Your input is important to us; please use this comment sheet to provide input on issues, alternatives and mitigation measures to be evaluated in the Draft EIR. Your comments will assist in preparation of the Draft EIR. Please include your name and address below to receive a copy of the Draft EIR.

"When something is not broken, there is no need to fix it." If ever this old cliché conveyed a true meaning, it is in regards to Lake Almanor. Lake Almanor is a perfect lake. Trophy trout, recreational abundance and scenic beauty should not be sacrificed for some "unknown" result. I was blessed to grow up in and around Chester and Lake Almanor. Admittedly, I took this area for granted until I moved away in the 90's. Then I realized what a special lake, Almanor is. Please do not try and fix or alter something that is already perfect. Now that I have returned here after 15 years of city and traffic and non-English speaking languages, I truly realize what exists here. Please do not risk changing Lake Almanor into Clear Lake II! It has been recently studied that there is not enough "cold" water at depths over 50' in Lake Almanor to warrant even starting a thermal project to cool by 1°C 30 miles down stream. The idea is preposterous!

Additional space? Please use other side.

Name* Eric Adamson

Address [Redacted]

City/State/Zip Code [Redacted]

Comments, including names and home addresses of respondents, will be made available for public review. Individual respondents may request their home address be withheld from public disclosure. Please check this box if you wish your name and/or address withheld from public disclosure.

Please submit your comments at the Sign-in Station or send your comments to:
