Shellfish Aquaculture Activities, shall be permitted under this certification of NWP 4.

13. NWP 6 – Survey Activities: No survey activities involving directional drilling which may cause a discharge of drilling fluids, compounds, or "muds" due to ground fractures (i.e., "frac-outs") to waters of the state are permitted under this certification of NWP 6.

14. NWP 12 – Utility Line Activities: Because of the number, geographic scale, and variety of potential environmental impacts that are possible under NWP 12, permanent impacts due to any activities under this certification of NWP 12 are prohibited. Routine utility line construction and maintenance activities in waters of the state are permitted when the proposed activity qualifies for a CEQA exemption, and when all of the following conditions are met:

a. Location Restrictions

Lake Tahoe Basin: Any project work occurring in the Lake Tahoe Basin is prohibited.

Multiple Regional Water Boards: Any project which may discharge to the jurisdiction of more than one Regional Water Board is prohibited.

b. Overall Project Size Restrictions

Total Area: The total ground disturbance of any project is limited to a maximum of 5 acres.

Total Length: The total utility line length of any project is limited to a maximum of 5 miles.

c. Restrictions on Project Impacts to Waters of the State

Area: Not more than one-half (½) acre of temporary impacts to waters of the state are permitted under this certification for any project.
Length: Not more than a total of 400 linear feet of temporary impacts to waters of the state for any project is permitted under this certification.

Project footprint: Maintenance of existing facilities which replaces but does not increase the size or impact of the existing facility is permitted, if the impact area and length requirements above are observed.

Duration: Temporary impacts permitted by this certification shall be as short as practicable, but in no case more than 90 days, during the construction phase of the project. The construction phase commences with the first activity involving the movement of earth or the discharge of dredged or fill material (e.g., site grading). Site restoration activities for temporary impacts to waters of the state must be completed as soon as possible after completion of construction, and in no case shall conclude more than 30 days after of the completion of construction activities.

d. Permitting Restrictions

Stacking: For any project subject to this certification, the project may not receive more than one NWP 12.

Rivers and Harbor Act Section 10: Projects requiring a permit under section 10 of the federal Rivers and Harbors act are prohibited.

e. In-Waters Work Restrictions

Work Sites: Placement of work areas, including pull sites, laydown yards and staging areas, in waters of the state is prohibited.

Hydrology: Applicants excavating with any water of the state shall, upon completion of construction, restore hydrologic functions of the site to comport with the requirements of the applicable water quality control plan (Basin Plan).

Construction activity shall not result in the draining of any water of the state, including wetlands. This may be accomplished through the use of clay blocks, bentonite, or other suitable material (as approved by the Regional Water Boards) to seal the trench.

Trenching: Trenching across streams with flowing water is prohibited.

Directional Drilling: Utility line activities involving directional drilling are prohibited to avoid potential impacts from the discharge of drilling fluids, compounds, or "muds" due to ground fractures (i.e., "frac-outs") to any waters of the state.

Overhead Crossings: Construction, replacement, or maintenance of overhead utility lines (e.g., telephone or electric lines) spanning any water of the state is permitted when such spans require no more than minor trimming of existing vegetation at the site. Any span which removes or substantially alters existing mature riparian trees is prohibited.

Hardscape: Installation of any new or expanded stream channel or bank armor, including: riprap; concrete channel liners; geotextile liners; in-stream armor over or surrounding a utility line or pipes; or, similar artificial structural components placed to prevent channel or bank erosion or movement is prohibited.
f. Construction Activity Restrictions

Topsoil: For any excavation, including utility line trenches, during construction, the top 6 to 12 inches of topsoil shall be removed and stockpiled separately. Following installation of the utility line(s), the topsoil shall be replaced and seeded with native vegetation.

Forested Wetlands: Land clearing of forested wetlands or riparian areas for installation or maintenance of utility lines is prohibited.

Roads: New road construction is prohibited. Maintenance of utility line access roads under this NWP shall be confined to the previously existing road prism. Grading of throughput roads, including any road having a running surface lower than the surrounding terrain on both sides of the road, is prohibited.

Facilities: Construction or expansion of substations is prohibited. Construction of any new intake or outfall structure is prohibited. Construction, replacement, or expansion of facilities in any ocean, bay, tidal waters or the shores thereof is prohibited.

15. NWP 36 - Boat Ramps: NWP 36 is certified for projects meeting all of the following requirements:

   a) A waiver from the District Engineer allowing the project to exceed the 20 foot width or 50 cubic yard limits stated in NWP 36 shall disqualify the project or activity from this certification. Activities that proceed under NWP 36 with a waiver from the District Engineer are required to obtain an individual 401 water quality certification.

   b) Boat ramps installed under this NWP may not excavate into banks to a depth greater than the depths of the material used to construct the ramp itself.

   c) Any material excavated to prepare a site for placement of the permitted fill material must be properly disposed of in an upland area. The disposal area must be located at a sufficient distance away from flowing or standing water such that the excavated material does not erode or move in any way into any water of the state. The disposal area shall be identified in the required pre-construction notification.

   d) No construction requiring the construction of cofferdams or other dewatering structures for the purpose of installing materials such as concrete ramps below existing water lines is permitted.

   e) To prevent the release of uncured cement or cement components into water, use of concrete in areas where ramps may be submerged before the concrete is fully cured is prohibited.

   f) Use of this certification of NWP 36 is prohibited in the Lake Tahoe Basin, Little Truckee or Truckee River watersheds.

16. Waivers by the Corps: Any waiver of the Corps’ NWP conditions or regional conditions for a proposed project shall disqualify that project from enrollment under this certification.
17. Tahoe Basin: Any activity under this certification is prohibited if it occurs within the 100-year floodplain of the Little Truckee or Truckee River watersheds. Any such discharge is prohibited by the Water Quality Control Plan for the Lahontan Region.

NOTIFICATION REQUIREMENTS: Applicants are required to submit notification to the Regional Water Board and State Water Board as directed in Attachment A, 2012 Notification Procedures for Certified Nationwide Permits. For all other NWPs, application for an individual certification is required, regardless of the Corps' PCN requirements.

B. DENIAL WITHOUT PREJUDICE:

Table B presents the remaining 37 NWPs for which State Water Board staff proposes denial of certification without prejudice. These NWPs are: 2, 3, 7, 8, 13, 14, 15, 16, 17, 18, 19, 21, 23, 24, 25, 27, 29, 30, 31, 33, 34, 35, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 48, 49, 50 and the new NWPs 51 and 52. These NWPs have a wide breadth and scope of activities such that their potential direct, indirect, and cumulative impacts could reasonably invalidate their exemption from CEQA. CWA Section 401 certification of projects authorized by these 37 NWPs will be considered on an individual, project-specific basis. Any of these 37 NWPs may be considered by the State Water Board for certification in the future.

C. CEQA:

The state's certification of the Corps' NWPs is a discretionary action that is subject to the environmental review requirements of the California Environmental Quality Act (CEQA). (Pub. Resources Code, § 21000 et seq.) For the certification of the NWPs, the State Water Board is the public agency required to determine whether its issuance of a certification will result in a significant effect on the environment. "A significant effect on the environment" means a substantial adverse change in the physical conditions which exist in the area affected by a proposed project.

The CEQA Guidelines (Cal. Code Regs., tit. 14, § 15000 et seq.) contain a listing of categories of projects which have been determined not to have a significant effect on the environment. (Pub. Resources Code, § 21084.) In order to complete the environmental review required to issue this certification within the Corps' mandated sixty-day review period, the State Water Board may only issue a conditional certification for those NWPs that clearly fit within one or more categorical exemptions.

The State Water Board finds that the NWPs authorized by this certification, when implemented in a manner consistent with the terms of the NWP and all conditions set forth herein, do not result in a significant effect on the environment. As described in Table A, each of the NWPs certified by the State Water Board qualifies for one or more categorical exemptions.

Additionally, these categorical exemptions do not apply when certain exceptions occur. (Cal. Code Regs., tit. 14, § 15300.2.) In cases where a project may fall under an exception to the CEQA categorical exemptions, the project is not eligible for coverage pursuant to this certification. In these cases, the applicant will need to apply for an individual water quality certification. Some of the CEQA exceptions are explicitly stated as a condition to this certification (e.g., Condition 10).

State and Regional Water Board staff shall verify that proposed projects under the 2012 NWPs are CEQA exempt by reviewing the information submitted in the applicant's notification. If it is determined that the proposed project activities are not exempt, then this certification shall not apply.

There are, however, four 2012 NWPs that do not require notification to the State or Regional Water Board:

1. Aids to Navigation;
4. Fish and Wildlife Harvesting, enhancement, and attraction devices and activities;
9. Structures in Fleeting and Anchorage areas; and,
10. Mooring Buoys.

The State Water Board finds that the applicant's notification information is not necessary to determine whether activities covered by any of these four NWPs qualify for the listed CEQA exemptions in Table A above.

The 2012 NWPs 1, 9 and 10 were reissued unmodified by the Corps. The routine placement or maintenance of navigational aids, buoys, moorings and structures in anchorage areas will not cause a significant environmental effect when implemented in accordance with the NWP and certification conditions. In addition, existing statutes and regulations governing those activities (e.g., the California Harbors and Navigation Code, the federal Rivers and Harbors Act, etc.)
ensure minimal environmental impacts from these activities. Therefore, notification is not needed to verify qualification for the CEQA exemption. The State Water Board finds that activities authorized by these three NWPs will not cause any significant environmental effect, including to “sensitive environments” or due to “unusual circumstances” (Cal. Code Regs., tit. 14, §15300.2, subds.(a) & (c)).

The 2012 NWP 4 was reissued unmodified by the Corps. The routine placement of devices such as crab pots and duck blinds, activities such as clam digging, and deployment of open water fish concentrators such as “sea kites” will not cause a significant environmental effect when implemented in accordance with the certification conditions. In addition, existing statutes and regulations governing those activities ensure minimal environmental impacts from those activities. Therefore, notification is not needed to verify qualification for the exemption. The State Water Board finds that the activities authorized by NWP 4 will not cause any significant environmental effect, including to “sensitive environments” or due to “unusual circumstances” (Cal. Code Regs., tit. 14, §15300.2, subds.(a) & (c)).

For those NWPs that are not being certified, Staff notes that CEQA only applies to a public agency’s discretionary approval of projects. Consequently, the rejection or disapproval of a project is not subject to CEQA. (Pub. Resources Code, § 21080, subd. (b)(5)). Therefore, CEQA does not apply to any NWP not authorized pursuant to this certification.

Attachment A: 2012 Notification Procedures for Certified Nationwide Permits
Attachment A

2012 Notification Procedures and Requirements for Certified Nationwide Permits

Notification Requirements:

(In the following discussion, a “Pre-construction Notification” (PCN) is the document submitted to the Corps; a “notification” is the document submitted to the State Water Board and Regional Water Board.)

Applicants for the 2012 certified Nationwide Permits (NWPs) are required to submit notification to the State Water Resources Control Board (State Water Board) and Regional Water Quality Control Board (Regional Water Board) as directed below.

Applicants enrolling under NWPs 5, 6, 11, 12, 20, 22, 28, 32, and 36 are required to submit a signed notification and fees. Applicants enrolling under NWPs 1, 4, 9, and 10 are not required to submit a notification or fees to the State Water Board or a Regional Water Board. The fact that an applicant does not need to submit a notification or pay a fee does not relieve the applicant from adhering to all other conditions of this Certification. Failure to comply with the conditions listed in this Certification may subject a permittee to administrative and/or judicial enforcement.

Notification Procedures and Instructions:

The notification shall be submitted on the 2012 Certified Nationwide Permit Notification Form, which is provided below.

The signed notification shall be received by the appropriate Regional Water Board, with a copy to the State Water Board, not less than 45 days before any activity which may result in a discharge is commenced. To avoid project delays, the applicant should submit the notification as early as possible.

Note that projects requiring compensatory mitigation or which may affect federal or state endangered or listed species do not qualify for CEQA exemptions, and are thus would not meet the conditions of this certification. In this case, an application for an individual certification should be submitted to the appropriate Regional Water Board or, if the project may discharge to the jurisdiction of more than one Regional Water Board, then the application should be submitted to the State Water Board.

Response to Notifications:

The Regional Water Board is responsible for responding to a notification. Response to notifications will be either a Notice of Exclusion (NOE), which informs the applicant that the proposed activity is not qualified for enrollment under this certification, or a Notice of Applicability (NOA), informing the applicant that the proposed activity is qualified for this certification. A NOE may be rescinded and a NOA may be issued upon receipt of additional information requested by Regional Water Board staff.
Timing:

If the applicant does not receive a NOE or NOA from the Regional Water Board within 45 days of the date of receipt of the signed notification, the applicant may assume that the project meets the conditions of certification and may proceed with the project under the conditions of the NWPs and this certification. In no case may the project commence before the appropriate fee is paid.

Instructions for Completion of the 2012 Certified Nationwide Permits Notification Form

Notifications and the appropriate fee shall be submitted to the 401 Program Manager for the affected Regional Water Board, and a copy of the notification shall be submitted to State Water Board’s Division of Water Quality, 401 Certification Program Manager. Addresses and web site information are provided in the 2012 Certified Nationwide Permit Notification Form. A copy of this form follows these instructions.

Forms may also be obtained by contacting the staff of the applicable Regional Water Board.

Fees may be changed at any time. To determine the correct fee, consult the “Dredge and Fill Fee Calculator” under “Resources for Applicants” at: http://www.waterboards.ca.gov/water_issues/programs/cwa401, or contact the Regional Water Board staff. Please attach the fee check to the first page of the signed notification form.

(a) Provide the name, address, telephone number and, if available, e-mail address of:

1) the applicant; and
2) the applicant’s agent (if an agent is submitting the notification).

All regulatory actions, including waivers of action, by any federal agencies must be disclosed in Items (b) and (c).

(b) Provide complete identification of all federal licenses/permits being sought for or applying to the proposed activity, including the:

1) federal agency;
2) type (e.g., Nationwide Permit Number); and
3) file number(ies) assigned by the federal agency(ies), if available.

For each permit identified in (b) above, provide complete copies of either:

1) the application(s) for federal license(s)/permit(s) being sought for the activity; or
2) if no federal applications are required, any notification(s) concerning the proposed activity issued by the federal agency(ies); or
3) if no federal notification is issued, any correspondence between the applicant and the federal agency(ies) describing or discussing the proposed activity.
(c) Copies of any final and signed federal permits, licenses, and agreements.

1) Provide copies of any final and signed federal, licenses, permits, and agreements (or copies of the draft documents, if not finalized) that will be required for any construction, operation, maintenance, or other actions associated with the activity.

2) If no final or draft document is available, a list of all remaining agency regulatory approvals being sought shall be included.

3) If no application, notification, correspondence, or other document must be exchanged between the applicant and federal agency(ies) prior to the start of the activity, the notification to the State Water Board and appropriate Regional Water Board shall include a written statement to this effect. (Note: Certification is denied for any activity requiring the issuance or renewal of more than one federal license or permit; see Condition 7 of the certification).

(d) Provide final copies of all state permits being sought for or applying to the proposed activity, as directed for federal permits in (c) above.

(e) Provide final copies of all local permits being sought for or applying to the proposed activity, as directed for federal permits in (c) above.

(f) Provide a copy of any draft or final CEQA document(s), if available, prepared for this activity. Staff may request copies of all CEQA documents if needed to evaluate the project and its compliance with the terms of this Certification.

(g) Provide a description of your project. This should include a full, technically accurate description, including the purpose and final goal, of the entire activity (Cal. Code Regs., tit. 23, § 3831(e)) or project (Pub. Resources Code, § 21065), including:

1) address (including city and county), assessor’s parcel number and, if available, the longitude and latitude of the project site;

2) a map of appropriate scale and detail to show the project area, key project features, and location of the project in relation to identifying landmarks (e.g., roads, towns, other significant named features);

3) name(s) and hydrologic unit(s) of any receiving water body(ies) that may receive a discharge;

4) type(s) of receiving water body(ies) (e.g., stream channel, lake/reservoir, ocean/estuary/bay, or wetland). For each water body type reported here, provide the total estimated quantity of waters of the United States and the types of discharge material(s) that may cause a temporary impact (or minor permanent impact, in the case of NWP 36) to waters. The estimated quantity of waters to be adversely impacted by any discharge shall be reported in acres and, for channels, shorelines, riparian corridors, and other linear habitat, linear feet. Cubic yards of dredged for fill material shall be reported for all impacts. Significant adverse impacts under this order are not permitted;

5) any delineation report submitted to the Corps for stream, wetland, or other aquatic resources that would be impacted by the proposed activity or project;

6) the total size (in acres), length (in feet) where appropriate, type, and description of the entire project area, including areas outside of jurisdictional waters of the United States;

7) a brief list/description, including estimated adverse impacts of any projects implemented by the project applicant within the last five years or planned for implementation by the applicant within the next five years that are in any way related to the proposed activity or...
that may impact the same receiving water body(ies) as the proposed activity. For purpose of this item, the water body extends to a named source or stream segment identified in the relevant Regional Water Quality Control Plan (Basin Plan);
8) A description of any steps that have been or will be taken to avoid or minimize loss of or significant adverse impacts to beneficial uses of waters of the state, including on-site restoration of the project area; and
9) a discussion of any potential cumulative impacts.

(h) The applicant or authorized agent must sign the document. The notification must be signed by the applicant or the applicant's agent (if an agent is submitting the notification). The notification must include a statement that the submitted information is complete and accurate. The State Water Board is unable to process electronically signed notifications at this time. Notifications bearing the original signature of the applicant or applicant's agent must be submitted as paper forms until further notice.

(g) Full Project Description and Location

Project Name

1. Site Location/Address

Nearest Cross Street(s) if applicable

County                      Total size of Site (acres)  Assessor's Parcel Number

2. Provide latitude/longitude for the approximate center of discharge area; for linear projects, provide coordinates for each end of project in degrees/minutes/seconds (DMS) to the nearest ½ second.

DMS:  N. Latitude  Deg.  Min.  Sec.
      W. Longitude  Deg.  Min.  Sec.
      N. Latitude  Deg.  Min.  Sec.
      W. Longitude  Deg.  Min.  Sec.

Attach a map of at least 1:24000 (1" = 2000') detail of the proposed discharge site (e.g., USGS 7.5 minute topographic map) and pre-project photos.

Provide detailed directions to project location, include identifying landmarks (roads, towns, or other identifying landmarks).

Project Description

Total size and detailed description of the entire project including areas outside of jurisdictional waters of the United States. A full, technically accurate description, including the purpose and final goal, of the entire activity (Cal. Code Regs., tit. 23, § 3831(e)) or project (Pub. Resources Code, § 21065).

Proposed project start date  Expected date of completion

** Provide acres to three decimal places (e.g., 0.006).

### (g) (5)(6)
Report the total size (in acres), length (in feet) where appropriate, type, and description of the entire project area, including areas outside of jurisdictional waters of the United States. Attach delineation report as submitted to Corps of Engineers, if required.
### (g) (7) Previous Projects

Provide a brief list/description, including estimated adverse impacts of any projects implemented by the project applicant within the last five years or planned for implementation by the applicant within the next five years that are in any way related to the proposed activity or that may impact the same receiving water body(ies) as the proposed activity. For purpose of this item, the water body extends to a named source or stream segment identified in the relevant Regional Water Quality Control Plan (Basin Plan).

### (g) (8) (9) Avoidance, Minimization and Cumulative Impacts

Describe any steps that have been taken or will be taken to avoid or minimize loss of or significant adverse impacts to beneficial uses of waters of the state, including on-site restoration of the project area. Include a discussion of any potential cumulative impacts.
Reminders:

1. This Notification must be signed and received no less than 45 days before any activity commences which may result in a discharge.
2. Upon receipt of a signed Notification, the Regional Water Board will either respond with a Notice of Exclusion (NOE) which informs the applicant that the proposed activity is not qualified for coverage or a Notice of Availability (NOA) informing the applicant that the proposed activity is qualified for coverage.
3. The project may not proceed until the appropriate permit fee is received by the Regional Water Board.
4. The appropriate fee is located on the fee calculator at: [http://www.waterboards.ca.gov/water_issues/programs/cwa401/#resources](http://www.waterboards.ca.gov/water_issues/programs/cwa401/#resources)
5. Water Boards addresses and phone numbers are located at: [http://www.waterboards.ca.gov/water_issues/programs/cwa401/docs/staffdirectory.pdf](http://www.waterboards.ca.gov/water_issues/programs/cwa401/docs/staffdirectory.pdf)
6. If the applicant does not receive an NOE or an NOA from the Regional Water Board within 45 days of the date of receipt of the Notification, the applicant may assume that the project meets the conditions of certification and may proceed with the project under the conditions of the NWP and Order number SB12002GN.
7. References in the form to attached documents must include the name of the document, the page number and paragraph number.
STATEMENT OF AUTHORIZATION (Required when applicant is designating an authorized agent)

I hereby authorize _____________________________ to act on my behalf as my agent in the processing of this application and to furnish, upon request, supplemental information in support of this permit application.

PRINT NAME OF APPLICANT (NOT THE AUTHORIZED AGENT)

SIGNATURE OF APPLICANT (NOT THE AUTHORIZED AGENT)

DATE

Application is hereby made for a permit to authorize the work described in this application. I certify, under penalty of perjury, that this application is complete and accurate to the best of my knowledge. I further certify that I possess the authority to undertake the work described herein, or am acting as the duly authorized agent of the applicant. In addition, I certify property owner responsibility and liability for compliance with permit conditions issued for this project for compliance with any future authorization or amendments thereto.

State Water Resources Control Board (Headquarters)
1001 I Street, Sacramento, CA 95814

Updated 1/19/2011
Notice of Exemption

To: Office of Planning and Research
    P.O. Box 3044, Room 113
    1400 Tenth Street
    Sacramento, CA 95812-3044

From (Public Agency):
    State Water Resources Control Board
    P.O. Box 2000
    Sacramento, CA 95812-2000

Project Title: No Name Creek Streamgage Installation (Project)
Project Applicant: El Dorado Irrigation District (District or Applicant)
Project Location - Specific: The Project is located on No Name Creek, approximately 2.4 miles west of Kyburz in El Dorado County.

Project Location - City: N/A Project Location – County: El Dorado County

Description of Nature, Purpose, and Beneficiaries of Project:
The No Name Creek Project will take place within approximately 0.003 of an acre of waters of the United States. The District will dewater the construction area and modify the creek channel to fully seat a prefabricated H type Flume assembly within the creek channel. Additionally, the District will install a gage house. The Project's purpose is to measure El Dorado Hydroelectric Project license-specified minimum streamflow requirements in No Name Creek below the No Name Creek Diversion Dam.

Name of Public Agency Approving Project: State Water Resources Control Board
Name of Person or Agency Carrying Out Project: El Dorado Irrigation District

Exempt Status: (check one):
☐ Ministerial (Sec. 21080(b)(1); 15268);
☐ Declared Emergency (Sec. 21080(b)(3); 15269(a));
☐ Emergency Project (Sec. 21080(b)(4); 15269(b)(c));
☒ Categorical Exemption. State type and section number: Class 3, §15303; Class 4, §15304; Class 6, §15306; and Class 11, §15311
☐ Statutory Exemptions. State code number: 

Reasons why project is exempt:
The Class 3 exemption applies because the Project is the new construction of two small structures (streamgage and gage house). The two small structures are smaller than those listed in Class 3 (a), (b), and (c) exemptions. Additionally, the Project should not have a significant effect on the environment.

The Class 4 exemption applies because the Project is proposing minor alterations to land, water, and vegetation which do not involve the removal of healthy, mature, scenic trees. Additionally, the Project should not have a significant effect on the environment.

The Class 6 exemption applies because the Project's purpose is to collect streamflow information and the Project should not have a significant effect on the environment.

The Class 11 exemption applies because the Project is the construction of minor structures accessory to the large hydropower facility and the Project should not have a significant effect on the environment.

Contact Person: Philip Choy
Area Code/Telephone/Extension: (916) 341-5408

If filed by applicant:
1. Attach certified document of exemption finding.
2. Has a Notice of Exemption been filed by the public agency approving the project? ☐ Yes ☐ No

Notice of Exemption

To: Office of Planning and Research
   P.O. Box 3044, Room 113
   1400 Tenth Street
   Sacramento, CA 95812-3044

From (Public Agency):
State Water Resources Control Board
P.O. Box 2000
Sacramento, CA 95812-2000

Project Title: Ogilby Creek Streamgage Installation (Project)
Project Applicant: El Dorado Irrigation District (District or Applicant)
Project Location - Specific: The Project is located on Ogilby Creek, approximately 6.8 miles east Pollock Pines in El Dorado County.

Project Location - City: N/A     Project Location - County: El Dorado County

Description of Nature, Purpose, and Beneficiaries of Project:
The Ogilby Creek Project will take place within approximately 0.003 of an acre of waters of the United States. The District will dewater the Ogilby Creek diversion canal and modify an existing diversion structure to support a prefabricated H type Flume assembly. Additionally, the District will install a gage house within an existing building. The Project's purpose is to measure El Dorado Hydroelectric Project license-specified minimum streamflow requirements in Ogilby Creek below the Ogilby Creek Diversion Dam.

Name of Public Agency Approving Project: State Water Resources Control Board
Name of Person or Agency Carrying Out Project: El Dorado Irrigation District

Exempt Status: (check one):
□ Ministerial (Sec. 21080(b)(1); 15268);
□ Declared Emergency (Sec. 21080(b)(3); 15269(a));
□ Emergency Project (Sec. 21080(b)(4); 15269(b)(c));
□ Categorical Exemption. State type and section number: Class 1, §15301; Class 3, §15303; Class 4, §15304; Class 6, §15306; and Class 11 §15311
□ Statutory Exemptions. State code number: __________

Reasons why project is exempt:
The Class 1 exemption applies because the Project is proposing minor alterations to two existing structures with negligible or no expansion beyond the existing facility. Additionally, the Project should not have a significant effect on the environment.
The Class 3 exemption applies because the Project is converting the use of two existing structures where only minor modifications are made. Additionally, the Project should not have a significant effect on the environment.
The Class 4 exemption applies because the Project is proposing minor alterations to land, water, and vegetation which do not involve the removal of healthy, mature, scenic trees. Additionally, the Project should not have a significant effect on the environment.
The Class 6 exemption applies because the Project's purpose is to collect streamflow information and the Project should not have a significant effect on the environment.
The Class 11 exemption applies because the Project is the construction of minor structures accessory to the large hydropower facility and the Project should not have a significant effect on the environment.
