Subject: Pinecrest lake level

Mr. Parks: I am a 5 generation Tuolumne County resident. Our water problems in Tuolumne County has always been at the mercy of PGE. And now with a few cabin owners at Pinecrest Lake. I feel that even with all the conservation in the world, Tuolumne County can not get by without tapping into Pinecrest Lake waters before the Labor Day restriction. Also with the current drought, more wells are going dry putting more demand on TUD. to supply water.

Thank You for your time in this matter.

Jeff Goularte.
