Your input is important to us; please use this comment sheet to provide input on issues, alternatives and mitigation measures to be evaluated in the Draft EIR. Your comments will assist in preparation of the Draft EIR. Please include your name and address below to receive a copy of the Draft EIR.

I'm totally against the thermal curtain boondoggle for some of the following reasons:

1. No proof of the idea working.
2. Proper provision of lake bottom mud.
3. What do we get from this experiment.

A. Job cost of \$5 million dollars

B. Maintenance of 1 million dollars paid by P.G. & E. ratepayers per year.

How did this fiasco ever originate, let alone, survive?

Additional space? Please use other side.
