DIV OF WATER RIGHTS  
SACRAMENTO

Mr. Peter Barnes, Engineering Geologist  
State Water Board Resource Control Board  
Division of Water Rights  
P. O. Box 2000  
Sacramento, CA 95812-2000

Re: Draft EIR, PG&E Certification UNFFR Project NO 2105

Dear Mr. Barnes:

Thank you for providing me the opportunity to provide feedback on the above mentioned project. My concern is that Alternatives 1 and 2 will have a devastating negative impact on my community, the surrounding communities, the local economy and the environment.

My main issue with the Draft EIR is that I find very little in the report regarding the impacts this project, and the proposed Alternatives, will have on the quality of my life. I strongly disagree with the statement that increasing the water temperatures of Lake Almanor will not have a "substantial impact". I live here and my personal experience has been contrary to your findings. With several years of drought I have seen firsthand the negative effects that an increase in water temperature has on the lake. We are experiencing more algae than in the past, which in turn reduces the clarity of the lake. I fear that any activity that further reduces cold water in the lake will greatly reduce the cold water fisheries that have made Lake Almanor one of the best fishing destinations in the State of California. My observations are supported by data in the final draft of the Lake Almanor Water Quality Report, 2015.

Increased water temperatures, increased algae, and reduced fisheries will have a devastating negative impact on the local economy, which is dependent upon tourism and already suffering. When I consider all of the negative impacts this project will have on the local economy and environment, I wonder what the impact will be on my quality of life and property value. Will more local business close? Will I lose needed services, such as our hospital, as a result of a worsening local economy? Will we lose the one thing that brought us all here – the enjoyment of Lake Almanor.

In conclusion, I am OPPOSED to Alternatives 1 & 2 as described in the Draft EIR, and I believe that pursuing these Alternatives is unreasonable and reckless. I urge the State Water Board to only consider the PG&E project, as submitted and approved in the Settlement Agreement of April 22, 2004, without the additional release of cold water from Lake Almanor.

Sincerely,

Please see additional remarks attached

### Additional Remarks

As you are no doubt aware, I am quoting the official stance of the community with which I heartily concur. In addition, I would be interested to know if the Board compared any positive results with the huge number of negative results. Who is the beneficiary of the destruction of our precious resource. I can't imagine any circumstance where the positive results outweigh the negatives.

I would appreciate a reply. I can be reached at the following:
